Education

to use "all necessary means" to get the aid through. "There is going to be a formula authorising 'all necessary means'," said one official at the talks. "The problem is what the conditions are for using force." President Bush met his top

advisers at his holiday home in Maine at the weekend and he spoke to the UN secretarygeneral by telephone. He emphasised that America and its allies saw diplomatic pressure as the only effective way to end the war in the former Yugoslavia. One official at the meeting said the key problem was that any plan for force involved ground troops and "no coun-try has said they want to commit ground troops".

Diplomatic sources at the UN said that one possible outcome of the New York talks was a Nato operation to provide air cover for overland aid convoys run by the West-ern European Union. Howev-

er France, which is more prepared than its Western allies to send ground troops, is said to be uneasy about this strategy. It is not a member of Nato, so it would have no control over the planes protecting its troops. Britain had favoured an expansion of the UN man-

date as the best way of getting aid into Bosnia with a minimum of force and delegates had argued that UN forces could get convoys through the factions if they were better fighting if they were better equipped Russia China, and to authorise force if any military action were taken under UN command Russia and China both have the power to veto any new resolution. America wants a resolution to be adopted this week and Britain and France are expected to agree on a common tert as early as today. This will then be presented to other members of the 15-nation

Douglas Hurd, the foreign secretary, said yesterday that the Western allies were close to reaching agreement and

he acknowledged that it could involve force. In an interview with BBC Radio 4's The World This Weekend pro-gramme, Mr Hurd said that he hoped a resolution would be agreed in the next few days. He made clear that Britain was reluctant to send in ground troops, but he did not rule out military support.

Armed intervention would only be justified if it could bring the present "horrors" to an end. "I think it can be morally justified if a way of using force could be devised which would bring the suffer-ing to an end." Mr Hurd played down sug-

gestions that America and Britain were divided on the means of stepping up aid and he denied that agreement had to be reached with the Serb, Croat and Muslim factions before the convoys could go in. The United Nations High Commissioner for Ref-ugees was already getting land convoys through, but the aid was not going to all the people who needed help, such

as those suffering in camps. Helmut Kohl, the German chancellor, said that the international community had a duty to react in a very tough manner to events in Bosnia. However, he admitted in an interview with the Welt am Sonntag newspaper, that the German constitution made it very difficult for him to send troops. The constitution bans the deployment of troops outside Nato borders. Herr Kohl urged the opposition Social Democrats to drop their rejection of the constitutional

amendment he is seeking. The self-proclaimed Serbi-an Republic of Bosnia yesterday reiterated its warning that armed intervention would lead to aggression. Aleksa Buha, the minister of foreign affairs, said, that Serbs in Bosnia had received offers from volunteers in friendly countries who are ready to render their services", including terrorist raids. "We even have offers from kamikaze pilots who said they are ready to strike Continued on page 14, col 1

# **Ubiquitous Thatcher** launches war offensive

By MARTIN FLETCHER AND JILL SHERMAN

LADY Thatcher is emerging as a forceful proponent of western military intervention in Bosnia, determined to expose what she sees as the inaction of world leaders in resolving the conflict.

Taking a break from writing her book in Gstaad. Switzerland, she appeared by satellite on a number of news and television chat shows in America this weekend urging Western leaders to attack military installations in Serbia and to arm the Bosnians. Last week, she directly challenged John Major to give the Bosnians weapons, and also called for military intervention in an article in the New York Times. Over the weekend, Lady Thatcher sustained the pressure on President Bush, call-

ing for air attacks against

Serb supply lines when she appeared on ABC-TV's This Week with David Brinkley. You have to bomb the supply lines, mainly the bridges, and the munitions dumps — and the military targets in Serbia itself," she said.

John Major has maintained a polite silence on Lady Thatcher's interventions and has had no direct contact with his predecessor. But her comments appear to have struck deeper in Ameri-ca. The New York Times artide is said to have stung Mr Bush and was undoubtedly a factor in his decision to break his silence on the issue and press for a UN resolution authorising "all necessary means", including force, to ensure the delivery of hu-

Final hurdle: the Princess Royal watching the show jumping final before leaving Barcelona yesterday

# **Princess** misses **Olympic** finale

FROM JOHN GOODSODY IN BARCELONA

THE Princess Royal, whose bsence from the opening ceremony embarrassed Brit-ain's Olympic standing and Manchester's bid for the 2000 Games, also missed the closing ceremony last night.

The princess, president of the British Olympic Association and one of the two British members of the International Olympic Committee, flew home five hours before the ceremony was due to begin in the Montjuic stadium. Buckingham Palace said her return was "for per-

The princess's absence from the opening was "no-ticed" by the IOC which next year will select the venue for the 2000 Games. She had waited in her hotel to welcome her children on their delayed arrival from London. During more than a fortnight in Barcelona she attended innumerable receptions and meetings, was a spectator at many venues and visited the British team headquarters. ☐ Ben Johnson, who was disqualified after finishing first in the 100 metres in Seoul, was yesterday expelled from the Olympics. Johnson manhandled a volunteer after he was stopped at the Olympic village for not having his accreditation pass. The police were called but the Canadian

sprinter was not charged. The village organisers said later that Johnson, who has been living for much of the Games in a hotel outside Barcelona, had been asked not to visit the village again.

# Spain pays golden tribute to king of good fortune

There was barely a dry eye or a lumpless throat in all of Spain on Saturday night when Fermin Cacho came from nowhere to win the 1,500 metres and then strode, tracksuited and sweat still running, to the royal box to receive the embrace of his king, Juan Carlos.

For Spain's athletes and public alike, the Borbon monarch and his family were a big part of the miracle that produced a bounty of 22 medals, 13 of them gold, and turned the 25th Games into a trium-phant celebration of Spanish rebirth as a modern state after the long years of backwardness.

Casual, enthusiastic and charming, Juan Carlos was everywhere in the stadiums, rallying his countrymen and chatting with the army of 30,000 young volunteers who kept the show running. As good fortune rained on Barcelona and the city was swept up in the mood of exaltation, the local press took to calling the monarch el talisman real (royal) for the way he man-aged to bring good fortune wherever he went.

Nowhere was this more the case than in sailing, a sport where the king once competed and in which his heir. Prince Felipe, was crewing this year. "Rare is the event

# And the band played on as QE2 ran aground

Forget the paddle ... why were you up the creek at all?

FROM BEN MACINTYRE

THE Oucen Elizabeth 2, a ship used to more glamorous receptions, limped in-gloriously towards Boston harbour today to meet a team of investigators attempting to discover how one of America's most experienced pilots managed to plough the 900ft liner into a sandbank or rock ledge off Massachu-

setts on Friday night. The last of the ship's 1.817 passengers New York yesterday, not in the comfort and splendour of a great vessel, but by ferry, bus and train. None of the passengers or the 1,000-man crew was hurt. Some were visibly shaken and angry, but a few had obviously enjoyed every minute of the drama.

In the tradition of the Titanic, a handful of stalwart souls had caroused the night away in the ship's bars, as the more nervous passengers were shipped

ashore and an emergency team of divers explored the hull for damage. Some wore life jackets over their dinner jackets, and the band rlayed on. One passenger, the noveled Tom Clancy presumably used to danger in the pages of his books), brushed off the incident.

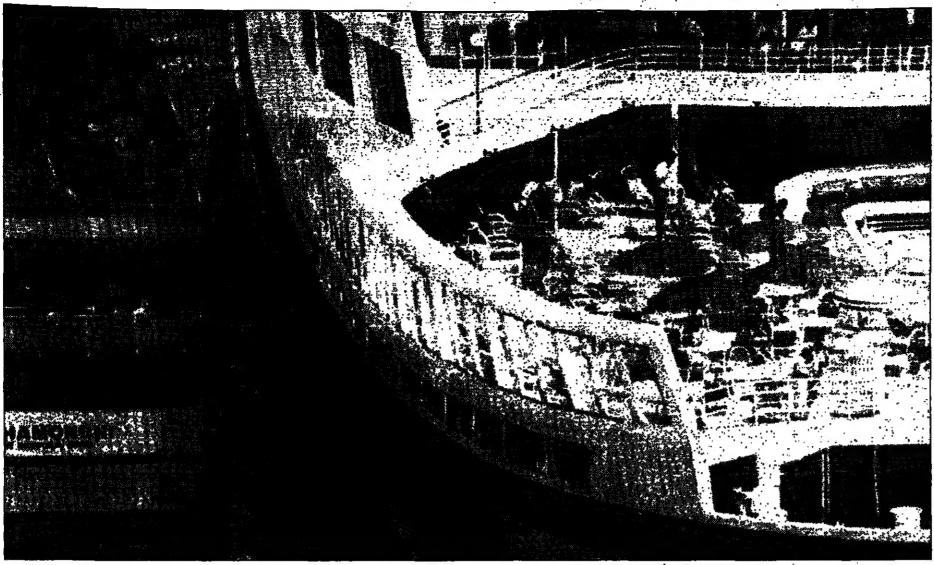

'It was no big deal," he said. Meanwhile investigators attempted to discover why the QE2 should have run aground in good weather, ten miles from Buzzard Bay in Rhode Island Sound, gashing six holes in its star-board side and puncturing at least three ballast tanks and a fuel tank. A joint investigation by the Department of Transport and the US National Transport Safety Board has begun and British officials flew to Boston yesterday. Everyone on the bridge at the time of the accident, including the master and the pilot. John F Hadley, have been routinely tested for drugs and alcohol. Mr Hadley, who was still on board the

QE2 yesterday, was described by his employers. Northeast Pilots, as one of the most experienced seamen in the country. The company refused to comment on whether the accident might have been caused by navigational error, a fault in the ship's charts or changed underwater geography.

According to the pilot's calculations,

the ship ran aground where there should have been a depth of 35ft. The QE2's draught is 32ft. Rhode Island Sound is infamous for its rapidly shifting currents and maze of small islands. In 1956, the Italian liner Andrea Doria sank in the same area, with the loss of 43 lives, in June 1990, in thick fog the cruise liner Bermuda Star hit a sandbank in the same area, spilling about 7.500 gallons of fuel into the water and forcing the emergency evacuation of its 700 passengers.

Crossings cancelled, page 2

Unhappy end to a cruise: some passengers are transferred to a ferry from the damaged huxury liner QE2 while others stay on board to watch or relax by the pool

# Crossings cancelled after QE2 runs aground off US

THE Queen Elizabeth II hit a submerged object off the coast of Massachusetts with such force that six gashes, one 74-ft long, were ripped into the ship's starboard side. The cracks ruptured three ballast tanks and a fuel tank.

Divers found that the 74ft gash, which was three to six inches wide and five feet from the bottom of the hull, began a quarter of the way down from the bow of the 900ft ship. It was followed by an 18ft crack that was one inch

The first mark on the starboard side was a 5ft-wide dent that was two to five inches deep. A spokeswoman for the US coastguard said: "It was like the mark you get when you push your thumb into a Coke can." It was were three to five feet long, one inch wide and with threefoot gaps between them.

None of the 1.817 passengers was injured and the ship was never in any danger of sinking. Its breached tanks took in about an inch of water per hour, which was stemmed by pumps. Some fuel seeped into the water, but was con-

The QE2 ran aground in hazardous waters where the Andrea Doria sank, Nicholas Watt and Ben MacIntyre report

tained using oil booms. The ship was quickly re-floated and then anchored.

Coastguards believe the QE2 hit a sandbank or rock ledge about 10.20pm local time Friday night (early Sat-urday morning, our time), ten miles off Buzzard's Bay, a notoriously hazardous ship-ping area. The ship was sailing in 35-ft waters under the direction of a local coastal pilot, John F. Hadiey, near where the Italian liner Andrea Doria sank in 1956. with the loss of 43 lives.

The waters should have been safe for the vessel, which a draft of 30 1st. However, maritime charts of the area show that there is a small patch of sea with a depth of only 20 to 25 feet.

A Cunard spokesman stressed yesterday that the ship was under the control of Mr Hadley and not the ship's crew. Mr Hadley's employers. Northeast Pilots. described him as "one of the

most experienced pilots in the area". Northeast Pilots, which arranges for pilots to navigate ships through the hazardous coastal waters of Massachusetts, said Mr Hadley had been with the company for 16 years and had regularly piloted ships through Rhode Island Sound, which is infamous for its rapidly shifting currents and maze of small islands.

through the area twice a year. Northeast Pilots yesterday described Mr Hadley, who is from Newport, Rhode Island, as "a local sailor in his late whether he had piloted the QE2 through the sound on its previous voyages to New-

The QE2 makes the voyage

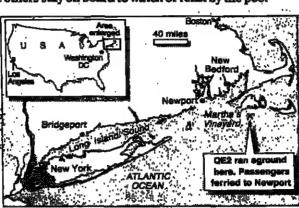

foundland. Both he and Robin Woodall, the ship's captain, have been given routine drug and alcohol tests. Mr Hadley's lawyer, William Hewig, said that his client "may be the target of an investiga-

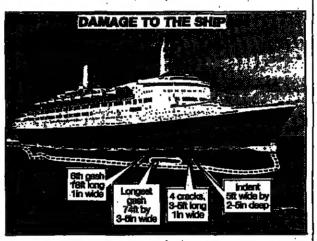

tion". An investigation is now under way to determine whether the accident was caused by a navigational exror, a fault in the ship's charts or the changing underwater geography of the area. As the ship was in international wa-ters the investigation will be carried out jointly by Britain's transport department and the US National Transport

Safety Board. The 66,000-tonne ship. with 2,817 people on board, including crew, had left Martha's Vineyard on the final leg of its five-day round-trip cruise from New York to Nova Scotia in Canada.

The QE2's next two schednled transatiantic crossings have been cancelled and she is due to resume services from New York to Southampton have been promised refunds on deposits.

The ship has been beset by problems ever since she was launched from Clydebank in 1967. She suffered a major engine failure on her maiden voyage to the Canary Islands and had to be returned to the shipyard. In 1987, after a £100 million refit in the then

West Germany, there were so many faults that Cunard had to pay out £900,000 in rebates to passengers. In 1989 more than 160 crew and passengers came down with diarrhoea, and last year a New York rabbi alleged that food labelled on the ship's menu as kosher was not.

The Cunard spokesman said yesterday that such attention bore testimony to the prestige of the ship.

# Five killed as storms batter Britain

FIVE people died as violent storms crossed Britain early yesterday. Torrential rain and lightning caused fires, flooding and traffic disrup-

Thousands of homes in Lincolnshire and Northamptonshire lost power supplies and six houses in Northamptonshire were set on fire by lightning. Radar equipment and escalators at Gatwick Airport were disrupted by a power dip, and a fire station

By JILL SHERMAN, POLITICAL CORRESPONDENT

A "ONE-STOP" benefit payment scheme to streamline the social security system and cut fraud will be unveiled by Peter Lilley, the social security

secretary, today.
Claimants should be able to apply for a range of different benefits, including unemployment benefit, in the same place. They would deal with a single member of staff and use one form for multiple applications.

Mr. Lilley is expected to announce that pilot schemes will be set up over the next few months in Sandwell, West Midlands, Northampton and Newcastle upon Tyne. They should start operating by the aummn.

The aim of the scheme is to simplify the complex social security system that often deters people from taking up their claims. At present, claimants have to fill in a different form for each benefit, usually repeating the same details on each application. The social security department's £500 million computerisation programme will build up a "benefit profile" of claimants, so that details can be cross-checked. Mr Lilley

lowing Benefits Agency staff to offer clear advice on which benefits to claim to ensure that maximum entitlements

are known to claimants. Social security now ac-counts for a third of all public spending and ministers are scrutinising ways in which the £70 billion bill can be reduced. Although Mr Lilley's scheme is likely to increase benefit take-up, he argues that the costs will be more than outweighed by the savings in administration.

The social security and employment departments are also concerned about escalaring fraud, costing several hundred million pounds a year. Combining employment benefit applications with other claims should help

to curb abuse.

# Simplified benefit scheme targets fraud

At the end of this month Mr Lilley will have to do battle with Michael Portillo. chief secretary to the Treasury, about next year's expenditure plans. With unemployment likely to rise to nearly three million by the end of the year, Mr Lilley will be asking for a further £2 billion to pay for benefits. Demand-led pension benefits are also like-

# Volunteer army 'ignored'

COUNCILS are failing to take advantage of an army of volunteers who could help them maintain care services. according to a report published today.

Less than eight months before councils take full responsibility for Care in the Community, a survey of their plans for its introduction found that in spite of a growing demand for extra help local authorities are failing to take advantage of potential voluntary support.

The study by the charity.

teers (CSV) covered half of all councils in England and Wales and found that only two thirds mentioned using voluntary groups at all.

In most cases the plans referred to hiring paid professionals employed by voluntary groups and not to volunteers. Only 14 per cent had plans to recruit and use volunteers on a regular basis.

Elisabeth Hoodless, the charity's director. said:"There is widespread talk of the need for extra support but few clear plans for mobilising it."

CSV operates a full-time volunteer scheme for young people willing to spend be tween four months and a year helping people in need. Ms Hoodless said the numbers volunteering for the scheme had risen 30 per cent in the last two years.

More than 2,500 young people were taking part and the survey had found that among older people half of those questioned said they would be prepared to give their time to help others if they were asked by a suitable organisation.

## NEWS IN BRIEF

# Police hold couple ovek spying allegations

Special braigh officers investigating possible espionage allegations in tolving an east European country and a London couple were yesterday given permission by a magistrate to continue questioning the two for a further 36 hours (Stewart Tendler writes). The allegations could involve assigned for an Issue Course in country come years. involve espionage for an Iron Curtain country some years ago before the end of communist rule in the east. Yesterday senior special branch officers met at Scotland Yard to

senior special branch officers met at Scotland Yard to discuss the enquiry. A detailed investigation was under way as police tried to determine whether they were dealing with a genuine case under the espionage section of the Official Secrets Act.

The couple, both British citizens, were held under the Official Secrets Act at the weekend and yesterday officers were carrying out an extensive search of their home in Surrey. The two are being held at Paddington Green police station, west London, which is used for high-security cases. Yesterday morning officers werat to a magistrate at Horseferry Road court in central London for an extension under the Police and Criminal Evidence Act to enable them to continue talking to the couple for at further 36 hours. They can continue to hold them until later it salay.

RUC detectives are continuing investigations into take controversial Channel 4 decumentary alleging the existence of Northern Ireland death squads run by a committee which included police officers, an RUC spokesman confirmed yesterday. A refusal by the channel and the programme-makers to supply the name of a key informant led to a £75,000 fine by the High Court last month and the police investigation could lead to fresh confrontation. The spokesman could not comment on reparts that police were sifting through documents on the making of the programme supplied for the court case and examining allegations about the validity or existence of some sources and the budget or expenses for the production. Channel 4 said it stood "100 per cent behind the programme".

# Courts 'allow race bias'

Race discrimination is continuing in courts and prisons because the criminal justice system has been slow and inconsistent in implementing equality policies, a report published today says. Although 71 out of 73 magistrates' courts had adopted an equal opportunities policy, the majority lacked clear objectives and less than half had reviewed the policy, the National Association for the Care and Resettlement of Offenders says. The proportion of black prisoners in prison has risen from 12.6 per cent in 1255 to 16 per cent today compared with less than 5 per 1985 to 16 per cent today, compared with less than 5 per cent of the general population. The report summarises research indicating that Afro-Caribbean offenders tend to go to prison younger than whites and that their offences are more likely to be put into the most serious legal category.

# Hodgson regains lead

Julian Hodgson, the reigning champion, became joint leader after round six of the British chess championship in Plymouth, defeating Andrew Martin in 20 moves. Hodgson, from London, sacrificed a knight to chase Martin's king and finished by sacrificing a rook either to win black's queen or to deliver checkmate. The other overnight leader, the grandmaster Jonathan Mestel, could make no progress in his game against Mark Hebden, another grandmaster. A hard-fought game ended in a draw when Hebden was forced to repeat moves to prevent the advance of Mestel's pawns. The leading scores are: Hodgson and Mestel, five points out of six, Hebden, James Howell, Darshan Kumaran, Andrew Webster, Jonathan Levitt and John Emmis, four and a half points.

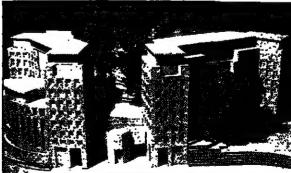

## Thieves take to water

High-powered water skis, water bikes and other small craft are the new targets for thieves moving off roads and on to the rivers, according to a Scotland Yard marine intelligence team which has just completed its first year of operations (Stewart Tendler writes). The team suspects that some of the £3,500 skis may be exported to be sold in countries like Spain, where they are hired out to holidaymakers on the beaches. In London about 50 a year disappear. The stolen skis are part of a growing number of expensive small water vehicles classed as "personal water craft" which are transported by trailer and are easily stolen. In 1990 insurers reported losses of £6.5 million for such craft. The figure for last year is expected to be £10 million. figure for last year is expected to be E10 million.

# IRA veteran at rally

Joe Cahill, one of the founders of the IRA, made his first public appearance for 21 years on a Republican platform yesterday during an anti-internment commemorative rally in west Belfast. Mr Cahill, 72, a former Belfast IRA commander and convicted gunrunner, fled from Ulster in 1971 within days of the introduction of internment. He gave a clenched fist salute as he emerged to address the gathering in Dunville Park, flanked by Gerry Adams, the Sinn Fein president.

# Farrell HK design wins

Britain's new consulate in Hong Kong is to be designed by the architect Terry Farrell, the foreign office has announced. His scheme was chosen ahead of five others in a competition held following Margaret Thatcher's decision in 1988 that a major public building was needed to affirm a continuing British presence in Hong Kong after the colony reverted to China in 1997. Mr Farrell said yesterday: "Until recently Hong Kong was distinguished by groups of dignified low-rise public buildings. While high-rise has given the colony a new, dramatic character, there has been a loss of sense of place at street level."

Construction is expected to start in mid-1993 and take 2'2 years to complete. The current premises are spread around Hong Kong on short leases.

# **BBC** revises schedule

Because of the early end to the England-Pakistan test match, BBC2 will broadcast highlights from the match today at 9am as originally scheduled, but planned live coverage from 10.50am until 1.05pm will be replaced by a repeat of the Olympic closing ceremony. The revised BBC2 afternoon schedule is: 1.35pm Wildlife on Two: Zen the Pigtailed Monkey. 2pm News- 2.05pm Great Britons: Pigtailed Monkey: 2pm News: 2.05pm Great Britons: Mariborough; 3.00pm News: 3.05pm The World About Us. Journey to the Fourth World; 3.50pm News: 4.00pm Film: Last Command: 5.45pm Horizon: Diet for Life. The BBC1 scheduled cricket highlights at 11.50pm will be replaced and Radio 3 will replace live cricket coverage with a schedule of classical music. Padio 5. will be predicted as a schedule of classical music. Padio 5. will be predicted as content of the classical music. schedule of classical music. Radio 5 will broadcast Sportsbeat instead of its planned cricket coverage.

# Police join forces to evict travellers from illegal camps

HAMPSHIRE police called on neighbouring forces yesterday to help them to evict two illegal camps of New Age travellers. They are aware, however, that they may have to return the favour if the travellers regroup beyond the county boundaries

The two gatherings near Romsey have so far led to up to £1 million of damage. 20 arrests and injuries to three police officers. A council incineration plant was wrecked after being set alight and daubed with graffiti by travel-lers camped in Poles Lane. Otterbourne. A further 150 vehicles have gathered at the Chivers Pit, a disused quarry on the outskirts of Romsey.

A spokesman for Hamp-shire police said: "We have now blocked Poles Lane to other vehicles and are concentrating on planning a peaceful eviction." Up to 120 riot police were on standby from Thames Valley, Wilt-shire, Surrey and Sussex. The Hampshire force said that it was aware of the irony in asking for help from its neighbours when the likely outcome was that the travellers would camp in an adjoin-

Scores of police manned roadblocks during the weekend to prevent the travellers from congregating at their chosen site on Bramshott Common, near Liphook. The travellers opted instead to hold their festival outside the exclusion zone and amassed without interference from the police. The seizure of equipment, including a large generator, prevented a big festival site from developing. The heavy overnight rain also

played a part. Michael Colvin, Conservative MP for Romsey and Waterside, visited the Otterbourne site yesterday and said that he would press the home secretary to estabiish festival sites, possibly on defunct military bases. "The fact that this is taking place is deplorable," he said. "The complete contempt for the law. What makes it worse is that they have chosen to set up close to houses which have made the lives of other people

a misery."

The bill for policing the travellers will be met by ratepayers. Yesterday, it was an-nounced that police in the West Country spent more than £700,000 in three weeks monitoring, moving and evicting travellers.

Robin Hobbs, chairman of the Avon and Somerset branch of the Police Federation, said that the cost shared by his force, Wiltshire, Gloucestershire and Devon and Cornwall to pay for more than 25,000 extra man-hours illustrated the need for a change in the law.

This is lawlessness on a huge scale and we need a rapid change in the law if we are to do anything about it. The government needs to act quickly to make sure we have adequate legislation to deal with the problem more firmly

There is very little we can do to stop travellers settling on private land, apart from blocking them with lines of police officers. This is a huge waste of police time and re-sources which could be better spent elsewhere.

"We are dealing with cases of mass disobedience and with people who have no respect for the law. We have seen an alarming change in the trend recently, with more and more illegal gatherings. This means the bills for policing are going up each year and it is money the police simply cannot afford." David Nicholson, Conser-

vative MP for Taunton, Somerset, also urged the government to take swift action. "In the light of such disturbing figures, I shall urge the government to urgently review the law relating to the movement of New Age travellers and the holding of mass parties," he said. "Tax payers should not have to finance the policing of mass invasions and parties which

Camp followers: travellers at Otterbourne, where up to £1 million of damage was caused when an incineration plant was set on fire

# Party faithful blame outsiders for £1m rampage

NEW AGE travellers have blamed fellow ravers at an illegal "torpedo town" festi-val in Hampshire for setting alight a waste incinerator plant early yesterday morn-ing, causing estimated damage of up to £1 million. Some travellers vowed that in future they would police their own events and keep ravers

Police said that there was no doubt the fire, which swept through an office building at the entrance to Hampshire County Council's waste incinerator plant, had been started deliberately. Extensive damage had also been done to the inside of the building. The plant control room machinery and build-ing walls had been daubed with graffiti, windows had been smashed, toilets wrenched out and the contents of lockers scavenged.
Supt Paul Blaker, in charge of Hampshire police's operation at the 30-acre illegal fes

Travellers vow they will police their own events after a waste disposal plant was set alight, Louise Hidalgo reports

damage to all parts of the plant complex. We are still investigating who was re-

John Ekins, a council sureyor who arrived at the plant, which serves the entire county, after firemen had put out the worst of the blaze, said: "The damage is extensive and could cost anywhere from £100,000 up to a miltion pounds to repair. We don't yet know whether there has been any electrical damage, but the whole place has been ransacked and van-

Many travellers at the site yesterday expressed their re-gret and anger at whit had happened. One said two people suspected of being innear Winchester, said: is believed to have tasted through much of the night, had been handed over to the police. Others had volun teered eyewitness state-ments. "It's embarrassing. It just reflects badly on the travellers when it was the townies, the ravers," said one traveller, who would give his name only as 'Rampy'.

More than a thousand ravers had arrived at the Otterbourne site, a series of large fields owned by the council and surrounded by rural farmland and residential areas. By yesterday morning most had dispersed, leaving the field scattered with the travellers' coloured vans, three-ton trucks and 40-seater buses. Music from individual sound systems pulsed across the site and

set to stay for another day at

Hampshire police said no decision had yet been made on whether the travellers would be forcibly moved on, but there was indication that an injunction would be served and the police empowered to act.

Five police vans had pro-vided security for the fire enines when they arrived at 10am, trundling up to the plant through the collection of vehicles, many with their curtains drawn as their occupants recovered from the pants recovered from the previous night's fire. Police said many of the travellers on the site had willingly moved their vehicles to let the fire services through and in some cases had done what they could to help to put out the fire.

Calm appeared to rule at Otterbourne later yesterday, despite pitched battles between travellers, ravers and police earlier in the weekend, ien more than 12 illegal encampment looked officers were injured, six

police vehicles were dam-aged and 20 people were arrested on public order

the pounding music called for permanent sites away from residential areas to be found for future festivals. "Something has to be done," said Alexandra Winter, 77, whose five-acre garden backs directly on to the illegal encampment. "The government has to find somewhere

else for these people to go."

She said parts of her land had been so befouled by human excrement she and her family dared not walk on it.
Fruit had been taken from
her orchards and cars had
been driven through parts of her land. "Your property is their property as far as they're concerned," she said. Other residents in Poole

# Girl wins £3,000 for attack by hawk

BY JENNY KNIGHT

A JUDGE has awarded a five-year-old girl L3.000 damages for injuries caused when a hawk swooped on to her head and tore open her face two years ago. Mandy Welsh was scarred

when the bird of prey, with a wingspan of nearly five feet. apparently mistook the yellow pom-pont on her hat for a baby chick, its tayounte food. Mrs Heather Welsh. 25.

beat the bird off with her handbag. The £1.000 female hawk, which was being exercised by its owner. Benjamin Eastlake, a railway signal-man, flew at Manch as she walked across a field.

Mandy, of Newbiggin-by-the-Sea, Northumberland, was taken to hispital for treatment to the cuts made by the bird's talons. The attack has left her with a sear nearly two inches long across her right cheek and injuries near her left eye and ear.

A county court judge awarded the child, who has been left with a fear of birds. E3,000 damages for her or-deal. The money will be put in

trust until she is 18
Mrs Welsh said Mandy
was still haunted by the memory of the bird pecking at her head. "She had dreadful nightmares for a year after-wards. She is still frightened of birds, especially seagulls because they squawk, which reminds her of the noise the hawk was making. she said. Mandy was walking be-hind Heather when the hawk

swooped and knocked her to the ground. Heather said: "I heard Mandy scream and turned round to see the hird pecking at her face. "It had dragged her off the

path into the grass. I run over and started hitting it with my handbag. My elder daughter Claire was screaming and crying. I heard a whistle and the bird flew oft into a tree near by. Mandy's face was covered in blood. Then the owner came running over. He seemed stunned.

After the hearing at Morpeth, Northumberland. the hawk's owner. Mr Eastlake, 45, of Ashington. Northumberland, said: "The hawk mistook the pom-pom on the little girl's hat for food, a baby chick. The badly shocked."

# Italian powerboat smashes Atlantic record by 21 hours

AN ITALIAN powerboat has shattered the Blue Riband transatlantic record by more than 2! hours, completing the crossing in 58 hours, 34 minutes and four seconds.

The 222ft Destriero. backed by the Aga Khan and costing more than £40 mil-lion, left New York on Thursday and passed the finishing point at Bishop's Rock at 5.14am yesterday. The previ-ous record of: 79 hours 54 minutes was set by the cata-maran Hoverspeed Great Britain in 1990. It retains the coveted Hales Trophy, better known as the Blue Riband, since it was classed as a commercial vessel.

Destriero is classed as a yacht by the trophy's trustees and was not eligible for the trophy. Instead, the sponsors. the Italian yacht club Costa Smerelda, will receive the Virgin Atlantic Challenge Trophy awarded by Richard Branson. the entrepreneur and adventurer. He successfully completed the crossing in 1986 with his powerboat Virgin Atlantic Challenger, but it later sank after hitting an object in the sea. Mr

Destriero: an average speed of 53.09 knots Branson's second attempt in another boat set a record of 80 hours 31 minutes, but the powerboat was ruled ineligi-

ble for the Blue Riband. The Aga Khan, president of the Italian challenge, was on St Mary's, the largest of the Isles of Scilly, to welcome the boat. Italian flags flew in the streets of Hugh Town.

Destriero took a longer route along the 40th parallel to take advantage of the Guif stream. During its non-stop rung it used 700 gallons of fuel, travelling at an average of 53.09 knots for the 3,105-mile journey. The huge powerboat is 15 times more powerful than the Verial Atlantage erful than the Virgin Atlantic Challenger and was a break-

through in design.

After presenting the trophy.

Mr Branson said: "It was wonderful to hand over the trophy, but sad to see it sail away from Britain again. I hope someone in Britain comes forward to bring it back. I'm afraid this time it won't be me - I think I'll play the elder statesman in

The Blue Riband for the transatlantic crossing began in the early 19th century. The name was based on the blue insignia of the Order of the Garter. One of the first holders was the paddle steamer Great Britain, which crossed from Bristol to New York in 15 days in 1838. The Hales Trophy was first presented in 1935. by Harold K. Hales,

# Allan's tell-all phone lines are cut off

FROM RAY KENNEDY, JOHANNESBURG

JANI Allan, the former South African journalist who faces bills of £300,000 after her unsuccessful libel case against Channel 4, has been attempting to tell her side of the story, at a price, to any-body in South Africa who cares to telephone her.

Advertisements in Johannesburg newspapers at the weekend listed five 087 pre-mium rate numbers — the same as 0986 numbers in Britain - on which, for the equivalent of £1.10 a minute. callers could phone her "for the truth...what the papers won't tell you about".

Miss Allan, who said in an interview published in Britain on Sunday that she felt "raped and humiliated" after losing her case, complaining that the most intimate aspects of her personal life had been made public property. offers her opinion of Linda Shaw, one of the witnesses who gave evidence for the

television station on Line One. Miss Shaw, Miss Allan's former flatmate and colleague on the South African Sunday Times, said that she saw a naked male bottom rising and falling over a pros-trate Miss Allan through her bedroom keyhole. On the telephone line, Miss Allan repeats allegations made in court about Miss Shaw's

On other lines she "reveals all" about Eugene Terre Blanche, the leader of the farright Afrikaner Resistance Movement with whom she denied an affair, discusses Mariene Burger, another Channel 4 witness, and talks about Mr Cornelius Sinit, former deputy of the AWB. Miss Allan promises to talk about "dirty tricks" and politics behind the court case. But the three lines dealing

# Heritage properties earn more money from fewer tourists

BY DAVID YOUNG

FEWER tourists visited England's historic properties last year, but they spent more, according to the latest survey by the English Tourist Board. which shows that 68 million visitors spent a total of £166 million, 8 per cent more than

However, top tourist attrac-tions such as the Tower of London, Windsor Castle and Stratford-on-Avon are all feel-

Stratford-on-Avon are all feeling the recession.

The Tower had 16 per cent fewer visitors last year. Windsor Castle 27 per cent fewer and Stratford 14 per cent, the board reported. Numbers also fell at the Roman Baths in Bath, at Stonehenge, Tower Bridge, Hampton Court Palace, Leeds and Hever castles in Kent and Beaulieu. tles in Kent and Beaulieu,

Hampshire. Altogether, the top historic attractions charging admission had 8 per cent fewervisitors in 1991 compared with the previous year. If properties where admission is free are included, the de-

dine in visitors was 4 per

The Tower of London, traditionally the most popular admission-charging historic property, saw its visitors de-cline from almost 2.3 million

in 1990 to 1.9 million last year. The state apartments at Windsor had an even more spectacular drop, from

855,000 to 627,000.
Some attractions bucked the trend. HMS Victory at Portsmouth, Nelson's flagship at the Battle of Trafalgar, received 18 per cent more visitors last year than in

Chatsworth House in Der-byshire (up 9), the Cutty Sark at Greenwich (up 6) and Do-ver Castle (up 2) enjoyed a good 1991. Nearly 200 historic properties mentioned unfavourable factors during 1991 with most (35 per cent) quoting the recession. Other factors included the Gulf war (13 per

cent), fewer American visitors

(8), shorter opening hours (8).

fewer events (8), less favourable weather (7) and increases in admission

Northumbria had the fast-est growth rate among Eng-lish regions for the third year running with admissions to historic properties up 7 per cent. Aston Hall, owned by Birmingham City Council, recorded the largest increase with 45 per cent more visitors last year than in 1990.

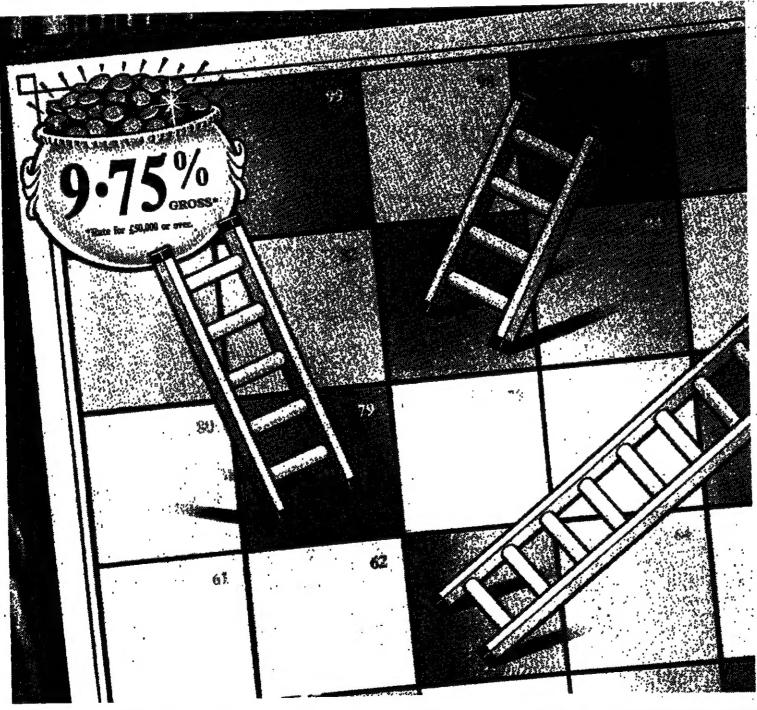

Nearly half the historic properties in England which attract more than 200,000 visitors are cathedrals and churches. Westminster Ab-bey, York Minster and Can-terbury Cathedral are the most popular with more than two million visitors each.

John East, chief executive of the English Tourist Board, said: "There is still a tremen-dous market for England's rich heritage. It has long been a major draw and its conservation is essential if we are to maintain our vital earnings

County, which won the year's top team event a few weeks ago. The team is led by Peter Clapperton, a millionaire who paid soccer-style transfer fees earlier this year to lure top anglers, including Mr Milsom, from rival teams. Mr Clapperton, a director of a fishing groundbak firm, said: "Match angling needs total dedication, and I can see total dedication, and I can see more anglers rurning professional in the next few years."

# Nature books in to holiday hideaway

John Young heads for the forest to find a thriving holiday village in the third of The Times series on tourist resorts

ELVEDEN Forest holiday village, just off the All on the border of Suffolk and Norfolk, comes as something of a surprise. That is both because it is remark-ably unintrusive — so much so that even local people are barely aware of its existence - and because it does not conform to any precon-ceived idea of a large-scale tourist development. Opened in August 1989.

it is the second such development by Center Parcs, originally a Dutch company but now owned by Scottish & Newcastle Breweries. The first village was opened in Sherwood Forest two years earlier, and last week the government approved a third, at Longleat Park, in

Wiltshire. Eiveden occupies about 400 acres of comfer forest which was formerly part of the estate of the Earl of Iveagh, head of the Guinness brewing family. Among the trees the company has built a self-contained community of some 700 villas, with its own shors restaurants, church shops, restaurants, church, medical centre, children's playground and indoor and outdoor sports facilities.
It is about as far removed

from the traditional British camp as could be imagined. There are no funfairs or amusement arcades, no loud music or uniformed attendants urging visitors to enjoy themselve. Cars are directed to a central park, after which travel within the complex is by bicycle or on

Peter Moore. Center Parcs' managing director, emphasises that there is no obligation to participate, but all the facilities, except swimming, cost extra, and the active family should allow for a substantial daily expenditure. A well-stocked supermarket provides for self-catering, but the restaurants and bars are not for

the budget-minded. "We make no pretence to being cheap," Mr Moore said. We are unapologetically catering for a discerning

"Last year both our villages operated all year round at 98 per cent capacity. Even during a boom that would be remarkable. In a recession it's astonishing."

But the company's developments have, he says, suf-fered from misconception and misrepresentation. People have accused us of destroying the forest, and have even suggested that we planned to enclose the whole area in a huge plastic dome. As if we could build a

400-acre dome. I ask you."
The total cost of the dev elopment to date is some £85 million. The work has involved extensive environmental improvements, including the planting of thousands of native tree species and the creation of more than five miles of watercourses, ponds and reed marshes. Birds, plants and insects have returned to an area formerly all but devoid of wildlife, and both English Nature and the Countryside Commission are enthusiastic. If Elveden is the future of holiday-making in Brit-ain, it is a future that seems to work.

ELVEDEN .

Rates: Villas from £151 twobed mid-week December. to £861 four-bed full week mid-June or Christmas. All meals and sports facilities extra except swimming. Facilities: 22 outdoor, 16 indoor sports. Health spa. shops, restaurants, bars. Forest walks, and wildlife

Nearby attractions: historic cities of Norwich and Cambridge, many attractive villages. Norfolk Broads. Newmarket races.

# Keen guns draw an off-season bead on grouse made of clay

With the Glorious Twelfth a couple of days away, grouse shooters are already getting their eye in, Ronald Faux writes

THE guns are out on the moors above innerleithen, Borders, a few days ahead of the Glorious Twelfth, the official start to the grouseshooting season. The gleam of barrels raised towards a grey sky mark the line of nine butts, small barricades of rock and heather raised against the birds line of flight.

When they come, the cov-cys speed in all directions, curving high and low across the heather. Barboured backs stiffen with concentration, harrels spit shot, and gunsmoke drifts on the wind. Some of the prey streak to freedom; most disappear in a small black cloud. But there is nothing that a gundog could get its mouth around or an animal-rights enthusiast denounce. These "grouse" are made of clay. Neil Cattanach, gamekeep-

er on Lord Rosebery's estate and an international clay pigeon shot, has devised a surrogate grouse beat on a stretch of moor made redurdant to shooting parties by commercial forestry. Every detail of a day on the moors is rehearsed and replicated, from the etiquette designed to avoid shooters blasting one another to the chilled wine and caviar in a luncheon

r quits job

There are no beaters, only a splitary helper crouched in the heather some distance away setting off a series of

Sky's the limit: Percy Dachtler of Holland & Holland gunmakers examines the barrel of a 12-bore shotgun. A day on the moors remains an expensive sport

from clay-pigeon shoots; with some clays aerodynamically designed to copy the unpredictable flight of a red grouse. The machines had up to 500 ersatz birds across the buits in a half-hour's drive, a vast oprovement on what nature is apt to provide. The exercise sharpens a shooter's eye and keeps reflexes tuned during the six-month closed period ween partridge and grouse

seasons. Mr Cattanach says: There is all the tension, excitement and challenge of a real drive without the killing some people object to."

Mr Cattanach was born on

the estate and followed his father, Jimmy, as game keeper. The Bow Beat, which ariably produced a bag of 30 brace or more, was created by Jimmy but as a tide of Norway and sitka spruce

spread across the hill its value as shooting land dropped and the butts fell derelict. "It was almost as a tribute to him that I was able to restore them and put them back into use," Mr Cattanach says.

Elsewhere other traps and springs offer simulations of springs oner simulations of the bolting rabbit, springing teal, high pheasant, settling pigeon, walked up snipe and the near vertical emergency

take-off of duck from water. A freezing spring in some preserve of the well-beeled moorland areas, infections enthusiast, as a list provided from ticks and worms, the by David Winks, a director of trouble at Lloyds and recession may this year reduce both grouse and gun num-bers. Estimates are that a line of nine guns could expect to pay between £60 and £80 a brace for a day's shooting, well below many seasons. But

Holland & Holland, reveals. A day with Neil Cattanach's day coveys gives the atmosphere of a real drive. And as the line of guns retreats to a warm fire and a

dram the ironic croak of a genuine red grouse nesting safe sounds from the heather. THE COSTS

# Language and business schools learn lesson of cheap Docklands rents

BY RACHEL KELLY, PROPERTY CORRESPONDENT

NOT everyone is as reticent as London's civil servants about moving to Docklands. Strdents in their hundreds are now enjoying use of the blocks designed for office workers.

Language and businessschool patrons are attracted by the low rents, and students are delighted by the emptiness and calm of Docklands, ideal for studying and near to future employers in the City. Docklands could yet become a new city of dreaming spires.

The first business school has just taken office space. West-ern International University of Phoenix, Arizona, has opened its London campus in Bellerive House, the largest building within the Glengall Bridge West development near Canary Wharf, Europe's tailest office block. A spokesman for the university, which offers degrees in business administration. finance. accounting and management and marketing, said Dock-lands was emerging as one of the major corporate centres, matching the City.

We chose Glengall Bridge for its village atmosphere with its already well-established shopping and eating facilities. It has provided us with a perfect campus environment for 250 students."

The university has taken just over 20,000 sq ft of space in Docklands, attracted by the low rents. A Docklands official said: "Although we

cannot release the terms of the deal we can say that it was based upon £10 per sq-ft." Rent-free periods, free fittingout costs and the purchase of old leases are all commonplace among developers anx-

ious to woo tenants.

The arrival of Western International University follows a previous letting in the same building to the BLS language school, which teach-es English as a second language. It took 5,219 sq ft. Hugh L'Estrange, the principle, said the area's tranquility appealed. "There are enough shops and cafes and bars here too, which are perfect for

The poor transport links had been much exaggerated, Mr L'Estrange said. "It's a total myth based on igno-rance. The Docklands Light

Railway has improved tra-mendously recently."

Joanna Embling, from the letting agents Healey & Baker, which arranged the Western University deal, said that many students in Docklands were from overseas, and that the proximity of the City airport was attractive. Delays in transport links into the centre of London were perhaps less pressing for them than businessmen, she added.

Other educational tenants are also considering Dock-lands, attracted by first-class accommodation at cheap rents. Mrs Embling said pri-

business or language courses and public sector facilities such as the new University of East London were potential tenants. "I understand that a number of polytechnics which have become universities are looking for space. The City University also considered building student accommodation in Docklands." She said

that the universities of Toronto and Nebraska were also considering a move and testing the Docklands waters. "Foreigners do not have the same hang-ups about Docklands that we do. People from overseas love being in London. Docklands is cheap, it's near the City and first-class

space is being let at prices that schools and universities could not usually afford." The students' curriculum of business-related studies are the perfect preparation for a career in the City. Those wishing to study urban development have a ready-made example on their doorstep. Mrs Embling says that foreign businessmen consider working in London, which includes working in Docklands, an exciting interlude in

their business career. The cheap property windfall for educational establishments comes as a result of the failure of the planners' dream to create a commercial community from the ground upwards in the Docklands acres.

# Students eat at soup kitchens

By MATTHEW D'ANCONA **EDUCATION CORRESPONDENT** 

STUDENT welfare organisations are preparing for numerous cases of hardship in the second half of the long vacation, while at least two campases have set up soup kitchens for those on the poverty line.

Polytechnic have been serving free meals daily to 40 students unable to find work or, in most cases, to claim housing benefit and income support. Leeds University's union has also provided a free bowl of soup and a roll to more than 60 students a day.

Greg Lonergan, vice-presi-dent of the polytechnic's student union, said that some had debts of more than £2,000: "In Sheffield, the landlords expect full rent during the vacation but students aren't getting any benefit or dole," he said. "They'll just do anything to earn some money. But the JobCentres are putting up notices saying that students shouldn't bother to

apply."
The National Union of Students has been told by ministers that that the distribution of hardship funds is a matter for individual institutions and that students should not expect a sudden loosening of the purse-strings. Lorna fitzsimons, union president, said that the government had simply passed the buck to campuses, and that the withdrawal of benefits, freezing of the grant and absence of

summer work was taking its

toll throughout the country.

# Magistrates failing to award full compensation to victims

By RICHARD FORD, HOME CORRESPONDENT

MAGISTRATES are failing ment to report their losses or to award adequate compensation to victims of crime for personal injuries, according to a study which recommends that they be asked to justify each departure from cash

other costs ensure that a day

A Home Office report found that magistrates awarded an average £187 for a broken nose, compared with a suggested figure of between £550 and £850, and many victims could receive higher awards if their cases were dealt with by the Criminal Injuries Compensation Board. Awards for personal injury by magistrates were in general far below what

the board's recommendations.

Magistrates were criticised for being too cautious in giving compensation to victims who needed encourage-

injuries to courts, police and the Crown Prosecution Service, the study found. The study of 3,500 cases at nine magistrates' courts found that awards of as little as £50 were sometimes seen by mag-

istrates as providing full compensation for personal injuries. In property-related offences, while nine out of ten of the losses of up to £50 received full compensation, less than half of the cases involving sums of more than £500 won full redress.

The study also found that most benches were reluctant to compensate for sentimental value. The report said: "The courts' failure to follow guidelines in injury award and the concern of the courts to couple compensation with other fi-

magistrates continued to insist upon imposing fines or costs plus compensation. The report said: "Unless this resistance to imposing compensation on its own can be overcome, many

nancial penalties appears to be

leading to fewer and smaller

awards than would be needed

The survey found that many

to compensate victims fully."

will continue to receive smaller awards than the means of the offender would bear." The report recommended that magistrates should have

to explain why they have departed from guideline figures and be given better training about compensation taking precedence over fines and costs when sentencing offenders. Police should give better information to the

# Psychologists will design test to weed out aggressive drivers

By DAVID Young

A SERIES of questions designed to indentify potentially aggressive drivers could be included in future driving

The government's Driving Standards Agency is to submit proposals to the transport department on how the British driving test should be changed to bring it into line with other European countries in 1996.

In an extended test, oral questions will be replaced by a

written paper, which will indude questions drawn up by psychologists.

A spokesman for the agen-cy, which has 1,500 examiners who supervise two million tests a year, said that the new tests would be wider and more sensible. "We expect the test to expose a handful of drivers who are not mature enough to be allowed on the road, but we expect they will be in a small minority."

The British School of Mo-

toring, the country's largest driving school, had suggested that the written test should be in the form of boxes which candidates tick. A spokesman said: "We believe the test should fundamentally test a practical ability to drive."

Andrew Howard, road safe ty director with the AA, said: We want assurances that good drivers will not be penalised because he or she is not so proficient at written

# Cost of sea defences rises with the tides

BY ALISON ROBERTS

RISING sea levels caused by global warming will dramati-cally increase the frequency of floods and the cost of sea defences, according to new

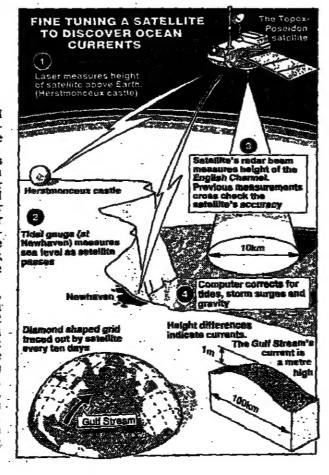

Flooding which now occurs once every 100 years in Newhaven and Southampton could occur once every three and eight years respectively. Calculations by the University of East Anglia, commissioned by Friends of the Earth, the environmental group, show that big ports in the south and east would be the most

severely affected. Researchers used the future sea-level rise, calculated by the Intergovernmental Panel on Climate Change, to work out the future likelihood of frequent flooding. Sussex coastal towns, Essex modflats, Lancashire, the Clyde and Forth estuaries, the Wash and north Keni marshes are particularly at risk. Subsidence would

worsen the problem of land erosion. Most existing sea-defences would be inadequate by 2030.

A rise in sea levels threatens the 40 per cent of British industry in coastal areas or estuaries, including 14 oil refineries, 13 coal-fired power stations and ten nuclear power stations. The financial implications of flood damage to the relecommunications network and the power grid could be huge, the researchers say.

The panel estimates that, assuming a one metre rise in sea level by 2100, it would cost an average of El 16 per person in Britain to protect against flooding. A spokesman for the agriculture Ministry, which is responsible for sea defences, said: "We expect our sea defences to last for 50 years and after that we will build new ones which incorporate

# Satellite will unravel current affairs

Castle in East Sussex is to be used to check the accuracy of a Franco-American satellite which lifts off on an Ariane rocket from the European Space Agency's launch pad at Korou, French Guiana today on a mission to analyse the

A LASER at Herstmonceux

Scientists hope to improve weather forecasting by using the two-and-a-half-ton Topex Poseidon to pinpoint the mysterious pathways of the oceans' currents, which can vary from season to season and even year to year, and play a crucial role in determining the climate by shifting warm water from the equator to the poles. By pin-pointing flows and

discovering new ones scientists hope to improve dramatically the forecasting of important, short-term. changes such as those caused by El Niño. This is a warm ocean surge which recurs every seven to 14 years in the east Pacific off South America. In 1983 it caused famine in Indonesia and bush fires in Australia because of drought,

A new satellite could help scientists to anticipate some of the crueller twists of world weather, Nick Nuttall reports

rainstorms in California and destruction of Peru's anchovy harvest from the Humboldt

Understanding the ocean's circulation should also dramatically improve computer models attempting to forecast longer climatic change, brought about by pollution and global warming, which are influencing environmental policy and economic deci-

sions of governments.
The information gathered by Topex Poseidon might also help indicate the safest place to dispose of hazardous waste, help predict when icebergs cross shipping lanes and improve the fuel efficiency of ships by routing them along the fastest currents.

The satellite has a radar beam that shines in a tenkilometre circle over surfaces of the oceans. Pressure, tem-

changes mean that areas of current are taller than the surrounding water. Big ones, such as the Gulf Stream or the Antarctic circumpolar current, can be as much as a metre

Topex Poseidon will use a sophisticated altimeter to find these anomalies by bouncing the radar beam off the seas and measuring the time it takes for the signal to neturn. As the satellite passes 1.336 Km over the English Channel. its height will be measured by the Herstmonceux laser, one of the most advanced in the world. At the same time readings from a tide gauge at Newhaven will be taken to measure the height of the sea at the time

British scientists, including teams at Aston University, the James Rennell Centre for

ampton and the Mullard Space Science Laboratory are playing a crucial role in the mission. Researchers at the Proudman Oceanographic Laboratory at Birkenhead, Merseyside, will be deploying their knowledge and skills on tidal changes and sea levels around the British coast to ensure the satellite's altimetre making accurate measurements.

Computer models, developed by the Proudman and researchers at Edinburgh University, will be deployed to correct for gravity, tides and effects such as storm surges. Armed with these measurements the satellite's operators can check if the craft is accurately calculating the height of the oceans.

If the British scientists' measurements are at odds with the satellite's, researchers will know they need to adjust Topex Poseidon's measurements when it is over remote parts of the oceans away from ridal gauges, laser finders and Telephone callers abuse inspectors

# UN resumes hunt for weapons in Baghdad

From Michael Theodoulou in nicosia

UNITED NATIONS inspectors resumed the hunt for Iraq's weapons of mass destruction yesterday, well aware that any request to search a Baghdad government building could provoke a confrontation with President Saddam Hussein's regime. But their first day's work passed without

After the inspectors returned to their Baghdad hotel from ten hours in the field, Nikita Smidovich, the Russian leader of the 22-member group, said: "We went where

we planned to go." He de-clined to say whether the team had tried to inspect any

Earlier, Mr Smidovich put a brave face on the task ahead as he and his inspectors left the hotel shortly after dawn in a long convoy of UN vehicles, some still bearing hostile Iraqi graffiti directed at their predecessors. The inspectors looked carefully under their vehicles before loading up equipment. A heavy Iraqi escort emphas-ised the tension surrounding the latest mission.

# Rabin seeks to repair US ties

FROM MARTIN FLETCHER IN WASHINGTON

YITZHAK Rabin, the Israeli prime minister, will today begin two days of talks with President Bush at Kennebunkport, the president's holi-day home in Maine. The meeting is expected to repair strained US-Israeli relations, unfreeze American housing ioan guarantees covering five years, and set the stage for a more fruitful resumption of the Middle East peace talks this month.

Politically the timing of Mr Rabin's visit could scarcely be more propitious. The Israeli leader needs the annual \$2 billion (£1.04 billion) housing loan guarantees for economic reasons as well as to counter right-wing critics of his decision to stop the building of new settlements in the occupied territories. Mr Bush, on the other hand, struggling for re-election, badly needs to curry favour with American Jews, who made up 5 per cent of the vote overall in 1988 and more in such key states as Florida and California

Mr Bush was constantly at loggerheads with Yitzhak Shamir, Mr Rabin's predecessor, US-Israeli relations steadily deteriorated, and American analysis believe Bill Clinton, the Democratic presidential nominee, would today receive more than 80 per cent of that Jewish vote. The Jewish lobby -

10

has been further unset hy perceived administration inaction over reports about Serb concentration camps. One analyst summed it up by saying that the president and Mr Rabin, who was once his country's ambassador to Washington, "know each other, like each other and need

Mr Bush last year froze the request by Israel for \$10 billion in housing loan guar-antees to help accommodate Soviet Jews after Mr Shamir refused to halt the settlement activity in the West Bank and Gaza Strip that James Baker, the Secretary of State, called the single greatest obstade to a Middle East peace settlement. Mr Shamir intended the settlements to make the annexation of the territories a fait

Mr Rabin will also tell President Bush of his plans for giving the 1.8 million Pales-tinian inhabitants of the territories self-rule within a year, with a decision on the territories' final status postponed for

If Mr Bush plays his hand shrewdly, he could engineer a genuine breakthrough when Israeli and Palestinian negotiators resume talks in Washington on August 24 - and boost in the process.

# Stalin captive dreams of America

A US-born victim of the Cold war talks to Brian Killen in Petrichi village,

MICHAEL Semko shared the The team's main aim is to calculate fraq's remaining balfate of dozens of Americans listic missile capability, but Mr held by Stalin's security police Smidovich said they would also try to unearth details about nuclear, biological and during the second world war. Now he wants to return to the country of his birth, which he chemical weapons pro-grammes. The difficulty of finding documentary evidence was pointed out by Hamad Youssef Hammadi, Iraq's in-formation minister. He said left 70 years ago and feared he would never see again, to visit

such evidence could be easily

copied on to microfilm or

microfiches and the only way

to find it would be to search

the pockets of every Iraqi.
The work of the inspectors was delayed by a day because Iraq on Saturday chose for the

first time in four years to celebrate "victory day", the anniversary of the end of its war with Iran. Saddam made no mention of Western threats

of force over weapons inspec-

tions in his speech marking the occasion, but called on Iraqis to resist their enemies. At the weekend Iraqi newspa-pers denounced the UN in-

spectors as part of a worldwide

conspiracy which, they asserted, would fail.

There were childish at-tempts at intimidation on Saturday night when some members of the UN team said

they were woken by anony-mous telephone callers saying.

"Bush, go home. Go home you donkeys:" UN officials fear that, if an increasingly confident Iraq decides to provoke a confrontation with the

West, there could be a return

to the more serious forms of

intimidation which were used

against the previous team,

whose members were abused,

threatened and even attacked

his parents' grave.

Mr Semko, 73, is the first apparent success in a Russian government enquiry into Americans, largely of Slav origin, held in the former Soviet Union. His name was on a list of 25 people who, on a list of 25 people who, archives show, could still be alive, many after serving long years in prison camps. He is a labourer and lives in the Ukrainian village of Petrichi.
"I would like to see my
parents grave, but I would
like to go back only with the
whole family," he said. "We are old. We shall die soon."

Despite speaking only Polish, Mr Semko is known in the village as "Mike", "We all know Mike," said Yuri, 13. He's an American. He stayed here because he got married." Asked what English he knew, Mr Semko rattled off: "One. two, three, four, five, six, seven.

eight, nine. ten."
He said his parents were Ukrainian emigrants who had settled in the United States. where he was born. He showed a Soviet passport saying he was born in Ormrad on October 3, 1919. His family, be said, left Ormrad — "I think it's in Pennsylvania" in 1923, when he was four years old. His parents left America when his father decided to look for work in the coal mines of Poland, and it was there that Mr Semko spent his childhood and

During the second world war, Stalin ordered all Ukrainians living in German-occu-pied Poland to return to the Soviet Union. Mr Semko, his brother, John, and their step-mother obeyed. He was arrested by the Soviet secret police in 1947 after applying for an American passport in Moscow. For decades, he made no further attempts to contact American officials. He showed a tattered 50-

formed of your affairs." He never could. In 1956, the Soviet authorities arrested him on accusations of taking part in a plot to overthrow Stalin's regime and he was detained for four month in Lvov, in western Ukraine, but he was

released for lack of evidence. Security police files show that some other American citizens were given labour camp sentences of up to 15 years. "The plot was against Stalin. They accused me of

conspiracy against Stalin," he said hesitantly. He said that he had been made to sign a document testifying that he had not been beaten, although he was ill-treated in Lvov.

Mr Semko said work had always been hard to come by since his 1956 arrest, as the allegation that he was a spy had proved hard to shake off. when it was offered.

American television discovered him here last month, and Mr Semko said American diplomats had visited him since then. "In 1981 they took away my birth certificate. I think they may have used it to send a spy to the United States. The KGB never returned my birth certificate," he

Mr Semko, who now lives with his wife Stefania, 65, and their daughter, Teodizia, 41, earns a pittance. He never intended to settle in the former Soviet Union, Reuteri

# Right wing wants Bush to seize initiative with tax cut pledges

FROM MARTIN FLETCHER IN WASHINGTON

LEADING Republican conservatives are urging President Bush to call for deep new tax cuts at next week's party convention as a dramatic way of seizing the political initiative back from Bill Clinton, and are threatening to push for a divisive floor vote if

The group believes Mr Bush has to "reassen bold eadership on the economy" if he is to have any chance of reelection and must revive the sharp distinctions between Republican and Democratic phiosophies that have won the party the last three elections.

Those distinctions have been blurred by communism's collapse and Mr Bush's breaking in 1990 of his "no new taxes" pledge. Mr Bush spent last week claiming there was a philosophical gulf "as wide as the Grand Canyon" between himself and Mr Clinton, but without much conviction. In a critical memo sent to

Mr Bush at the weekend, Jack Kemp, the housing secretary. Newt Gingrich, the Republican House whip, Vin Weber, a campaign co-chairman and various congressmen warned the president: "It is not enough for us simply to label the Democratic ticket as bigspending liberals." Voters won't forgive us for a lack of vision for the future" and the Houston convention had to be more than a "celebration of the status quo".

They called for a "flatter, lower, simpler tax system" to boost economic growth, along with a domestic spending freeze and tight new controls grammes. They advocated

across-the-board tax cuts with the top rate reduced from 31 to 28 per cent and the gradual raising of personal thresholds from \$2,150 (E),120) to \$6,000.

American; Canadian and Mexican officials are expected to complete negotiations this week on a North American free-trade agreement, giving Mr Bush an accomplishment to boast of in Houston and one that puts Mr Clinton on the spot. He has portrayed himself as a new-generation, pro-market Democrat who will not pander to his party's left, but the trade union movement and many powerful congressional Democrats claim the agreement will send American iobs to Mexico and want Mr Clinton to oppose it.

Peter Riddell, page 10

## WEWS IN BRIEF

# Punjab has militants on the run'

Chandigarh: The killing of another leading terrorist in Punjab marks the elimination of every separatist gunman on the "most wanted" list and for the first time in more than a decade of civil war, police have the upper hand and peace of sorts has returned to Punjab (Christopher Thomas writes).

Sikh separatists, fighting for homeland called Khalistan. have been overwhelmed by the deployment of 61,000 police. several army divisions, thou-sands of paramilitary forces and the establishment of a paid network of informers. Every terrorist group is in disarray. "Militancy is on the run." K. P. S. Gill, the director-general of Punjab police. said at the weekend.

The state government that took over after election in February, dismissed by many as a mockery of democracy, has developed a measure of credibility although it is still boycomed by the Akalis, the traditional Sikh party.

## **Enquiry called**

Islamahad: Nawaz Sharif, the Pakistani prime minister, has appointed a new judicial com-mission to investigate the death of the former military president. General Muham mad Zia, in a mysterious air crash four years ago. (Reuter)

## Camps to close

Algiers: The military-backed collective presidency in Algeria has announced the progressive closure of detention camps in the Sahara desert holding up to 3,000 support-ers of the banned Muslim fundamentalist front. (Reuter)

## Seeking peace

Nairobi: A UN mission assessing prospects for restoring order in Somalia flew to Kismayu, the country's second port, to meet fighting war-lords. Hundreds of people have fled Kismayu and taken refuge in Kenya (Reuter)

## Crash prayers

Kathmanda: Representatives of five religions conducted a memorial service for the 113 victims of a Thai Airways Airbus which crashed in Nepal ten days ago. None of the pas-sengers' bodies has so far been identified. (AP)

## Marines killed

Knwait: Two US marines taking part in joint exercises with Kuwaiti forces were killed when their helicopter crashed near the northern border with Iraq. The cause of the crash of the Cobra helicopter was under investigation. (Reuter)

## Talks to begin

Arusha: Rwanda's Hutu govemment and Tutsi rebel leaders are to begin talks today in the Tanzanian capital which are expected to focus on the repatriation of refugees and integration of guerrilla forces into the army. (Reuter)

## Aids death

New York: Alison Gertz, who caught HIV the first and last time she had sex when she was 16, and who founded a selfhelp association. Love Heals, has died at the age of 26. She did not discover that she had Aids until she was 22. (AFP)

## All points west

# Family links Saddam to Shia's death

Controversy, outrage and allegations of foul play surrounded the burial yesterday of the spiritual leader of the world's Shin Muslims, Grand Ayatollah Abdul Qassim al-Khoei, who died at the age of 93 in southern

Iraq on Saturday. His family accused the lraqi authorities of burying him without ceremony and in unseemly haste to prevent public outpourings of grief among the restive Shia community that rose against President Saddam Hussein after the Gulf war. His grandson voiced the suspicion that the Iraqi president had the grand ayatollah Yousif al-Khoei, speaking from exile in London. "They rushed the burial through so no evidence would show up. No doctor was allowed to examine him before he was buried. When we spoke to him on Friday, he was fine.

Then, three hours before he

Relatives suspect the hand of Baghdad in the demise of an uncompliant ayatollah, writes Michael Theodoulou

died on Saturday, it was impossible to get through to Leading Shias from the region were denied

the chance to pay their last respects and many of the ayatollah's relatives, including his youngest son, are in Iraqi jails. Three other sons in exile did not even have time to decide whether they would dare return for the funeral which took place shortly before dawn. Iran, which declared three

days of official mourning for the man whose religious learning was accepted as far outranking even that of the late Ayatollah Khomeini, said the Iraqi authorities had imposed a curiew on the holy city of Najaf. Iran's supreme leader, Ayatollah

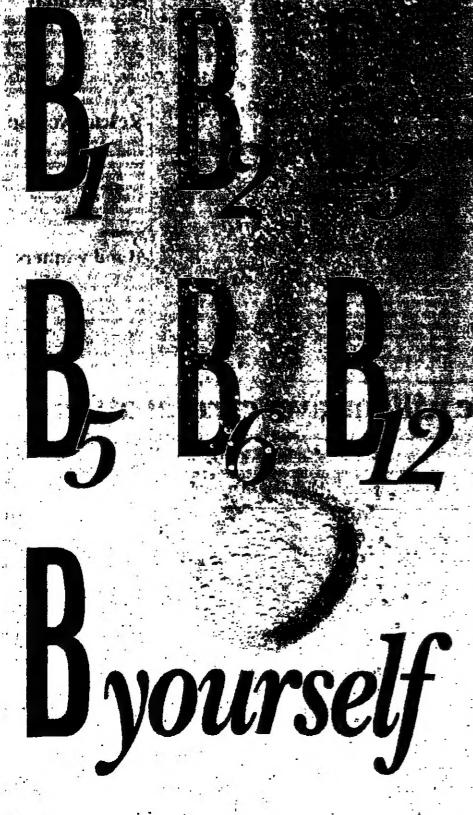

Ali Khamenei, said that the grand ayatollah's death was "great catastrophe". He said Ayatollah al-Khoei was the "pivot" of last year's crushed Shia revolt and accused Baghdad of "tormenting" him since.

vatoliah al-Khoei col-A lapsed and died on Saturday as he was preparing for afternoon prayers in his home near Najaf, where he had lived under virtual house arrest since last year's uprising. He had a heart pacemaker fitted last month and his family said his health was improving. Southern Iraq has re-

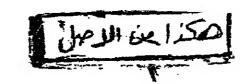

mained restive since last year's uprising, and Saddam's forces recently launched a concerted offenrefugees that has been con-demned by Washington and human rights organisations. Washington has been considering the establishment of a safe haven for the Shias along the lines of that set up last year for the Kurds in

northern Iraq. Mr Yousif al-Khoei said his grandfather had persistently resisted strong pressure from Saddam to condemn the proposals for a Shia safe haven. He decalred: "His silent opposition was an embarrassment to the regime and this is one reason they wanted him out of the way at this time."

The frail, bearded ayatollah belonged to the mainstream tradition of Shia Islam and was apolitical for most of his life, unlike Ayatollah Khomeini. He had refused to give his blessing to either side in the war between Iran and Iraq.

# ANC leader resumes de Klerk contact

# Mandela lifts hopes for talks to restart

FROM RAY KENNEDY IN JOHANNESBURG

NELSON Mandela has given impetus to growing optimism that the constitutional negotiations in South Africa, which have been in suspense since the collapse of Codesa, the Convention for a Democratic South Africa, in May and the of Dr Boutros Boutros Ghali, Boipatong massacre the following month, might soon be

In a speech to thousands of African National Congress supporters in the Ciskei homeland at the weekend. Mr Mandela said that he had telephoned President de Klerk in Pretoria on Friday night. It first direct contact between the two for nearly three months. The ANC leader, in a far

more conciliatory tone than he has shown in public recently, said: "Both amongst the blacks as well as amongst the whites, there are people who really desire peace and eco-nomic stability. You must all help us to build this South Africa during our lifetime. If you assist us, there is no doubt that we are on the verge of a democratic threshold in this

The ten-day visit to South Africa by Cyrus Vance, the former American Secretary of State, as special representative the United Nations secretary-general, appears to have laid the foundations for a way out of the negotiations impasse. Although both sides remain cautious, the climate is begin-ning to appear more flexible than before the ANC's campaign of mass action which climaxed last week with a twoday national strike and

throughout the country. There appears to be a grow-ing realisation within the government and the ANC that the continuing deadlock is getting

marches and demonstrations

Stoffel van der Merwe, the general secretary of the ruling National party, said at the weekend that Mr Mandela's announcement that the ANC's 14 demands for renewing negotiations had been trimmed to three considerably increased the prospect of a resumption of talks.

At a massive rally outside the Union Buildings, the ad-ministrative seat of the government, in Pretoria last week, Mr Mandela listed the ANC's three main demands. They are the installation of an interim government of nat-ional unity followed by an early election of a constituent assembly and practical steps to end the violence.

These three, Mr Mandela

said, embodied all of the principles contained in the ANC's original 14 demands. In reaction, Mr de Klerk said that his door was always open and he was prepared to re-sume negotiations at once. It is certain, though, that an alternative forum to Codesa will have to be found which will be less unwieldy and more representative by bringing in the hardliners of the Pan Africanist Congress and the white

# Chinese scramble for stocks

FROM REUTER in shenzhen

CLUTCHING wads of cash and dreaming of overnight riches, hundreds of thousands of would-be capitalists from across China engulfed this southern boom town yesterday for a slim chance of playing its new stock market.

Exasperated police flailed away with electric cattle prods, bamboo canes and leather belts to try to control the huge crowds that had gathered over two days out-side 302 Shenzhen banks and brokerages.
Shortly before 8am, when five million stock market lottery tickets went on sale,

wails rose outside the Shenzhen branch of the Bank of China as the crush of people churned against a barricade of steel desks blocking the main doors. Only one in ten of the 100-yuan (£9.47) coupons on sale yesterday will be selected by stock market officials, giving the lucky holders the chance to buy stock later this year. Police said one person died in a crush in the Dongmen

Tonight, Secret History uncovers the truth about this shocking event. We talk to surviving victims and ask how respected doctors could support an experiment so riddled with moral and ethical problems.

KEEP AN EYE ON

# Muslim rivals battle in Kabul

FROM AGENCE FRANCE-PRESSE IN KABUL

ARTILLERY battles between two rival Muslim groups raged for a second day in the west of Kabul yesterday while missiles fired by a third Mujahidin faction fell across the Afghan capital.

Dozens of rockets and artillery rounds pounded positions held by Hezb-i-Wahadat, a Shia group backed by Iran, which on Saturday resumed a long-running conflict with its Sumi rivals, the luchad-e-Islami. Rocket fire from the hardline Hezb-i-Islami of Gulbuddin Hekmatyar also began again in the centre of the city near the airport. Missiles forced hundreds of people to flee their homes.

Kabul radio reported that Ahmad Shah Masood, the defence minister, visited the Karie Sangi area near the city's university to try to medi-ate a ceasefire. But lighting continued throughout the day, leaving dozens of fires blazing. Twenty-four people died in the fighting on Saturday, the

radio reported. But witnessesbly much higher. In yesterday's fighting, the

Saudi-backed Ittehad e Islami repeatedly targeted a Hezb-i-Wahadat post atop a hill at the edge of the western district. Several buildings, occupied as the Wahadat's headquarters, were hit as well as a nearby hospital. On Saturday the city's main grain silo, which towers over the sprawling residential area, came under fire but appeared not to be

badiy damaged. Hezb-i-Islami forces have fired hundreds of rockets on the city in the past week. On Saturday one of their missiles killed eight security guards in

palace.
Mr Hekmatyar, who has remained outside the fracfured government of Mujahidin groups, is demanding that Uzbek troops who once fought for the Soviet-backed regime should leave Kabul. The Uzbek forces, who switched allegiance to Mr Masood before the fall of the last government, maintain they are now part of the defence ministry's forces, adding that they are eager to push the Hezbi-Islami forces back from their positions south of

stuck to its position that it will negotiate with Mr Hekmatyar. Talks with him have so far made little progress and many of his top officials, who had been taking part in the administration, including Abdul Sabur Fareed, the prime minister, are no longer in Kabul. Kabul airport has remained closed because of constant firing by Mr Hekmatyar's

guerrillas. The International Committee of the Red Cross said that it had admitted 30 people to its hospital yesterday to add to more than 100 treated for injuries which were sustained

# Russians grant US doctor citizenship

President Yeltsin of Russia has granted citizenship to Arnold Lockshin, 52, an American cancer specialist who defected to Moscow with his family in 1986 claiming he was being harassed for communist sympathies. Mr Lockshin moved to Moscow in October, 1986. He abandoned a job in America as a senior cancer researcher, claiming that he and his wife Lauren had been subjected to psychological warfare and death threats. They took their three teenage children with

Seventy-two years after cen-sors banned Within Our Gates by Oscar Micheaux, the sometimes violent, sometimes caustic look at black life has at ast been shown without cuts in Chicago where it was made. The movie he wrote produced and directed was filmed in 1919, the year of the city's worst race riots. The all-white censor board banned the 1920 premiere because it considered certain scenes too inflammatory.

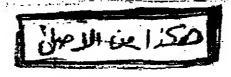

The former KGB/chief, Vladimir Kryuchkov, 69: a leader of last August's Hardline coupagainst Mikhail Gorbachev, has been taken to hospital from the Moscow prison where he is held. Mr Kryuchkov gave the orders for the former Soviet president's telephones to be cut off at his Foros holiday home in the Crimea on the evening of August 18. But 48 hours later the coup collapsed in disarray.

Aderm

China's paramount leader Deng Xiaoping is getting an image boost before a crucial Communist party congress this year. The People's Daily reports the publication of a new book of political articles that apparently elevates Deng, in his role as revolutionary thinker, to the level of former

Chairman Mao Tse-tung. Black actor Gregory Allen Williams has received an award for helping save a man's life during the Los Angeles riots in April Williams, who recently played Martin Lother King in the play, The Meeting, saved a Japanese man who was beaten by a crowd.

Blake Edwards, the film director, who turned 70 on July 26. is directing his 50th film which he says will be his last Pink Panther movie. Son Of the Pink Panther, the eighth in the series, is scheduled for release in May, 30 years after the first one starring Peter

# West close

# to UN deal on the use of force

By MARTIN FLETCHER IN WASHINGTON AND MICHAEL EVANS, DEFENCE CORRESPONDENT

night close to resolving differ-ences over a United Nations resolution that would authorise the use of force to ensure the delivery of humanitarian aid to Bosnia.

Negotiations continued throughout the weekend, and officials in Washington said they hoped a tough resolution could be brought before the United Nations Security Council by mid-week in a demonstration of Western re-solve. Britain in particular had objected to an American draft that it feared could provide military protection in such a way that Serbian forces might come to regard the UN peace-keeping force and relief agencies as enemies, not neutral entities, and attack them. The worst possible outcome would be for those agencies to consider the situation on the ground too dangerous and refuse to continue their operations. The revised draft, it is ex-

for cash

mooksmi

hideana

pected, will still authorise "all necessary measures", but make it clear that protection must only be provided in cooperation and co-ordination with the UN secretariat, the Red Cross and the other agencies. Nato, the Western European Union and individual nations would simultaneously be urged to begin urgent negotiations on what forces they would be prepared to contribute and in what roles, but the resolution would essentially defer the tricky problem that neither the US, nor Britain or France were

willing to put in ground forces.

According to one official, the hope is that the resolution itself will deter the Serbs from interfering with relief efforts and negate the need for any use of force. It is also expected resolution which would authorise the use of all necessary means to assure delivery of humantiarian supplies," said Lawrence Eagleburger, the acting US Secretary of

State, yesterday. He would not

rule out the possibility that protecting the relief efforts could involve air strikes on

Military options for stop-ping the lighting in Bosnia-Herzegovina include selecting bases inside Serbia for air strikes. Punitive attacks would be aimed at forcing the regime in Belgrade to bring the former federal troops and Serbian irregulars in Bosnia

This option, like many others studied in recent weeks, appears to have no political backing. The obvious targets tion dumps and logistical sup ply facilities that are seen to be helping the Serbian cause in Bosnia. There are 22 military air bases in the former Yugo slavia, although not all are under Serb control. The two closest to Belgrade are at Batajnica and Zemon.

dence that the Bosnian Serbs pay any heed to orders from Belgrade. There is no centralised command and control, and even though there is clearly a military link between the Viccoles particular arms. the Yugoslav national army and the 56,000 former federal troops in Bosnia, threats to bomb targets across the Serbian border are unlikely to persuade the Serbs to stop fighting the Cross and Musfrom air strikes would be the

Captive parade: Muslim and Croat prisoners held at Manjaca detention camp. 150 miles northwest of Sarajevo. The photograph was taken during a Serb-organised tour

# Muslims imprison Serbs to ensure bargaining power

Mistreating

detainees does

not seem to be

on the Muslim

agenda, writes

Tim Judah

WHILE one prisoner held a candle alon, the others gathered round to say that they did not know why they had been arrested. One man said: They came last Thursday and Friday and took us away in trucks and cars." Locked in rooms in the office block of a cement pipe factory, at the end of a dirt track in the village of Coralici, these Serii detainees were fearful but none claimed to have been mistreated.

They are the prisoners of the mainly Muslim Bosnian authorities of Cazin in one of the few remaining parts of the republic still loyal to or under the nominal control of the government in Sarajevo. A mile away, a Muslim woman trembled as she recalled her treatment at the hands of Serb allers and a man demonstrated how a fellow prisoner slumped forward when he was shot dead by a Serb guard as

> As Bosnian Serbs mount a public relations exercise, and open their prison camps to international inspection, the stories of atrocities and appalling conditions continue to leak out. But over the weekend Nikola Koljevic, a senior Bosnian Serb leader, said that the plight of Serb prisoners heid by Muslims and Croats was being ignored.

> During an unannounced visit to the solidly Muslim area of Cazin, a request to visit Serb prisoners was instantly grant-ed by the authorities. Interviews with the prisoners were permitted with the door closed

and with no guards present. Twenty-four Serb prisoners shared the same conditions as nine Bosnian Muslim soldiers

America, Britain and France prepare to bring tough resolution on Bosnia before security council

who had been arrested for various misdemeanours. In one room 12 Serb men shared seven beds. The men said that they are the same food as their guards and that they were permitted to smoke.

Piecing together the official story and the tale told by the Serb prisoners, most of whom came from the small village of Vreio, a police operation to disarm them two months ago had passed off successfully and, according to Muho Lepuzanovic, the prison governor, "without casualties". The disarmed men remained in their homes.

Over the past two weeks. however, about 45 men fled.
"They violated the trust that the local authorities had in them," said Mr Lepuzanovic. The Serbs in Coralici said that after their arrest their shoelaces, belts and wallets had been taken from them but that: "everything was regis-tered". Some said they feared that, because there were so few of them, they would be

forgotten.
The stories of the Serbs in Coralici stand in stark contrast to those told by Muslim refu-gees whose freedom from nearby Serb detention centres had been secured with Serb prisoners. Asim Behrem, a labourer, described how he

had his hands tied with wire. "One day a crazed guard tried to throw a hand grenade at us but he was restrained by the others. Then he was drunk and he started calling for someone he had been at school with because he wanted to kill him. Then he just shot the man who was eating next to me in the back of the neck."

One woman, who had been in another detention centre. trembled as she described how she was hit in the face by guards and how they stamped on her feet. "My husband was next to me, he shook like a reed as they did this to me." The woman, who was exchanged for a Serb army officer, believes that her husband is still being held. "He was a teacher and many of the guards had been his pupils. Some of them had got bad marks so they made him wear

every day," she said. The contrast in the stories is clear. The holding of the Serbs in Coralici would seem to be an attempt to raise the stakes in a small corner of the Bosnian war. Following the flight of the others, their detention appeared to be a clear attempt to keep a reserve of prisoners with which to

a woman's wig. They beat him

But the Muslims apparently have not matched terror with terror. It is impossible to know whether the comparatively mild treatment of the Serbs in Coralici is exceptional or not, but so far no systematic patterns of widespread human rights abuses on the Muslim and Bosnian government side seem to be emerging.

# Heavy fighting mars restart of Sarajevo relief flights

From Robert Seely in zagreb

RELIEF flights into Sarajevo. the capital of Bosnia, resumed at the weekend, but the announcement was tempered by reports of heavy fighting throughout the republic. In the southeast, Gorazde

was reported to be under heavy fire after Muslim fight-ers tried to lift the siege of the

city of more than 60,000 inhabitants. However, Serb commanders in the area claimed that the town, which Paddy Ashdown, the Liberal Democrat leader, intends to visit, was on the verge of falling. The Tanjug news agency reported one com-mander as saying: "There will

# **Red Cross sets down** rules for camp visits

By MICHAEL EVANS

THREE-MAN teams from the International Committee of the Red Cross are expected to make their first visits this week to the Serb-run detention camps in Bosnia-Herzegovina from where there have been reports of systematic abuses of human rights. In negotiations with the Serbian authorities over the

weekend, Red Cross officials have laid down strict criteria to ensure that nothing is hidden from the inspection teams. The visits will not begin until all the conditions are agreed. Pierre Gauthier, spokesman for the Red Cross in Geneva. said yesterday that there were three main criteria: that the Red Cross be granted access to all the places of detention; that "no rooms, cellars or corridors" be barred to the inspecting teams; and that all detainees be personally registered and offered the chance of a private interview, "without

isations. It boded well, he said,

for Russia's negotiations on

foreign currency reserves."

In theory, all three credits

announced last week are part

for the autumn.

witnesses", to make allegations of ill treatment. The Red Cross has so far visited ten camps in Bosnia, two run by the Serbs, two by

the Muslims and six by the Croats. The findings have been kept confidential. The same confidentiality will be guaranteed initially by the Red Cross when they visit the controversial Serbian camps that have been at the centre of allegations of torture, starvation and killings.

Mr Gauthier made it clear that if Red Cross inspectors proved the existence of death camps, "we wouldn't stay mute, we'd shout out". He added: "If we found something terrible, we wouldn't be

He emphasised that the purpose of the visits was to protect the people being de-tained and this would not be possible if the Red Cross teams were told to leave the country. be no more waiting and hesitation. Gorazde will soon join the free cities of the

wenty-three flights, some of them British, yesterday left Zagreb, the capital of Croatia, for Sarajevo. Journalists in the Bosnian capital said that it was quieter than normal at the weekend. General Sir Peter Inge, Britain's Chief of the General Staff, yesterday flew to Sarajevo and is today expected to make another visit to inspect the conditions under which United Nations service-

men are working there. Despite last week's growing pressure for the West to inter-vene militarily, President Bush at the weekend reaffirmed his commitment to seek a diplomatic solution in Bosnia. He declared: "The American people must not be led into believing that there is some quick and easy military solution to the problem."

Representatives of the International Committee of the Red Cross in Zagreb dispar-aged offers by Radovan Karadzic, the leader of the Serbs in Bosnia, to invite international supervisors to oversee the Serb-run detention

Marjolaine Martin, the se-nior Red Cross official in the city, said that negotiations to visit, and in some cases revisit. camps had been under way for several weeks. In any case, she said, the Red Cross wanted all detention centres for civilians to be closed and the occupants released. "We are against the camps. Our job is not to run them," she said.

# 'Spiderman' stalks Florence women in heat of the night

FROM PHILIP WILLAN IN ROME

IT IS unwise to leave the windows open at night in Florence this summer, despite the stiffing heat and humidity. A thief, dubbed "Spiderman" by Italian newspapers, has been climbing into even the most inaccessible of bedrooms to steal loose cash and assault women, whenever he gets

the chance. The mysterious night raider has struck four times during the last month, revealing an astonishing cheek and the agility of a monkey. His most recent victim was Ambroise Gaidu, 34. a statuesque woman from Guadeloupe. Having climbed up the drainpipe to her first floor bedroom and discovered that there was no money to be stolen, the man, apparently not wearing a stitch of clothing, decided to slip into the woman's bed.

Ms Gaidu, half asleep and imagining that this was a surprise visit from her boy-friend, initially responded to his caresses. That was until. her hands touched his face and found an unexpected beard. The woman's shrieks woke up the entire neightruder to flight. Spiderman, disappeared with the same rapidity and ease as he had arrived. The first attack ocurred

on July 7 in the Isolotto residential quarter. On that occasion, he climbed in through the window and sexually assaulted a middleaged woman before running off after being disturbed by her husband. A few hours later he struck again. slip-ping into another woman's bed and whispering. "Will you make love to me?" into her ear. The woman's highly vocal response was enough to send him scattling away.

The gravest attack occurred just under a week ago, when the man climbed in through the window of a fourth-floor apartment and raped a woman after half strangling her. Police were initially sceptical at the woman's account but they were convinced when they saw the man's footprints going up the building's facade on either side of the

drainpipe. Florence has been the scene of other serious attacks. Police are still huntbourhood and put the in- ing a man, known as the

"Florence Monster", who committed a series of grisly murders of courting couples over a period of nearly two decades. Investigators have a new suspect in their sights but are moving with ex-treme caution after following a number of false trails in the past. In Milan, the residents of

a suburb near the San Siro soccer stadium have been terrorised by a mad crossbow man, who takes delight in firing darts into the legs and buttocks of unsuspecting citizens. Among his recent victims was a young Englishwoman who was waiting to enter the local vonth hostel

Every summer appears to

produce its crop of manic crimes, throwing particular areas into hysteria and providing a macabre fascination for millions of Italian newspaper readers under their beach-umbrellas. • Murder rate: The Mafia committed a murder every ten hours on average last year, according to a Rome report, giving Italy the sec-ond-highest murder rate in the West after the United

States. (Reuter)

# Methane explosion kills 29

Ankara: A suspected methane gas explosion in a textile factory in the western Turkish province of Tekirdag has killed at least 29 workers and injured another 86. The blast at the Corlu plant on Saturday is thought to have been caused by accumulation of methane gas in a water tank. (AFP)

Statues purged Budapest: Statues of commu-

nist leaders will be removed from Budapest by the end of the year. Thirty-two statues will be displayed in a remote area as a reminder of 40 years of communist rule. (AP)

# Russia vows not to waste foreign aid

FROM MARY DEJEVSKY IN MOSCOW

YEGOR Gaidar, Russia's acting prime minister, promised at the weekend that the funds released to Russia by international financial organisations last week would not be squandered. He emphasised, how-ever, that outside help would benefit Russia only if it pursued sound economic policies. "We have to understand."

he told television viewers, "that any form of credit is only a prop for our domestic policy. If our internal policy is irresponsible, these props won't Mr Gaidar appeared to be

replying to moves by less radical members of the Russian administration, including the head of the central bank, who want to approve large credits to pay the debts of state industries. Last week, another member of the Russian leadership, Andrei Nechayev, the economics minister, accused Viktor Gerashchenko, the bank chairman, of trying to "rewrite" President Yeltsin's decree on bankruptcy, which set out procedures that would allow state enter-

prises to go into liquidation.

The Russian prime minister's television interview was his first response to a series of announcements last week that the International Monetary Fund, the World Bank and the Japanese government

Gaidar: demanded sound economic policies

rescheduling its \$74 billion foreign debt that are planned the bank's office in Moscow, told reporters that the \$600 Mr Gaidar confirmed that million credit now available the IMF credit would be used was the bank's first loan to Russia and its second largest to augment Russia's depleted hard currency reserves. "This ever. The bank had advanced \$1.2 billion to help Mexico money wil make it possible," he said, "for us to speak more with debt repayments but, he calmly with our creditors. said, even this was likely to be Now, at last, we are emerging exceeded by future loans to from a situation where our great country lived without

Mr Stoutjesdijk emphasised that the World Bank loan had been carefully structured to address the most urgent problems of the Russian economy: agriculture, health, transport and development of a private sector. The sum of \$250 million has been earmarked for imports by Russia's private were all releasing the first Ardy Stoutjesdijk, the head of sector. The money is to be

channelled through Russia's central bank and released in stages on to Moscow's weekly hard currency auctions.

In an attempt to minimise fraud and corruption, a system of reimbursement will apply: the central bank will be reimbursed by the World Bank only against receipts for imports of approved goods. These do not include alcohol, orjewellery.

Of the remainder, up to \$100 milion has been allocated for pharmaceutical and medical equipment. Agricul-ture will receive \$150 million, primarily directed to the storage and distribution sectors where, it is estimated, onethird of the harvest is lost. while sums of \$50 million will be allocated to both the transport and energy sectors to finance the purchase of urgently needed spare parts.

One aspect of assistance for the transport sector is still in dispute. The World Bank has approved money to put buses back on the road in big Russian cities and for the upgrading of port facilities. especially at St Petersburg. A Russian request that some money should be used to huy spare parts for aircraft, however, is still being examined. The World Bank wants to check the viability of Aeroflot's dohe its

# Reviving a stale campaign

A few Tory election tricks will not win Bush re-election, writes Peter Riddell

eorge Bush has been study-ing John Major's election victory as he struggles to find a strategy that will put him in contention this November. The president and the prime minister have apparently discussed the secrets of April 9 in various meetings since then. Both sides, however, may be in danger of learning only part of the lesson of the Tory victory.

The main focus is on the comparison between the Labour party and the Democrats. As I noted last month, Labour leaders who attended the Democrat convention in New York were struck by the familiarity of the issues discussed there, the search for a new role after so many defeats and the attempt to win back skilled workers who had moved to the right during the 1980s. Many of the campaign themes are the same: the recession, health provision and education, underpinned by the appeal of change for its own sake.

The central predicament for both Labour and the Democrats is the spending and tax equation. Despite the superficial auractions of John Smith's shadow budget (few lose and most gain, even if not much). Labour spent most of the election on the defensive over tax in face of a constant Tory

pounding.
The Democrats and their advisers claim to have learnt the lesson, and Governor Bill Clinton's taxation

proposals would adversely affect only those earning more than \$200,000 a year, three times higher than the level at which Mr Smith would have increased people's taxes. That will not stop the Republicans attacking the Democrats as the tax-and-spend party. I look forward to hearing leading Republicans talking about a double whammy and being gobsmacked.

But while the tax issue was undoubtedly a handicap to Labour, the party's real difficulty was fundamental. Research since the election shows that Labour appeared to many voters to be out of date and uninterested in the aspirations of those wanting to succeed in life, especially in southern England. The underlying truth is not that Labour came very near to winning, but that it is still far from victory.

Moreover, Labour never put forward a clear impression of how it would change Britain, and never showed how people would benefit from voting Labour. The party was so concerned to demonstrate that it was safe and respectable, that it never produced any excitement: the campaign was less a crusade than a management buy-out. The Democrats have partly avoided this problem with a populist campaign around a few simple themes designed to appeal to the suburbs.

But the success of Mr Clinton in the opinion polls so far has less to do with the sharpness of his own campaign - and he is still person-

## RIDDELL ON MONDAY

shambles on the Republican side. It is Mr Bush's weakness that has made Mr Clinton look good more than the Democrat candidate's

strength The Tories' campaign last spring did not, of course, look like a triumph at the time. Mr Major may have believed all the time that he was going to win, but many of his colleagues had doubts. The Tory campaign was widely criti-cised for making tactical mistakes and for a lack of coherence, for being too negative and for failing to present a clear positive message. In the end, that did not seem to matter, because the electorate had made a deeper judgment both about the Opposition and about

The old adage about govern-

The Gulf war

a hollow

victory, while

education and

environment

initiatives

sound like

empty slogans

ments losing elections rather than oppositions win-ning them is still partly true. Governments lose the voters' confidence when they appear and look divided. This happened to the Tories in 1963-4, and to Labour in both 1950-1 and in 1978-9.

The Conservatives managed to avoid that trap last April. What mattered was that Mr Major gave an impression of knowing what he wanted to do, and con-

vinced people that the government still had momentum and a sense of direction. His comments in the final week of the campaign about defending the constitution and the union with Scotland may have puzzled many at the time, includ-ing several of his cabinet colleagues, but they reinforced his image as a leader who believed in something. By contrast, Mr Bush has too often appeared not to offer any reason why he should be reelected president or what he would do with a second term. The Gulf war has proved a hollow victory. and at home the tags "education president" and "environment president" sound like empty slogans.

Whereas Mr Major was able to appear fresh last April, Mr Bush looks stale. Mr Major was able to distance himself from the more unpopular aspects of the Thatche years, such as the poll tax, while presenting himself as head of a new government. But Mr Bush has looked like the tail end of an old government. So it is wrong to compare Mr

Major's success last April with this November's contest. The right comparison may be between April 1992 and Mr Bush's election in November 1988. Mr Bush may find some useful tactics to use against Mr Clinton in the Tory campaign of last spring, but on their own they are unlikely to bring him success. His fate now depends on whether he still wants to win and can convey an impression of what he would do

# Richard Morrison asks whatever happened to the adage that the show must go on

Hell hath no fury like a rock fan scorned. Last Saturday, Michael Jackson scorned 72,000 of them in one go left them in Wembley Stadium feeling out of luck, out of sorts and considerably out of pocket, while he came over all poorly in the Dorchester Hotel. "He had planned to perform, but it is a nausea-type virus and on the advice of his physicians it was decided he should cancel," said Bob Jones, Jackson's vice-presi-

dent of communictions. Gosh, imagine having to convey that message to the world and yet still be only a vice-president of communications. How many vice-presidents are there in Jackson's entourage? And for that matter how many physicians? Yet in all that vast travelling caravan of guards, choreographers. masseurs, accountants, sycophants and acolytes, there was apparently nobody who thought of turning to our androgynous hero and uttering those five little words which were once the first commandment of showbiz: "The show

must go on". Of course, the commandment does not mean that performers can never be ill, but there is

The ego is stranded

audience has actually assembled. the point of no return has already been passed. Some sort of show they must have, no matter what the crisis. Irving Berlin may have been our century's greatest corn-merchant, but he did have

You get word before the show has started That your favourite uncle died at dawn. Top of that, your Ma and Pa have You're broken-hearted - but you

In the theatre, opera house and concert hall, the show goes on because there are understudies. Indeed, one classic way for a young performer to break into the big time is as an 11th-hour substitute. The star is knocked out with, let us say, a nausea-type virus. Thousands of punters are about to lynch the programme sellers. The anguished impresario is facing rain. In desperation he turns to the mustard-keen young-ster in the chorus line and says: "Go out and slay them, kid. You and dance man, but as a unique are our one chance." and dance man, but as a unique icon which will utterly consume all

The scenario of a hundred awful movies, perhaps, but it happens with surprising regularity even in supposedly "high" art forms. Most of today's top actors, opera singers, dancers and conductors can recall a lucky break that launched their international careers. One might suspect that a nausea-type virus is nature's way of telling fading stars to move over and let the new crowd in - a brutal, Darwinian culling process.

But this expedient falters when

faced with an operation like Jackson's. Here is not entertainment in the ordinary sense, in which Jackson merely plays a part. If it were, it might well be possible for the show to go on with a stand-in. No, this is the reverse: an obsessively engineered global idoli-sation of one man, in which it is the live show that merely plays a part. The aim of a juggernaut publicity machine has been to construct an image of the perform-

pubescent hearts exposed to it. So how could any substitute be considered as a consolation if the vision fails to appear to the children who have come like medieval pilgrims with wide eved faith to worship at the shrine?

Of course, superb publicists also work in the fields of classical music and theatre, all trying just as hard to cast a spell of uniqueness around their clients. The crucial difference is that these arts are still repertoire-centred. Pavarotti may be projected by his publicists as the one and only", but the truth is that if he fell silent tomorrow, the music he sings would still be performed by plenty of others. The likes of Madonna and Jack-

son, however, aim to offer what can only be called the total egocentric experience: they control every aspect of their acts, and are willing to dissolve the line where art ends and reality begins. Their acts incorporate their private lives.

A century ago. Richard Wagner imagined that he had invented the retail attended, when he seized control of the words, music and staging of his operas. His contem-poraries considered him a touch crazed But compared with the totalitarian rock acts of today.

Wagner's lust for control was the epitome of modesty.

The irony is that Wagner's operas are now interpreted in every way except that specified in the composer's stage directions. His "total control" has rightly been rejected as emailing creative death to his interpreters. Whereas in barely 30 years, rock music the roots of which lie in rebellion against authority - has allowed its most famous practitioners to become obsessed with achieving absolute control.

"Obviously he's very upset."
continued Jackson's vice-president after the fateful announcement. One can believe that. Where life and art are so intertwined as in this case, the implications of becoming a no-show are fairly terrifying. If it helps to restore a sense of proportion, perhaps that nausea-type virus will prove therapeutic both for Jackson and the howling 72,000. After all, it's only showbiz.

# Still the world's outcasts

amis, let us imagine, is a far off land from which a traveller now returns. He brings a shocking report. Two races live there: a race of oppressors, the Amels, and an oppressed race, the Leemafs. The treatment of Leemais by the Amels is, to the modern mind, incredible.

Leemass are excluded from politics and government and unable to vote. They are permitted only the most menial employment, even office jobs being denied them. Virtually all become domestic servants in Amel households. Should any Leemaf seek work away from domestic service, written permission from an Amel "owner" is required by law. Leemass are

barred from all the professions. Amels receive a full education. Leemass education is segregated and very elementary. Many get none at all. They are not allowed to drive cars, nor to leave the country without written Amel authority. A Leemaf is discouraged from looking an Amel in the eye.

Usually an Amel can assault "his" Leemaf without the victim having recourse to law. Sometimes Leemass can even be beaten to death "privately". Leemaf evi-dence is not admissible in court without Amel corroboration. Leemafs have no right to marry. without Amel permission, but an Amel (allowed up to four wives from the Leemaf race) can force a Leemaf to marry him.

In general, Leemais cannot venture out of doors except in groups and with the express permission of an Amel. They must enter and leave public buildings by a separate door. No Leemai must appear in public unless completely covered from head to toe. The penalty, which is 74 lashes, may be administered on the spot, without trial, by Amel vigilantes.

There is no need for our traveller to continue. Already his Western audience is dusting down antiapartheid placards, shelved since use outside South Africa House. All agree that the world cannot simply look away. British ministers are handed lists of individual cases and legal outrages to raise with their Lamisic opposite numbers. Sanctions are discussed.

Matthew Parris on the oppression of Muslim women were an animal, she is nor my sister, and the liberal tooks away.

anagrams of male and female. The laws and customs I have described are drawn from a number of places, including Algeria, Bangladesh, Bradford, Iran, Kuwait, Malaysia, Morocco, Saudi Arabia, Tower Hamlets and Turkey. In some of these places, nearly all the injustices are rife; in others there are only a few. For instance, you the taxpayer have paid for community centres in Bradford with separate entrances for

Millions of Muslim women in scores of countries occupy positions not far removed from slavery. They are less free than black men were at the very height of apartheid in South Africa.

Her Majesty's government has a

record of raising with foreign minorities, the persecution of dissidents, and political and religious oppression of every kind. But so far as I know it has never once raised with any government the question of the subjection of women.

Women don't count. They do

not make a noise. Usually they lack even the confidence to complain. From birth, their subjection is so complete that they cannot imagine, and therefore cannot desire, a different life. So we tell ourselves that they are content with their lot. Turning a blind eye is defended,

secondly, on the grounds that it is "none of our business" how people of a different culture live. But wasn't that what the Afrikaners said? Yes, but South Africanwhites are of our own race, and although no one quite says so, it tolerance of Western liberals lies an insulting racism where black-

Reform, we are told, thirdly, should come, but must come within the cultures concerned. We cannot preach. We cannot insist. This argument has been used against virtually every effort ever made by outsiders to improve the condition of others. Yet outsiders are often the first to diagnose an evil and raise the consciousness of its victims. We are part of the brotherhood of man, the Western liberal assures me when soliciting my support for increased foreign aid. If a black is sick or hungry, he is my brother. But if a country's laws treat a woman as though she

on-black cruelty is concerned...

She is only a distant cousin and part of "a very different culture";

not my business.
Great reforms have four stages of which the first and last are bafflement. At the start we are baffled by the reformers. We do not recognise the abuse com-plained of. We cannot understand what the fuss is about. Early crusaders meet incomprehension.

not argument. By the second stage, we have been persuaded that there is an issue to debate, and we take sides. The crusade is fiercely resisted, but the argument has begun. Then comes the triumphant phase. Those who oppose reform are forced onto the defensive, and in time the argument triumphs. Now comes the final stage, bafflement that the reform was ever resisted. How could anyone have disagreed? Surely the evil stared them in the face?

n morality as in science, every century shakes its head in disbelief at the blindness of the previous one. The age that began to forsake religious persecu- 🕏 tion shuddered at accounts of the inquisition, yet saw nothing wrong with slavery. The age which abolished slavery saw no reason for women to vote. The age which enfranchised women was not per-

wrongs; but what great human injustice are we overlooking? Of what will the next century say "It was staring them in the face. Could they not see?" Or are we the first generation to have missed no great injustice? I doubt it.

We are warned by clever people not to blunder into sensitive areas. We are told that our efforts would backfire; that we are too simplistic. too early or too late. Perhaps. But another approach is to attack injustice wherever and whenever we see it. Some notable reforms have started in this way against all prudent advice - and prevailed. I submit that it is time to begin the debate concerning women and Islam.

# ...and moreover Peter Barnard

And verily on the seventh day, which is now called Saturday, we made the great trek unto Southampton for the ceremony known as a wedding. First for the service, heard the sound of vicar speak-ing words from the service called conducted by the man called modern vicar in the suit of clothes known as Marks & Spencer machine washable at 40 degrees, and thereafter for the reception at the place called country club. Oh joy. Oh happi-ness. For gathered in the temple of the Baptists and at the place called country club and in all the places in between were the wedding gods, the Canon, the Pentax, the Nikon, masters each of the still image, together with the ultra-modern gods Sony. Hitachi and Panasonic, purveyors of the moving image from the

denomination called camcorder. And the worshippers of the gods looked through their viewfinders at the person called bride and the other person, who was called bridegroom, and saw that it was not bad at all, due allowance being made for the cloud overhead and the indifferent light filtering into the place called church. No worries, thought the controllers of the more modern gods, for I am with autofocus and auto-exposure, therefore I fear neither the vagaries of the light nor the inconsiderate intrusion from the bobbing heads of those poor suckers who have come here devoid of photographic devices and seem merely interested in celebrating this joining of the

marriage and the happy couple responding to same, though these interruptions were but a minor irritant. For the most part the click of shutter and the whire of motordrive made their proper mark on the proceedings, as it was written in the great multi-lingual book called User's Manual: "Verily I say unto you that ye shall go forth and multiply." And so it had come to pass. Worshippers of the camera and the camcorder had spread into all the corners of the Earth. making for their own generation and for generations to come a permanent record of all that occurred, from the wedding to the christening to the funeral to the arrival of the Canada Geese in the nearby wood, even unto the multiple pile-up which (by happy circumstance) would occur outside their very homes while they were polishing the great god's zoom lens or cleaning its advanced carbon fibre

indestructible body. a direct descendent, so it is written, of the starship Space Shuttle. As they wandered about the church, up and down the aisle. yea, even unto the altar, the controllers of the gods did shoot everything in sight, including each other. And as they did so, they were speculating, each to himself, whether among them there might be a controller with the ultimate in achievement. a man who had reached that height to which all of them secretly aspired, a person who had crossed the great divide From time to time could be

between that which is for in-cessant replaying in front of the family, the friends and even the passing strangers, one who had gone beyond this simple plea-sure to place himself at the right hand, metaphorically speaking, of the great god Fame. Was there here, at last, a

high priest of the camcorder denomination, a man who could justly claim footage (as they were pleased to call it) which had appeared on the Nine O'Clock News behind the caption "amateur video"?

For verily, this was their destiny, their pinnacle. Not for nought was one of their gods called Olympus. To be present at a disaster, this was their Everest. To have the batteries charged up and the lens cover off and the videotape not yet expired, admittedly an unlikely combination of circumstances, at the moment when some great tem-ple, such as Canary Wharf, fell down...to rush breathless to the place they had learned to call Telly Centre, to survive the legendary interrogation of the man called commissionaire, to be carried upwards by electronic lift into the hallowed halls of the sect called News and Current Affairs, later to gather before a television set with friends, family, neighbours, the bringer of post and the taker away of dust, and to hear the words of the earth god Michael Buerk: "This remarkable film, taken by an onlooker ....

Genius

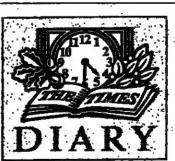

AS DUBLIN enters its third day of celebrations today after Ireland's first Olympic gold medal in 36 years, the city's politicians have found themselves ostracised from the official reception in honour of boxer Michael Carruth at the Mansion House tomorrow.

Carruth, who is flying into Dublin shortly after midnight, accompanied by silver medallist Wayne McCullough of Belfast, will be greeted by hordes of supporters in a special stand built at the airport. Tomorrow, the two will parade through the streets in an open-top bus, before the reception hosted by the city's Lord Mayor alderman Gay Mitchell.

Although the minister for sport. Michael Ailward, and a representative of the Taoiseach have been invited, Pat Hickey, president of the Olympic Council of Ireland, says other politicians will not be welcome, despite yesterday's pledge by the government of £700,000 to train competitors for the 1996 Games. "If the government wants to join in the fun. it had better start discussing contributions," he says, "It would be wrong to allow just anyone onto the bandwagon of a success won against extraordinary odds." His pointed remarks, however, are likely to be lost in the jubilation

pervading the country. The flowers in front of the Carruth house in St Peter's Road. Walkinstown, were flattened when thousands of fans gathered in the street in an orgy of celebration. Bunting and banners have been draped across the property since before the fight started, and there have been six army flypasts.

Throughout the country, daylong impromptu parties have been going on in pubs, with ever chang-

ing casts of celebrants. Even the Rex Bar on Belfast's Shankhill Road "rose cheering" when Carruth won. At Carruth's local in Walkinstown last night, pints were being sold at the 1956 price of 4p in memory of the previous Olympic gold winner Ronnie Delaney, who came first in the 1,500 metres.

Carruth, who was promoted to sergeant in the Irish infantry immediately after his success, is hoping to begin training for the world military championships in Paula, however, has other plans. The couple missed their honeymoon as a result of the Olympics and she is determined they will take a break in the Canary Islands.

 Sunday newspapers are not noted for staffing their offices on the day of publication, but for Yorkshire on Sunday, launched yesterday, a full turnout was unavoidable. The latest title in the Westminster Press empire had been overtaken by events, publishing a front-page offer to win a cruise on the QE 2 even as passengers were being rescued from the holed liner as it lay crippled off Martha's Vineyard, New England. The paper's Bradford offices were abutz with activity as the newly-formed editorial team

fended off countless enquiries

about their peculiar offer. "We are telling people to continue with the competition," said one staffer. Could they not have changed the page after the first edition? "We only had one edition," he muttered poignantly.

Drag Queen? THE Prince and Princess of

Wales, both avid fans of stage and screen, may find their horizons broadened when they make a rare appearance together at this year's royal variety performance. After enduring much criticism in recent years for producing long and unexciting shows, the organisers have headed this year's bill with Jim Bailey, the female impersonator and illusionist. Not only will he impersonate Marilyn Monroe for the royal couple, he is also scheduled to strip in the process.

Bailey, 42. known from Carnegie Hall to Las Vegas for his impersonations of Monroe, Judy Garland, Barbara Streisand and Madonna, will appear on stage on December 7 dressed in the skimpiest of costumes, giving a rendition of "I Wanna Be Loved By You". I am not sure what Princess Diana will think, although I know she is a great fan of the movies." says Bailey. "It may not be Prince Charles's cup of tea. though

Habit forming

EDITH PARGETER, alias. crimewriter Ellis Peters, has extra reason to toast the 15th birthday this month of her character Brother Cadfaei, a medieval monk. She has just struck a lucrative deal with Central Television to film her books. Central reluctantly parts company with the much-loved inspector Morse next year - a final star-studded episode featuring John Gielgud and Robert Hardy will be the series'

swansong :- and the company hopes that Brother Cadfael will take up Morse's mantle.

Peters intends to celebrate her success on August 25 at a dinner with her agent Debbie Owen, wift of Lord Owen. Her 19th chronicle, The Holy Thief, will also be published this month. The reclusive novelist, who usually shuns interviews, is to make her own television appearance later in the year. She will appear on the BBC's Songs of Praise from Shrewsbury Abbey. It was, of course, while delving into the history of the abbey that she hit upon the idea for Brother Cadfael.

 Bob Willis. the former England cricket captain, felt safer taking on the mighty West Indian pure attack than competing in maiche. on the village green. Graham Gooch reveals why in the foreword to The Rothmans Book of Village

I'll have another pint of whatever this was

Cricket: Apparently Willis, himself a demon fast bowler, agreed to play a march at Sheepscombe. Bob was pleased to see how much? excettent beer was consumed by the team before the match. He volunleered to open the batting after his second pint. But he was hit on the head off the first ball of the game: he vowed never to play

village cricket again."

For a wedding is a beautiful

thing, but it is not a bong on the

News at Ten.

# **HOMAGE TO BARCELONA**

The Spaniards confounded all the sceptics by staging the Olympic Games with a spirit that was a model of its kind. The Seoul Olympics four years ago were a success: but that they happened at all was enough to wonder at. From the moment the famous flery arrow shot across the night sky to light the Barcelona beacon, however, Spanish enterprise and enthusiasm made it look easy.

BEDDAY

r cash

ideaway

v 2%

These were the relaxed Games, the friendly Games and above all the fair Games, where for all the commercialism and drugs, the world saw that top-class sport could be fun (most of the time) as well as exciting. The Olympic torch that is now handed on to Atlanta in the United States burns as brightly as it has ever done. The success of the Games should have a lasting effect on Spain itself, just as the Seoul Olympics left their beneficial legacy in Korea. Barcelona's achievement, sporting, eco-

nomic and political, increases the value of the Olympic prize to every city that hosts the event in future, while setting standards that will be harder still to emulate. Manchester is a leading contender to host the Games in the millennial year 2000, and John Major was in Barcelona at the weekend to lend his. support to that claim. The moral of Barcelona's success is that the city that gives a lot gains a lot. It has to become an Olympic city, and think like an Olympic city, not for one summer fortnight but for months and years before, prepared even to adapt its entire infrastructure if needs be. London's Olympic bid for 2000 collapsed precisely because that level of commitment was nowhere in sight.

Clearly the British case for 2000 will not be heeded if government and people are seen to begrudge the effort and investment. Barceiona has one further lesson for whichever city takes up the Olympic torch in 2000. The Games are said to have stimulated the equivalent of nearly 1 per cent to Spain's gross national product. To achieve this, there was an initial £5 billion investment in public facilities and infrastructure, four fifths of it in the public sector. This was an excellent rate of return. The Catalans not only enjoyed their Olympics at no overall cost to themselves, but got a tidy profit, personally and civically, out of them.

Obviously after disastrous Games, in Manchester or anywhere, much public investment would have to be written off. The standing warning to would-be Olympic cities is Montreal, host of the 1976 Games from which that city has hardly yet recovered. Both the Edinburgh Commonwealth Games and the Sheffield World Student Games were similar municipal liabilities. Those who grumble at any prospect of taxpayer expenditure on a Manchester Olympics like to bring up those doleful examples.

Against them can now be set the Olympic record since Los Angeles in 1984, the first Games to recover their costs; Seoul, which brought enormous economic benefit to Korea, not to mention the prospect of reconciliation between North and South Korea; and now Barcelona. Though socialist, the Catalan regional government insisted that property redevelopment arising from the Games should be free-market funded, and that it include such social bonuses as low-price housing. Mancunians need not be too exclusively municipal in their approach. therefore, and must look to forge a viable Olympic public-private sector alliance Barcelona also brings a warning to Manchester. Never have so many international teams taken part in an Olympics, and never have medals been spread more widely. In the next decade the rest of the world may bring to an end the European and American dominance of international sport. And the rest of the world will start demanding that its cities share in the prosperity that hosting an Olympic Games can bring. The year 2000 may be Manchester's best chance. It will almost certainly be

# SPEND FOR RECOVERY

The government's holy war against inflation has ended in victory. The increase in manufacturers' unit labour costs is now virtually zero, the Confederation of British Industry reports today. John Major must now suspend his farwa on inflation. It is time to get down to the serious business of managing a modern industrial economy. threatened by the worst slump for 60 years. This is a matter of balancing priorities, not pursuing dogmatic absolutes.

The greatest danger to the economy today is not the inflation of prices and wages, but the deflation of asset values and consumer demand. The prime minister must instruct the Treasury to stimulate the economy and to begin the process at once. The idea that the government must remain paralysed in the face of recession because of the prime minister's personal commitment to the European exchange-rate mechanism is nonsense. Even accepting the overriding constraint of ERM membership, there are plenty of alternative policies from which to choose.

If Mr Major, Norman Lamont and their advisers cannot bring themselves to cut interest rates and leave the European exchangerate mechanism, then they must abandon some of their other shibboleths instead. In particular, the Cabinet must override the Treasury in its kneejerk opposition to every proposal for public borrowing and spending. If the private sector is prevented from powering a recovery because of the high real interest rates and overvalued exchange-rate that follow from Mr Major's love affair with the ERM, then the public sector must provide the motive force instead, by an ambitious programme of public investment, repairs and maintenance. Government departments must be given instructions to accelerate all public-sector investment projects already under way and to bring forward as many as possible still on the drawing board,

but capable of early implementation. Not only is public investment the quickest and surest way of priming the pump of economic activity without sucking in imports;

more importantly, better transport, school buildings and social housing are badly needed in Britain after two decades of underinvestment. And while it is false to pretend that transport spending or school repairs would be self-financing in a narrow commercial sense, they would be sound economic investments. Every railway built or school repaired today should reduce the need for spending tomorrow, when private demand is growing and economic capacity may be under strain. Over the course of an economic cycle; the impact of public works on the public-sector borrowing requirement is likely to be beneficial or, at worst, neutral.

Accelerating investment would be fully consistent with ERM membership, and even with the fiscal targets in the Maastricht Treaty, which specific ment by quasi-commercial bodies such as British Rail and London Transport from the definitions of public spending and borrowing. In fact, a large investment stimulus to the British economy would probably strengthen sterling in the ERM, by deflecting political pressures to cut interest rates below the German level. In today's capital markets, currencies usually move not in accordance with inflation or the balance of payments, but with domestic growth.

A Conservative government which has prided itself on rolling back the boundaries of the state will feel uncomfortable with this admission. But proceeding gingerly, and occasionally holding their noses, ministers could embark on this Keynesian course with good conscience, provided they stuck to one condition. The macroeconomic stimulus from higher public investment must be matched with an ever more zealous attack on monopolistic fieldoms in government departments, local authorities and present and former nationalised industries. Ultimately it will be the intensity of competition in both the private and public sectors that determines whether an economic revival is choked off by inflation or turns into a new era of sustainable non-inflationary growth.

# **HEAVENLY TRACES**

Gerard Manley Hopkins saw the glory of creation arrayed in the night sky: Look at the stars! look, look up at the skies! O look at all the fire-folk sitting in the air! The bright boroughs, the circle-citadels there!... and so on. Sixteen exclamation marks in a sonnet are probably too many. but poets have often been carried away by those far suns.

Now, in a more commercial spirit, scientists are mapping stars by the million. The heavens are being charted in a kind of celestial A to Z, the better to scan the astral radiowaves for mysteries and track probes flung from orbit into deep space. A letter last week in The Times from the International Star Registry explained how the explorer can now turn left at the Marilyn Monroe Star, the dumb blonde twinkling invitingly at Corona Borealis RA 16h 0m 5s 300 53'.

More than 400,000 people, it seems, have "achieved immortality" by paying £40 each to have stars named after them (no charge for postage or packing). Sceptics will say they might as well hope for immortality from a listing in the phone book. Indeed the names are "registered" in virtually the same way: being printed in a directory which is deposited in the British Library. Anyway, who are we to name the stars? And by what authority does the self-styled International

Star Registry collect the money? Is this just

the ultimate privatisation? Certainly it is a wonderful business, selling moonbeams. With just a computer and a telephone, the potential, so far as anyone can see (and then further) is astronomical. The registry is selling something it does not own.

and no figure can be set on its more-than-global assets. This is one business that literally makes money out of its overheads. The International Astronomical Union makes no objection to the registry's business, but neither could it prevent the establishment of a rival registry. And even the IAU is a mere planetary concern. Imagine the interpalactic lawsuits if a similar body in another solar system is found to have given the same stars other names.

Astronomy for the credulous is known as astrology. To communicate with Mars-Describe the horoscope...evoke Biography from the wrinkles of the palm. . . these are usual Pastimes and drugs, and features of the press," wrote T.S. Eliot scornfully.

Yet as the final frontier opens, the star registry's customers may prove shrewder investors than the sneerers imagine. Place names in new worlds have endured, at least on Earth. The geographers' 38.55N 77,00W, better known as Washington DC. is among more than 25 places in the United States commemorating the first president. Virginia, Jamestown and Maryland all took their names from monarchs who never set foot on the American continent.

Obviously mere co-ordinates cannot do justice to the bright shiners, even if the notion of money changing hands to give a lover's name to a heavenly body is a little too mercenary to count for much in the scales of romance. But George Herbert anticipated. even this scruple with a verse, urging men to raise their sights from sublunary jewels: Take starres for money; starres not to be told: By any art, yet to be purchased.

## Church's role in Bosnia conflict

From the Bishop of London

Sir. The increasing use in recent days of the term "ethnic cleaning", together with the grim picture which has been emerging of the "detention camps" in Bosnia, has already and inevitably led to parallels being drawn with the last major conflict in Europe and the sort of policy which led to such tragic results for the Jews and other minorities.

This time it is the followers of another world faith who are among those being savagely and brumly persecuted, again by a country in which the major religion is Christianity. There is thus, we believe, need for a continent whose countries have been so largely shaped by the Christian faith, to be vigilant in demonstrating concern for all minorities - particularly those of other faiths.

The potential inflammation of religious hatred could be a highly destructive force in international relations within the United Kingdom. Hence, we believe, it is of the utmost importance that the Islamic countries of the world, as well as the Muslim population of the United Kingdom and other European countries, are aware of our concern for what is happening.

It is not, however, as though re-ligious groups have been inactive in this regard. A recent report from a team visiting the region, on behalf of the World Council of Churches and the Conference of European Churches, makes clear that religious groups are involved in the care of refugees without discrimination and in efforts to promote reconciliation and peace. It is noteworthy, for example, that the Serbian Orthodox hierarchy is under strong attack from the Milosevic government and the Serbian hardline nationalists for their repeated protests against all criminal acts of violence, including those committed by Serbs.

We strongly urge that the churches in this country, working alongside people of other faiths, should strive to do all they can to support efforts to bring relief to refugees and war victims of all nationalities and ethnic

They should also give every encouragement, assistance and continuing prayerful support for the work of religious groups throughout the former Yugoslavia in caring for the uprooted, persecuted and wounded, as well as keeping alive a courageous com-minment to peace and reconciliation. Yours faithfully.

TOAVID LONDIN: JOHN BIGGS (Moderator, Free Church Federal Council), isimon coventry (Chairman, International and Development Affairs Committee, General Synod), London House, Westminster. SW1. August 9.

## Fruit machine law From the Chairman of the National

This research showed that, among those surveyed, 62 per cent of inland arrades admitted children under the age of 16, including 59 per cent of the arcades of members of Bacta (British Amusement Catering Trades Association).

Furthermore, 62 per cent of these children were not accompanied by adults. In addition, all seaside arcades admitted children, 61 per cent of whom were unaccompanied. Among those children found in seaside areades during school time, 64

## **Business climate**

From Mr Roddy Gye

Sir. I am delighted for Mr Pile (letter. August 4) that his business is performing so well despite the economic climate, but he is being somewhat disingenuous in suggest-ing that with good management any business can do the same.

His company is fortunate in its sector; food sales are almost recession proof for obvious reasons. Sectors such as my own (corporate tele-vision) and, for example, architec-ture, are suffering from a 50 per cent or more reduction in business levels compared to two years ago. It is an impossibility to "manage" a way out of those sort of market conditions. I

## Newton statue From Mr Richard Willmott

Sir. I write to express my astonishment at the cultural gaffe that has led to the commissioning for the British Library of a statue of Sir Isaac Newton based on Blake's picture of him (photograph and report, August 1). Blake consistently reviled Newton

for a mechanistic and materialistic view of the universe which gave no room to the imagination. His picture of Newton shows him crouched in rocky and barren surroundings, his head bowed down, preoccupied with his compasses. Compasses encompass and limit, and Newton's are in any case only an unimpressive copy of those of the tyrannical and restrictive Urizen in Blake's picture of the previous year, misleadingly

known as "The Ancient of Days". Was it the purpose of the commissioners of this work to hold Newton up to ridicule by making this un-

## Market priorities in school religion morality is not the specialist domain

From the General Secretary of the Association of Christian Teachers

Sir, Government encouragement of religious education, and of Christianity as the main emphasis in it, is very welcome, and your leader of August 5 was especially apt in saying that "RE is too important to be left to amateur enthusiasts". An enthusiastic personal faith is not enough: churches should encourage and support their members in the particularly rigorous training that is required for RE teaching.

RE teachers in schools are employed in various other occupations, mainly because of impossible workloads and poor career prospects in RE. Money is needed therefore, not only for training, but also for staffing and promotion. As schools now control their budgets, that respon-sibility lies with headteachers and

Our evidence suggests that schools providing inadequate or no RE may be highly regarded and over-subscribed because they put their emphasis on strong market lines such as science, maths and English. There is no guarantee that a grantmaintained school neglecting RE would suffer an exodus of parents or be raided by an education association. An inspectorial tut-tut will not bring adequate RE to a school performing well in other respects.

If the government is really serious about RE it will make clear that a school persistently failing to provide it will be in default of its contract to deliver the basic curriculum. A loss of one eleventh of its annual grant would seem an appropriate penalty.

Yours faithfully, RICHARD WILKINS, General Secretary, Association of Christian Teachers, 2 Romeland Hill, St Albans, Hertfordshire.

From Mr Geoffrey S. Duncan

Sir, Religious education is a subject in its own right, with its own distinctive academic content. That content, far from requiring to be "rethought and refined", as your leading article argues, needs the support of well-qualified staff with a deep commitment to the subject.

In church schools and many LEA schools teachers teach with imagination and enthusiasm. While some LEAs do drag their feet over new syllabuses we should credit those who have worked hard to produce helpful material to support teachers in line with the requirement of the 1988 Education Reform Act.

The Board of Education of the Church of England supports the centrality of teaching about Christianity in all schools but also recognises the plurality of faiths within many schools. If tolerance and respect are to be encouraged then it is right that some time should be spent on teaching about other faiths. As your leader rightly asserts,

## per cent were not accompanied by

Gambling is generally recognised to be an adult activity and, apart from AWP — amusements with prizes - fruit machines, all other forms of gambling are restricted to licensed premises and banned to children. The fact that these "one-armed bandits" deliver relatively small cash prizes does not make them any less habit-forming.

The removal of these gaming machines from places which have free public access, such as arcades, would still enable children to play the other games provided there, contrary to what Mr Field claims.

Yours faithfully, E. MORAN, Chairman, National Council on Gambling, Regent's Wharf, 8 All Saints Street, N1.

## am bound to wonder if even Mr Pile, in order to meet his shareholders'

expectations, has postponed capital investment or reduced expenditure on activities such as training. The fact is that recessions are not even-handed in their effect on the

economy. A 1 per cent decline in output nationally disguises the truth that some sectors continue to trade satisfactorily or even grow, whilst others are almost annihilated.

Yours faithfully. RODDY GYE (Managing Director). GHA Communications. 9 Dean Street, W1. August 6.

Business letters, page 17

# flattering picture 12 feet high and giving it a third dimension? Or was it

their intention to snub Blake, not a university man after all, by wilfully misinterpreting his most dearly held convictions and turning his work into an icon of all that he deplored? Let them take Blake's words to themselves: "May God us keep/ From single vision and Newton's sleep!"

Yours sincerely. RICHARD WILLMOTT. Ferwick House, Brighton College, Eastern Road. Brighton, East Sussex.

of the RE teacher; all staff, indeed all

(General Secretary). Church of England Board of Education and the National Society. Church House. Great Smith Street, SW1. August 5.

From Mr Nicolas Walter

Sir. The proposals by the Department for Education to strengthen the system of religious education even more than was done by the 1988 Education Reform Act, as given in the white paper Choice and Diversity and in the consultative document circulated to local education authorities, deserve more critical comment than is given in your leading article.

What opponents of the present system propose is that both religion and morality should be treated seriously in our schools, and that such treatment means giving a fair hearing to various religious and nonreligious beliefs alike. In this context it is wrong to accept that religious education should be "mainly Christian" or that moral education should be mainly religious, although it would be indeed foolish to exclude Christianity from the curriculum, in view of its important place in our national culture.

Religion is a controversial subject which should be taught as carefully as any other controversial subject. It would not be acceptable to give one political party a special place in political education. In the same way it should not be acceptable to give one form of belief a special place in religious education. To do so may be religious, but it is not education, and it has no place in an open society.

NICOLAS WALTER, Rationalist Press Association, 88 Islington High Street, N1.

August 5. From Miss P. A. Steel

Sir. As your leader points out, religious education needs to be carried out in our schools professionally.

Here is a role for the churches. All schools should retain the services of chaplains representing each of the major religions in their catchment areas. Appointment, not nomination, would be essential and teacher training could be given to them to ensure the best use of their time.

Why should not all our schools benefit from the system that has worked so well in church and public schools?

Yours faithfully, PATRICIA STEEL 7 The Strathmore, 27 Petersham Road. Richmond, Surrey. August 6.

# Road and rail markets

From Mr Stephen Joseph

Sir, The British Road Federation (Mr Diment's letter, July 25) continues to ignore the evidence that good public transport networks (rail linked with bus and tram) can provide a good alternative to many car journeys.

Around a quarter of InterCity travellers say they could have used a car for their journey, traffic on motorways parallel to the French TGV rail network is stable whereas on other routes it is rising.

Of course we need roads and railways; the problem is that new trunk roads have always had priority over all other transport spending and now get over £2 billion a year.

Yet the road programme has never been shown to yield clear long-term economic or environmental benefits. despite the BRF's best endeavours; it is justified on dubious cost-benefit analysis based on unrealistic traffic

The new controls on public spending might at least force the government to judge its transport spending. on all modes, against clear objectives so that priority is given to the transport projects that will do most to help improve the economy, the environment and accessibility.

Yours faithfully. STEPHEN JOSEPH (Executive Director). Transport 2000. Walkden House. 10 Melton Street, NW1. July 29.

minated books have all been retained by the Department of Prints and Drawings at the British Museum). the commissioning of this bronze demonstrates the BL's failure to

comprehend the artist's meaning. Blake did not make his drawing of Newton for commemorative purposes but for critical ones. He regarded Newton - along with Bacon and Locke - as "one of the three great teachers of atheism, or Satan's doctrine", teachers for whom he had only "contempt and abhorrence". He inveighed against this rationalist spirit by saying of "the Newtonian" that he is oppressed by his own reasonings and experiments" and that "he reads not nor cannot read". What an appropriate

## Keeping a Vulcan in the air

From Mr D. K. York

Sir. On November 11, 1967, a letter in The Times led to the recovery and restoration of a part of our maritime heritage, the SS Great Britain: this in turn led to HMS Warrior being rescued. I hope that a similar miracle can save a bit of our aviation heritage.

In September the first Avro Vulcan B2 to go into RAF service, and the last airworthy Vulcan in the world, will be grounded and put up for sale.

For the last eight years the aircraft has been flown and maintained by the RAF as the Vulcan display flight with volunteers from Marham, Norfolk, and Waddington, Lincolnshire, where the flight is based. It has been displayed at airshows as a memorial to the personnel who operated the V force that kept the peace won by aircraft such as the Avro Lancaster. A Lancaster still flies with the Battle of Britain memorial flight in this

The Vulcan needs a major service which would cost between £1.25 million and £1.5 million and would ensure the aircraft a display life of ten years or more.

To throw away this British designed and built aircraft would be criminal vandalism. It must be kept flying for the nation so that many thousands more people can marvel at the sight and sound of this beautiful aircraft.

Yours sincerely, D. K. YORK, 91 Nevill Road, Manor Park. Uckfield, East Sussex.

## Costs in Italy

From Mr Christopher Booker

Sir. Having just returned from two weeks with my family in southern Italy, I was not surprised to read your report (August 1) claiming that Italy has become the most expensive country to visit on holiday. But I suspect the situation is even worse than your figures, supplied by Ameri-

can Express, suggest.
They claim, for instance, that the average price for a can of soft drinks is 37p (800 lire). My family have consumed a good many of these between Naples and Sicily, I can confirm that the average figure is between 2,000 and 2,500 lire (£1 plus). A bottle of house wine in a restaurant, said to be the cheapest in Europe at £1.17, is more likely to cost

between £3 and £6. You say that car hire in Italy is the most expensive in the world, at £329 a week. Certainly this was the figure quoted in London when I hired a car to be picked up in Naples - but on arrival I was told the rate of car theft in southern italy is now so high that I would have to pay another £63 a week, bringing the rate to nearly

As for hotel rooms, these are now so expensive, compared to say Germany or France, that it does not take long before one is paying bills running into millions of lire. As my children sweetly asked: "Does this mean that we are millionaires?" After a fortnight in Italy we aren't.

Yours faithfully, CHRISTOPHER BOOKER, The Old Rectory. Litton, Bath, Avon.

August 2.

# Women's issues

From Baroness Denton of Wakefield and Mrs Eve Martin Sir. We were disturbed to read your

Diary piece (August 1) reporting discontent within the membership over the Women's National Commission's move to the Department of Employment. As has been explained to members at our meeting following the change, this is part of the government's realignment of the focus on women's issues — as promised in the manifesto.

There is now a cabinet subcommittee on women's issues, chaired by the Secretary of State for Employment: Mrs Shephard has also set up a special working group to advise her personally un women's issues; and the WNC continues its unique role of reporting women's views directly to government from its special constituency of women's organisations.

We believe its physical transfer to the Department of Employment will allow this to be done with greater efficiency and case.

Yours etc., DENTON of WAKEFIELD.

**EVE MARTIN** (Co-Chairmen). Women's National Commission. Caxton House, Tothill Street, SW1. August 6.

## Cost of dying

From Mrs S. J. Bastin

Sir. In response to the extra charge for burying ashes in an urn, perhaps the Reverend W. N. C. Girard (letter, August 5) should take recourse to the Rubaivat: "Who is the poner, pray, and who the pot?" Yours faithfully.

S. J. BASTIN, Pond Meadow. West Wickham, Cambridge.

From Canon David Maundrell Sir. We are more biodegradable if buried "loose".

Yours faithfully. DAVID MAUNDRELL The Vicarage, Stonegate, Sussex. s. e of

## Received into the Church

The infant son of Mr and Mrs Hugo Stephens was received into the Church, on Saturday. August 8. at the Cathedral and Abbey Church of St Alban. The service was conducted by the Dean, the Very Reverend Peter Moore.

He was baptised Henry John Hugo by the Reverend Tom Gillum, at the Royal Brompton March 29.

The godparents are Mr Nicho-Stephens, Mr Timothy Bendix, Mr Hugh Clutterbuck. Mrs Graham Dunn and Mrs Roderick Wirgman.

## **Forthcoming** marriages

Mr S. Ellis and Miss H.T. Marples

The engagement is announced between Simon, son of Mr and Mrs Patrick Ellis, of Allestree Derby, and Haleyon, daughter of Mr and Mrs Paul Marples, of Bedhampton, Hampshire.

Mr C.M. Green and Miss N.J. Peeters The engagement is announced between Christopher, only son of Mr Ken Green, of Watford, and of Mrs Veronica Dunster, of mpingham. Rutland, and Nicole, daughter of Mr Johannes and Mrs Henny Peeters, of

Auckland, New Zealand. Mr T.R. Mowschenson and Miss J.A. Strang

The engagement is announced between Terence, younger son of Dr Hanry Mowschenson and the late Mrs Mowschenson, of Coleherne Court. The Little Bultons, London, and Judy, daughter of Dr and Mrs Christopher Strang, of Ponteland, Northumberland.

Mr T.J. Noya and Ms R.S. Edun

The engagement is announced between Terry, son of Mr and Mrs John Noys, of Bow, London, and Rehana, daughter of Mr and Mrs Hassan Ali, of Toronto,

Mr N.C.T. Pinhey and Miss A.K. Formby The engagement is announced between Nicholas, elder son of Mr Beauton Pinhey, of Ellens Green, Surrey, and Mrs Jacqueline Burton, of Eltisley. Cambridgeshire and Kate elder daughter of Mr and Mrs Roger Formby. of Thames Ditton.

Dr J.L. Turvill and Dr S.B. Kennedy

The engagement is announced between James, son of Mrs M.S. Turvill-Smith and of the late Mr K.P.P. Turvill, of Cambridge, and Shelagh, daughter of Mr and Mrs LD. Kennedy, of Dulwich Village, London.

Mr R.J. Walker and Miss S.E. Fergusson Caninghame
The engagement is unnounced

between Ross, son of Mr and Mrs Peter Walker, and Sophie, younger daughter of Captain and Mrs John Fergusson-

The marriage took place on Saturday in the Henry VII Chapel. Westminster Abbey, of Mr Nicholas Hine, eldest son of Air Chief Marshal Sir Patrick and Lady Hine, to Miss Charmian Caines, elder daughter of Sir John and Lady Caines. The Very Rev Michael Mayne. Dean of Westminster, officiated.

# **Rosalie Osmond**

# Ignorance stalks the land of Bunyan and Milton

he Decade of Evange-lism and evidence of growing attendance at Sunday services in some dioceses has led to guarded optimism about the future of Christianity in Britain. At the level of individual commitment there are indeed encouraging signs. As a general unifying cultural and moral force, however, the influence of the Church continues to

A recent survey, carried out for me by Gallup, confirmed this view at several levels. Based on 600 face-to-face interviews with three groups (first-year university students, school teachers, and professionals aged 40 to 60), it showed that residual knowledge of the cultural elements of Christianity is very low indeed. Also, while most people believe they conduct their private and public lives in accordance with Christian morality this is not supported by any close analysis of what, in detail, that constitutes. At the same time, there is still a real desire for the positive things, such as a sense of purpose and meaning in life, that religious belief has traditionally provided.

The depressing facts are quickly stated. Out of eleven religious writers, including Bunyan, Milton, T.S. Eliot and C.S. Lewis, 23 per cent could not name a single religious work by a single writer. For only one writer (Bunyan) could more than half name a work. The response of the students was particularly poor, with 45 per cent unable to recall any work by any

Musicians fared slightly bener, probably because I included Andrew Lloyd Webber in the list. But even here 15 per cent (26 per cent of students) failed to name a single religious composition in a group of composers that included Bach and Handel.

Asked to quote any verse from the Bible, other than the Lord's Prayer, 50 per cent (73 per cent of students) were unable to do so. The response of one student wit just about summed up the situation: "Jesus wept." Even identification of biblical passages and phrases from the liturgy was poor. More of those who identified "In the beginning was the Word" believed it came from Genesis than (correctly) from John's Gospei. Again, it was students who showed least familiarity with the Bi-

ble and liturgy. It must be emphasized that the survey sample was by no means a cross-section of the population. Nearly all were university graduates or stu-dents; all had been born in this country and were not active adherents of any religion other than Christianity.

The survey was deliberately

The writer is winner of the Charles Douglas-Home Award and she conducted detailed research into how much religious belief has an influence on secular life in Britain

designed to produce a bestpossible scenario. What these people do not know is unlikely to be known or passed on to future generations. It is arguable that none of

this matters to the Church, or that if it matters at all. it is the concern of educationalists, not religious leaders. This stand presumes a divorce between faith and knowledge. religious experience and tradition. The Church has always recognised that intellectual subtlety is not a necessary prerequisite to salvation, that, indeed, it may be a hindrance. But the wholesale disappearance of centuries of Christian music, art. and lit-erature (including the Bible itself) from the public consciousness cannot auger well for the survival of a religious sense in those other than the devoutly committed.

The importance of tradition in general is currently suspect. Nevertheless a sense of communion with the Church that stretches backwards and forwards in time as well as laterally in space has been a great source of strength.

Where Christian knowledge and tradition are valued today is frequently not among those who are com-mitted to any faith. You are much more likely to find an appreciation of Milton or Bunyan in a university English department than in the Church, a good performance of the music of Bach or Handel (or even Byrd) in a concert than as part of a religious

This divorce of Christian culture from the roots of faith that originally produced it is borne out by the survey resuits showing that agnostics are almost as likely to value maintaining and passing on a tradition of good Christian art, music and literature as practising Christians, and that their concern for the preservation of historic church buildings outstrips that of the devout.

These results, while superficially curious, are neither accidental nor inexplicable. The Protestant Church has always had an uneasy relationship with the ornately beautiful, preferring to see it as a distraction from the contemplation of the eternal rather than, in a neo-Platonic way, as a means of ascent to it. Further, through an extension of classical ideas about rhetoric, it came to be felt that the ornate, the carefully composed (in words or music), was implicitly insincere. Plain speaking was the hallmark of true meaning.

The modern imperative to "communicate." to make religion "understandable," and accessible reinforces this trend towards plain speaking For all these reasons, the Church is actually contiving at the disappearance of its own poetic and musical

ome arguments ranged against this position are, first, the theological one that if one of the attributes of God is perfection, then our human offerings to him should be as perfect as is humanly possible. This implies, of course, the notion that there are aesthetic values discoverable by human intellect, a view now widely disputed in some intellectual circles. A second argument is that the exclusive emphasis on meaning ignores the need for transcendence in religion, and elevates meaning in language to the virtual elimination of any emotive element. Lord Runcie expressed the contrast succinctly when he said in an interview with me: "And people may say, 'Oh well, the children understand it.' But I esk the question, are they being nourished to enter into something bigger than themselves and are they being led with hallowed words which will stand them in good in times of difficulty or joy."

If the outlook for the cultural aspects of Christianity is somewhat bleak, the survey found, superficially at least. more cause for optimism in the results on moral questions: Eighty per cent of re-spondents believed their actions in private life (83 per cent their actions in public life) conformed to Christian morality. But when asked if they consciously took a Christian perspective into account before speaking or acting the percentage was much lower - 50 per cent.

In the matter of morality, it seems that people want, in theory, to feel they are behaving in a "Christian" way but are unwilling to subordinate their personal views of what that entails to the specific guidance of the Church, or probably any other authority.

A similar conflict surely underlies the fact that the role of the Church that is rated highdistressed.

The dominant impression left by both the survey and follow-up interviews was of a society that has not so much rejected the Church as one that knows little about it and. while vaguely aware of unsatisfied needs, is unlikely to initiate a search to fulfil them.

# **Marriages**

## The Rev M.R. Harrison and Miss R.A. Bentley

The marriage took place Saturday at the Church of St James, Castle Acre, Norfolk of the Rev Michael Robert Harrison, second son of the late Professor PJ. Harrison and of Mrs Harrison, of Learnington Spa, Warwickshire, to Miss Rachel Anne Bentley, daughter of the Bishop of Lynn and Mrs Bentley, of Castle Acre. The father of the bride, the Rev C. Moody and the Rev A. Cain officiated.

The bride, who was given in marriage by her twin brother, Mr Simon Bentley, was attended by Rachel Bolt. Mrs Katharine Gorick. Mrs Una Bentley and Miss Rebecca Harrison. The Rev Martin Gorick was best man.

NIMBOD (c) Son of Cush and grandson of Ham. Nimrod was a mighty hunter before the Lord, and ruled wast tracts in Mesopotamia. He belonged to the Dark Age between Noah and Abraham about which the Bible tells almost nothing. He may have been the first man to wear a crown. St Augustine and Dante make him out a giant. His tomb was legendarily located in Damascus, where no dew ever fell on it.

ASENATH (b) An Egyptian, wife of Joseph and mother of their sons, Manasseh and Ephraim. Genesis 41: "And unto Joseph were born two sons before the years of famine came, which Asenath the daughter of Poti-pherah priest of On bare nuto him."

JASON(b) A Christian of Thessalonica with whom

Paul and Silas stayed. His home was assaulted by an anti-Christian mob. Acts 17: "And when they found them not, they drew Jason and certain brethren unto the rulers of the city, crying. These that have turned the world upside down are come hither also." KETURAH(a) Wife of Abraham after the death of Sarah. She had six sons whom Abraham endowed with gifts but seat eastward out of range of isaac, his heir. Many peoples, from Greece to southern Arabia, including the Midianites, later claimed descent from

Abraham through his dispersed progeny.

one of the few job vacancies.

Sir Lionel (Henry) Lamb, KCMG, OBE, a former Ambassador to Switzerland and Charge d'Affaires in Peking, died on July 27 aged 92. He was born on July 9, 1900.

LEO Lamb spent 30 turbulent years in China, spanning the Japanese invasion, the Korean war and the communist revolution, but the greatest person-al disaster to befall him was caused by a faulty Ministry of Works stove.

While he was minister at the British Embassy in Nanking in the late 1940s, shortly before Mao Tse-tung led the Communists to power, Lamb and his wife returned home from a diplomatic dinner to find their official residence in flames. By dawn, the building had been gutted, leaving them only the dinner clothes they stood up in. The governor of Hong Kong sent Lamb a sunt, and foreign diplomats in Nanking also helped out. Al-though the vintage cham-pagne in the cellars could be replaced, the same was not true of Lamb's priceless collection of Chinese art and artefacts - garnered over nearly three decades from every corner of the country in which he had served. It had survived the second world war and constant travel only to perish with

his home. Though the high point of his Foreign Office career was a five year spell as ambassador in Berne, it is as a sinologist that Lamb will be remembered. He was the son of Sir Harry Lamb, the leading For-

# **GRAND AYATOLLAH KHOEI**

Ayatollah Seyed Abul-Qasim al-Khoei, the spiritual leader of a majority of Shia Muslims died in Kurlah, Iraq, on August 8 aged 93. He was born in 1899 in Khoi, nian Azerbaijan.

GRAND Ayatollah Khoei was the most prominent Object of Emulation in the world of Shia Islam for the past three decades. As such, his writings and conduct were the stan-dard on which Shias were supposed to model their own lives. He was, however, a traditional figure, firmly believing in the need for the clergy not to become pre-occupied with temporal matters. Though activists inclined towards his activist rival, the late Ayatollah Khomeini of Iran, a majority of Shias are believed to have preferred his 'quietist" ways. At the end of his life, such was his importance that the leaders of both Iran and Iraq deemed it politically necessary to declare three days of natonal mourning to mark his death.

He was born into a family of provincial clerics in Khoi, in Iranian Azerbaijan near the old Russian border. At the age of 13, after a traditional education in Persian poetry and Arabic religious texts, he was sent to the holy city of Najaf in Iraq, where he spent the rest of his life. His subsequent education consisted of attending the lectures of prominent Shia clerics associated with the shrine of Ali, the first imam of Shiism, until such time as he was himself prominent enough to earn his livelihood from donations contributed by his personal

In the 1960s his fame as a teacher and sage spread outside Iraq and he was able to set up theological colleges and charitable foundations in a number of countries which, in return, attracted more followers and students to his door. In

Amjad Khan, actor, died

1943.

IN THE silver-screen city of

Bombay, insecurity is the norm, treachery a golden rule

and luck the only secret of

Amjad Khan's moment of

luck arrived in 1975 with

Ramesh Sippy's film Sholay, the greatest blockbuster in the

history of Indian cinema.

Arnjad played the role of a killer bandit, Gabbar Singh.

Never before had Indian audi-

ences seen such graphic

violence. The fascinating char-

acter of Gabbar Singh gave a

new meaning to the concept of villany in Indian films; the

villain was no longer a gentle-

man with wicked intentions

plotting against a gentle ro-mantic hero and vying for the

love of the heroine by foul

means. The new gun-wielding

villain was vicious and terrify-

ing, with no pretentions to being part of a civilised — or

corrupt — society.

Gabbar Singh was an instant hit. Sholay ran for five years in Bombay and still

shows to full houses. It influ-

enced the speech mannerisms

of an entire generation; every-

where in India, young men began to copy Gabbar Singh's catchphrases.

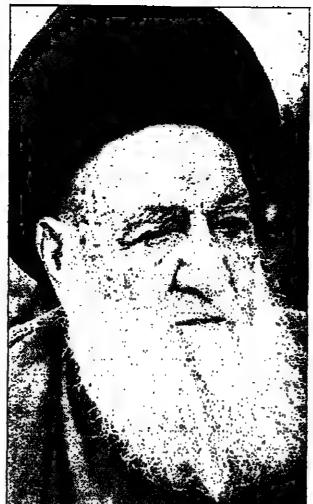

A generation later the lm-

age of Gabbar Singh still

haunts audiences. More im-

portantly, it continued to

haunt its creator. After Sholay, Amjad Khan was flooded with

1971, when the Absolute Object of Emulation of the time, Grand Ayatollah Mohsen al-Halim, died after some persecution at the hand of Saddam Hussein, the rising strongman of Iraq, Khoei was acclaimed his successor by a majority of the Shias.

The acciamation, however, was not universal and Khoei found a rival in Khomeini. The latter was, altogether, of another type of Muslim deric. Unlike traditional, quietist Shias, who believed that the Saviour, the absent Twelfth Imam, would only save the world if corruption became widespread, Khomeini believed in political activism to achieve justice. Thus Khoel never became an "absolute object of emulation", but the majority spiritual leader, while the young tended to graduate towards Khomeini.

During the latter's exile in Najaf from 1965 to 1978, the two men hardly met and were believed to have little warm feeling for one another. However, the traditional code of conduct between Shia derics

AMJAD KHAN

As Nabob Awadh in Ray's film The Chess Players

prevented them from criticising each other in public.

In November 1978 Iran's Queen Farah, travelled to Najaf to ask Khoei to make a gesture of support towards her husband's tottering regime. But, though Khoei did receive her he refused to intervene.

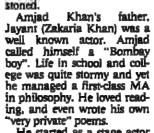

His policy of non-intervention continued with regard to the government of Saddam Hussein also, which was, in itself, regarded as a sign of disapproval. This was at a time when Saddam spent large amounts of money on Shia shrines and institutions to woo the majority faith of his country. However, the policy was accompanied by brutality towards dissident clerics, as exemplified by the executions of the ayatoliahs Mohammad Bager al-Sadr and Mehdi al-Hakim in 1980 and 1983 respectively.

Khoel was subsequently placed under close police surveillance until, at the height of Shia uprising in central and southern Iraq in the spring of 1991 after the last Gulf War. he appealed to the world to aid the Shias. The government ordered the arrest of over one hundred members of his family and staff and took him to a Baghad television studio. where he was seen to be receiving and praising the ruler. His spokesmen said that his relatives would have otherwise died. His eldest son and many members of his staff are

still missing.

The Ayatollah does not leave an obvious successor among the Shia clerics of Iraq. whose numbers are thought to have been reduced by the government from some 8,000 in 1970 to about 50 today. His charitable foundations are now likely to be wooed by the rulers of Iran while the foundations will search for another grand cleric in Khoei's quietist mould. The bulk of supporters live in Iraq, Pakistan, India, Afghanistan, Lebanon and east Africa.

# **ERIC ROBARTS**

Eric Kirkby Robarts former chairman of Express Dairy, died on July 30 aged 84. He was born on January 20, 1908.

ERIC Robarts and his family were pioneers in the modern system of milk distribution in this country, and, after the second world war, he played an important part in spreading the supermarket concept. Robarts was born over the family dairy at Northwood, Middlesex. However, his was

not a rags-to-riches story. His father was already a successful large-scale farmer on the Hertfordshire-Essex border who diversified into the then infant trade of milk retailing. Eric and his younger brothers, John and Norman, were educated at Bishops Stortford College. After a short period on the family farm, Robarts went on to Oaklands Agricultural Institute, where he was awarded a gold medal as top pupil in all subjects except. ironically, dairying.

When he left the institute at 17 he lived in lodgings, looking after two of the family farms and running the retail business. He would rise at 4.30am, milk the cows, bottle and deliver the milk and return to begin farm work. By 1930 the retail business

had by then grown to the point where a company, C. M. Robarts & Son, had been formed. Demand was so great that the firm was dependent on outside supplies of milk to supplement those from the family farms.

During the second world war, Robarts was heavily involved in the local agriculture committees to ensure that food production was maximised. However, as part of that effort, the government was also keen to rationalise milk distribution. Consequently, in 1942, Robarts accepted an offer for the family firm from Express Dairy, to which he had previously given first refusal in the event of a rival bid.

Five years later Robarts joined the Express board, becoming managing director in 1960 and chairman in 1967. He was an early postwar visitor to the United States to study the then novel supermarket style of food retailing. This was a potentially im-

portant outlet for milk, so Express formed Premier Supermarkets and established a chain in south-east England. However, the operation was limited by today's standards. The supermarkets rarely exceeded 5,000 sq ft, whereas 40,000 sq ft is common today. Furthermore, instead of concentrating on retailing. Premier drew supplies from its

own market garden. Express also diversified into hotels, and this may have brought it to the notice of the acquisitive Maxwell Joseph. the late chairman of Grand Metropolitan, which was also a large customer of Express.

In 1969 Joseph made a £32 million takeover bid for Express, having secured the right to buy a controlling 70 per cent of its preference and voting shares. Robarts fought the bid, promising to enfran-chise non-voting shares in Express if Grand Metropoli-

tan were defeated, but the gesture was too late. However, Robarts stayed on as chairman for four years before retiring at 65.

Away from work, Robarts's great love was horses. He was either buying them for his business before the war, or he was riding them as chairman of the Vale of Aylesbury hunt. He once landed at Southampton after a trip to Australia and was in the saddle before midday. He apparently fell off a few minutes later.

Robarts was a member of the Worshipful Company of Farmers and a Freeman of the City of London.

He is survived by his wife. Lucy, and five daughters.

## when flying solo in 1937. THE DUCHESS'S FLIGHT

The Duchess of Bedford reached Croydon yesterday afternoon after completing a flight to and from India by daylight within eight days, and was cordially cheered by a large crowd which had ssembled to witness her arrival.

On Friday morning last week she left Lympne aero-drome in her Fokker mono-plane and reached Karachi on Monday evening, the journey having occupied three days and nine hours. On the following day the return journey was begun at dawn and was completed after a flight which occupied three days and about 13 hours.

The flight outward was made

in four stages, the stopping places on the way being Sofia. Aleppo, and Bushire, and between 12 and 16 hours were spent in the air each day. Captain C. D. Barnard was the pilot, and with him as relief and mechanic was Mr R. F. Little. At the close of the flight each day a considerable time was occupied in refuelling and respection in readiness for an early start on the following morning, so that the hours of daylight could be fully utilized for the journey. The same procedure was followed on the return journey, during which the stopping-places were Bu-shire. Aleppo and Sofia. Yes-

terday a start was made from

Sofia shortly after 4 o'clock in

the morning. The weather was unfavourable during the latter part of the flight, but the scheduled time during the homeward as well as the outward journey was well maintained. It had been announced that the Duchess of Bedford would

reach Croydon about 5 p'clock.

crowd began to gather at the

landing ground. A message was received shortly before 5 o'clock that the aeroplane had been sighted at Lympne. At half past 5 o'clock it approached Croydon, and the landing was rapidly made. The Duchess of Bedford stated that she had had an excellent journey and that she was greatly pleased with the achievement. The machine in which the flight was made is now named The Spider, but it was formerly known as the Princess Xenia. Captain Macintosh made an unsuccessful attempt to fly the Atlantic in it, and later, with Squadron-Leader Hinkler, endeavoured to make a non-stop run in it to India, but after being in the air for 24 hours he was forced to land in Poland. Later still another attempt was made to fly to India in this machine, but it failed owing to engine trouble. The bought by the Duchess of Bedford, who had it thor-

oughly overhauled. Our Aeronautical Correspondent writes:-The Duchess of Bedford has carried out a useful demonstration of the speed of air transport, and, of course, its value

lies in any future application to

air-mail communication. The type of aircraft the Duchess of Bedford used is a single-engined Fokker monoplane, and is not suitable for carrying his Majesty's mails, as any regular service must be assured against forced landings, and to do this multiengined aircraft are needed. The Spider would probably carry about 500lb of mail, but for any effective establishment of rapid Empire air mails special types of air-mail carri-ers must be developed.

## Nature notes

# Foliage and fledglings

THE thick foliage is full of bird families, and the thin. insistent calls of the fledglings. In hawthorns and sallows, there are willow warblers, garden warblers, and blackcaps. In taller trees, especially the limes, there are chaffinches, great rits andspotted flycatchers. Occasionally they fly out in pursuit of an insect, but mostly they forage in the dark depths of the branches.

The last of the summer singers are yellowhammers. wrens and woodpigeons. The woodpigeons have a practically invariable song of short and long cooing notes, which (s, could be represented as "take two books with you, take two books with you, doit" - the iwo books, being the most emphatic notes.

Hogweed flowers have turned into large heads of brown flat seeds, and their yellow. place has been taken by the

ica. But the angelica flowerheads are rounder, their stalks are pinker, and the leaves start like white. bowls cupping the stem, then turn into frothy, fern-like outgrowths. Comfrey flowers are fading, but the leaves have grown into big. dark green fountains. White melilot, or Bokhara clover, is in bloom here and there on roadsides: its flowers are arranged in a ladder, like those of the common melilot, but

somewhat similar wild angel-

they are creamy white, not

Serbian television has been proadcasting pictures of the detention centres in Bosnia that resemble holiday camps. However, the inmates, when asked by Serb journalists whether they are being held in "concentration" camps, say no but add that they would prefer to be set free.

The leaders of the Bosnian Serbs have issued a list of towns and villages where they claim arrocities have been committed against Serbs. Belgrade Radio has claimed that 3.000 Serbs in Konjic have been exposed to torture. rape and murder, adding that the West continues to ignore the way in which the Muslims are treating Serbs.

Letters, page 11

property which have been used to plan the new tax.

Valuation experts said last night that the valuations could further undermine the already depressed housing market when they are released in November, as mil-lions of people will discover their homes are worth even less than they thought.

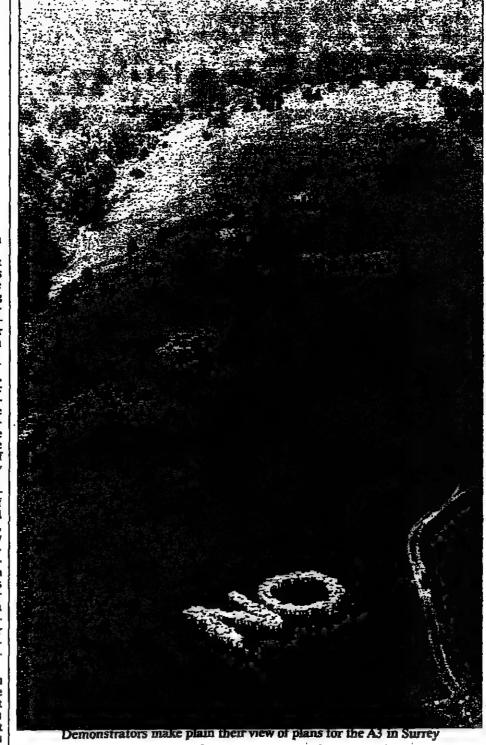

Colin Farrington, director of the Institute of Revenues. Rating and Valuation, said: These figures will add a further downward twist to the housing market which is re-garded as a barometer of the economy. The valuations are based on April 1 last year, if prices were this low then they must be even worse now."

The government issued figures for the proportion of properties it believed would fall into each band last year, but the valuation results show that civil servants have overestimated the value of property. Calculations based on 1991 council spending levels

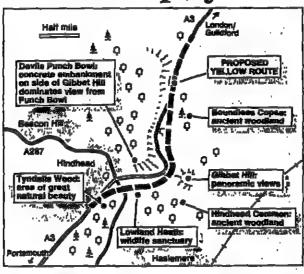

suggested that the charge for properties in band D - which would be used as the benchmark, with higher and lower bands expressed as a percentage of the band D charge would be about £400 a year. Band D runs from

government estimated that £68.001 to £88.000 and the per cent of properties would fall in that range, but the valuation office figures show that the average value property would now tall into band C (£52,001-£68,000). Mr Farrington said: "This is going to lead to some fairly fundamental rethinking of the assumptions that underlie the government's plans for the Council Tax. The implications for the property market are serious, but the effect on bills next year could also be

But the environment department said:"The average value is still around band D It does not affect the amount of money to be raised by the tax. "The valuations reflect prices at 1 April 1991 and since some commentators will argue that prices have UN accord, page 9 not be argued that banding

# Protesters play Devil's advocate

"NO" to plans to carve a road through the Devil's Punch Bowl in Surrey. They held up yellow placards as a chartered helicopter hovered over the valley at Hindhead. Surrey, before flying off to take photographs of the pro-posed "yellow route" for a new section of the A3. # Spaniards' golden tribute to their king

Continued from page 1 rallied his country. "You couldn't imagine one of ours having this kind of effect."

having this kind of effect.

Comparisons are perhaps odious, because Juan Carlos and Queen Sofia enjoy a special status as symbols of their country's stability since it emerged 17 years ago from the shadow of Franco. A respect for this role prevents the Spanish media from taking the aggressive Fleet Street approach to monarchs, priapproach to monarchs' private lives. In June, when Don Juan Carlos, as he is known, spent a mysterious week in Switzerland, local press speculation was muted. For a British royal the occasion would have been a press-feed-

ing frenzy.

However, beyond the circumstance of his rule, the king has earned great admiration for the masterful way he has presided over the transition to democracy. Barcelo-na provided a good example of the unifying power he wields against the nationalistic emotions of some provinces. Catalonía in particular By starting the games first in

the Catalan language, the king defused local tensions.
For non-Catalans, who were initially annoyed by the way local nationalists seemed to have hijacked Spain's games, the royal presence stood for Spanish unity. As a sign of the king's understanding, locals tell of the instruction he is said to have given Prince Felipe when he sent him to learn Catalan. The main rule of being Spanish king, he said, is "take good care of the Catalans".

The king's disarming hulor mality was visible for every-one. Dressed in stacks and open shirt, he seemed posi-tively ordinary alongside the regal style of Juan Antonio Samaranch, the IOC chief. If there was any royal pomp at the games, it has been focused around Senor Samar anch, from his escorted motorcades to his choice of words when talking of the "audiences" he has accorded such fellow monarchs as Magic Johnson, the basketball star. Other members of the royal

family have been as informal as the king. The infanta Elena could, for example, be found queuing up along with the public to get into the

# Olympic sketch

# A woman's place is on the podium

Lindividual, nor a nation, nor a team that stays with us as the abiding memory of the 1992 Olympic Games in Barcelona, it was a sex. The Games were stolen, and for the first time, by if you like, 50 per cent of the human race. This was the first real women's Olympics in history.

As ever, the greatest mo-ments came in the athletics stadium. And day after day, the best, the most exciting, the most watchable and the most satisfying competi-tion took place in the women's events. Women's track and field

has been threatening to do this for years. But, rather like women's tennis, it has failed to provide consistently the intensity of competition you regularly find in the men's game. The odd aberrations, when women's athletics has taken centre. stage, have had more to do with soap opera than true-sport, the obvious example, being the Zola Budd-Mary Decker ghastliness of a few years back.

"Women's races are nev er really tactical, because they are never really com-petitive," one athletics writer said to me a few years back, and he was largely right. But it was the overwhelming competitiveness of the two longest races in the 1992 Games that remain in the mind Odd to think that women did not run the Olympic marathon till 1984, and did

tot run the Olympic 10,000 metres until 1988. The marathon was infor-gertable: the two women toiling up that dreadful sun-blasted hill to the finish, and duelling over every yard of it, swapping the lead again and again. It was astonishing stuff every time one looked finished. she came back again; every time one had the race sewn up, the other passed her with yet another rush of strength and courage. Finally, Valentina Yegor-ova of the Unified team pre-

vailed over Yuko Arimori of Japan. Once over the line, the two embraced, sobbing. and even the men of the press box were suspiciously misty-eyed. It was, to put it simply, tremendous sport. There are few spectacles as simple or as satisfying as

But perhaps the 10,000 metres was still better. That

In the end, it is not an gan, the Brit tipped for gold, was left back in the pack, in the wake of the fight between Elana Meyer, a white South African, and Derarta Tulu of Ethiopia.
Tulu, finding 100 degrees
or so a touch parky, kept
her T-shirt on. She looked the coolest lady in the stadi-im. The way Meyer broke the field, and with it Me-Colgan's hopes, was one of the bravest moves in the Games. The way Tulu stayed with her, lap after lap until the last, was one of the coolest. At the bell, Tulu surged away and won as she liked, still looking

amazingly fresh.
The women took their lap
of honour together, white
South African and black Ehtiopian. Meyer, in a stroke of tact that amounted to genius, draped herself not in the banned tricolour of South Africa, but in the Oympic flag. Sport provided us, not with the illusion that all is right with Africa and the world, but with the truth that even in the most terrible and complicated situation, there is a flicker

But there was one more woman to add hope and inspiration to the Games: perhaps the hero I have been looking for throughout the enthralling fortnight in Barcelona -

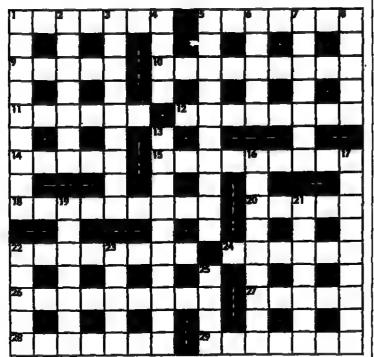

Hassiba Boulmerka.
This was yet another African woman: but from the north: a Muslim from Algeria. She cannot train in her own country because of the violent disapproval of fun-damentalists, but she won the 1500 metres in devas-tating fashion. It was a per-formance that radiated strength, It was, somehow, a performance of particular physicality. Some athletes glide across the track and seem scarcely to touch the ground: Boulmerka muscled her way through the air, shouldering the stuff aside and hammering her my around the stadium

She radiated physical and mental strength. Eyes blazing biceps pumping, she ran as if she were squashing myths and archetypes with every stride. She has given her country, her continent and her sex semething to cheer about. As the dust settles in Barcelona, I would like to add my own cheers: for Africa, and

KEEP PACE WITH TH

MONDAY AUGUST 10 1992

# The reign of Spain is mainly down the drain

The package holiday is alive and well, but the average British tourist is demanding more excitement and exotica than the

tired and shabby costas can offer, Paul Barker reports

hey were the world's first terrorist group that specifically targeted tourists. iembre" - the Nights of December bombed and stabbed and murdered, often in horribly ingenious ways, such as suffocating a visitor by pushing a souverir toy alligator down his throat. They were led by a renegade Miami newspaper col-umnist who had tired of writing about the supposed whims and charms of Florida. Tourism, he argued, corrupted local life.

Yet British package tourists have been pouring into Florida's Disney wonderlands and on to the beaches of Fort Lauderdale and Sarasota. They have only dodged the terrorist backlash because, fortunately, Las Noches de Diciembre is, so far, fictional. Carl Hiaasen created them in his black-humour thriller Tourist Season, (Hiaasen is bestknown for another title, cited by Chris Patten when Tory chairman: Double Whammy).
All the same, Thomson, Airtours

and the rest should be wary. If you want to peer into the future, fiction writers can be better prophets than facts and figures, which are always based on the past.

In their new special report on package holidays, Mintel, the market analyst, tries to keep the business's pecker up. It noted that the "post-election boom did not materialise", and that this year, many major tour operators turned once again to discount practices" which they had tried to give up. They just ended up cutting one month's collapse of Land Travel

The Mintel report recognised fears that the business is in terminal decline", but recknned there will always be a demand for package trips, of some sort.

The traditional trips, however, were themselves based on a fiction; an American dream invented in France in the 1920s by Caresse and Harry Crosby and taken up by their friends, Zelda and Scott Fitzgerald. Before them, no one who was anyone ever went to the hot Mediterranean coast in the

Vulgarised, it became the brochure-writers' glossy dream of Sun, Sea, Sand and Sex. It followed the rules of what the sociologists, Michael Young and Peter Willmott, call the Tocqueville Effect, which lays down that "what the few have today, the many will demand tomorrow". From the 1950s on, it was packaged, and sold, at Benidorm, Torremolinos

and Malaga. Now — in its original form at least — the business is inexorably on the slide. According to Mintel's latest count — that for 1990 — Spain had lost almost a third of its package business in the previous four years, although more Britons (2.816.000) still went there than to

Looking back to those early days of chartering boisterous Brits into

Franco's cloistered Spain, Edmund Swinglehurst of Thomas Cook, the firm's archivist, says modern tourism "has changed the world for the better". For one thing, it helped bring Spain into modern Europe. "A thousand people arrived on the

coast. Those wild Englishmen, doing what they wanted, loosened the place up. They asked the waiters why they worked a 16-hour day. Young Spaniards' ideas changed. The institution of chaperonage disappeared."

But Spain was a country aching to get away from its past. Will it be new goods to sell, the package operators delve further and further into the third world. Where the tour guide leads, can Las Noches de Deciembre be far behind? In the Gambia, package tourists live an isolated life. "Intrepid spirits go to the souk - once. They return rather shocked," Mr. Swinglehurst says. Rosemary Astles, the marketing director of Thomson Tours, acknowledges that the civil unrest in Kenya "is a little bit concerning".

ven Spain finds itself with an unhappy inheritance: mile upon mile of shabby 30-year-old hotels nobody wants to stay in. You can't understand this without looking at the social history of Britain. Once, the hotels seemed grand by comparison with the homes most people lived in. But now, it's not the same thing at all.

British resorts such as Blackpool they were by the Holidays with Pay Act of 1938. After the war, higher wages and union-negotiated holidays of a formight or more crippled British resorts. Ordinary families could go further, and stay longer.

Now it is the turn of Spain (and the Algarve and Italy's Adnatic coast to suffer from social change. The British have grown bolder. They don't need so much nannying. They don't mind going out into the local food shops. They can even cope with the French.

Airtours, the fastest-growing package firm, has gone successfully into the French gite business, with self-catering. Last year, a readers'

survey by Holiday Which? rated Airtours "the worst operator overall". But the firm floats above all that. Founded by David Crossland, a former travel agent, it is run from Rossendale, in the Lancashire Pennines. Airtours now has 13 per cent of the package business. (Thomson leads, with 32 per cent.)

Now the aim is to offer pe that seem more individual ("be-spoke travel" is the phrase), and offer what Ms Astles calls "a bit of adventure in a very safe fashion".

When, in 1950, Maurice Herzog climbed Annapurna I (the world's first conquest of an 8,000m peak). he made his way to base camp up a Nepalese vailey where no one spoke English, religion ruled and modern medicine was absent. It was, he wrote, like going back to the Middle Ages. Now, little more than generation on, you can buy hamburgers and pizzas at local travel-lodges. Travers Cox is an Australian one-time backpacker whose firm. Explore, based in Aldershot, Hampshire, packages 'exploratory holidays" for small groups. The Sherpas who ease you along that same valley, on Mr Cox's "classic Nepal trek", could be the sons and grandsons of Herzog's guides. Spain, in Mr Cox's packag ing, means a hike in the foothills of the Sierra Nevada. This year, Explore will shepherd about 10,000 people to its far-away places with adventurous-sounding

Chesp air travel is what drives package tours. No one drives as Mr Cox used to. Maurice East. of Eastcastle management consultants, advises travel firms on their business. "It grows, or doesn't grow, because of cheap seats. They are the only essential. If millions of people start going to the Falklands, you'll know it is down to empty seats. You can always find cheap beds. Growth in Florida was all about the weak state of the North Atlantic market for scheduled flights. Planes were flying halfempty out of Miami." And why the Gambia? "British

Caledonian won a route to the Gambia," Mr Bast says. "They started it for commercial reasons -

Tourism's trail-blazer: Alan Whicker's latest television series deals with the ultimate package tour, taking in the Great Wall of China

Airways, once you got a route, you kept it. But not enough people

wanted to go.
"So British Caledonian built two hotels to fill seats up. It went on from there. It was slightly exotic. An outpost in Africa. In the Gambia, you had black people doing their tribal dances, as opposed to less-black people doing other tribal dances in Spain."

Destinations grow ever more exotic. Thomson has plunged into "Weddings in Paradise": 4,000 couples a year now go to places such as Bali or the Seychelles to get married. Thomson packages 1,700

proof of decree absolute.) It has been known for a couple to decide to call it off once they've got there. But Ms Asties, at Thomson, thinks it hasn't happened to one of theirs. "You can get enough arguments beforehand, though, for you to wonder if it will ever happen." No

refunds for non-nuptials. Social history strikes again. Britain is now predominantly "a property-owning democracy". The Conservatives launched this political siogan in the mid-1950s, simultaneously with the early package tours. Mrs Thatcher drove it home. One effect is to spread ever wider what Mintel calls "the windfall of inherited wealth". One way such windfalls are spent is on fancy

The last word in fancy holidays is currently being celebrated by Alan Whicker, in four programmes (the last is on ITV this Friday at 9pm) called The Ultimate Package. He went on Thomas Cook's 150th anniversary round-the-world package last autumn: 87 travellers paying £21,000 a head.

They went to every "trophy destination," in Mr Whicker's words, from the Pyramids and the Taj Mahal to the Great Wall of China and Easter Island. In Peking's tragic Tiananmen Square. one couple is delighted to find that you see "not a piece of paper, not a bottle top, anywhere". On Easter Island, there is a murmured feeling

drilling for oil or building a port. In certificates and, if appropriate. Tahiti, the hosts (as befits respectclothes on. It is the visitors who imitate Gauguin postcards and

> bare their breasts. For the time being, Spain is still top package. But the graffiti is on the wall. Package people want a change, even if it is only a smallish one. Cyprus, not long opened to charter flights, is the Med's rising star. (Greek Cyprus, that is: if you want Garboesque solitude, find your way to the Turkish side.)

It is a funny moment for the BBC to pick southern Spain as the right place for a soap opera. But, contemplating present trends, I have a suggestion for its scriptwrit-

taking out workers who were of them. (Don't forget your birth that Stonehenge is just as good. In ers. They should not try to squeeze Eldorado into a portrait of life minute social problems. There is better bet. Unwittingly, the BBC has got in on the ground floor of a new nostalgia market: more Coronation Street than EastEnders. This is the way it was, don't you remember, when we flew from Luton with Mum and Dad? Spain is how fings used t'be.

1 the

le re-

OFFICIAL figures show that the number of holidays taken abroad by air, and including leisure travel bought direct by the customer, rose to a record 12.6 million in both 1988 and 1989 then dropped back to any other country. 11.4 million in 1990, to 10.5 million last year and

through travel agents is more difficult to estimate. The best indication is that in 1982 a total of 4.85 million package holidays, bought through travel agency brochures, were sold compared with an estimated 7.7 million which will be sold this year.

# should be up by between five and seven per cent this Let's take compassionate-leave-of-our-senses

istless, dejected, fed up? Back from holiday and hating it? Or worse, are you sharing an office with someone who has just had his three weeks in the Dordogne and now sports a glowing, carcinogenic suntan and an expres-sion of intense sullenness? Take heart. I offer you, free of charge, the Cliff Wright Solution.

Mr Wright, now honourably retired, used to be the chief engineer at Radio Oxford, and as such he had a good deal to put up with. Upon BBC local radio engineers falls the task of absorbing and buffering the tensions and shocks which occur when engineering facts meet creative ideas, feasibility clashes with the urgent dreams of newsmen, and middle-aged engineers in ties who enjoy Nevil Shute confront illiterate juveniles with their knuckles brushing the ground

We all brought our little troubles to Cliff and his colleague Derek: when the Radio Car broke down during an interview about the Watchfield Free Festival, with Aircy Neave MP and a hippie organiser Stranded in it; when Magdalen College Tower required 150tt of cable dangling down its ancient ides to convey the dawn carols on May Day, and the cable then

and when a circus bear ate my microphone windshield. Usually, they kept smiling. But once Mr Wright had a long-

service sabbatical and went away for several months. When he came back, he looked around with some distaste and formulated a principle I have never forgotten. There ought to be a rule," he said. "When you get back to work, you should be entitled in your contract to one full day's sulking for each week you've been away."

It was brilliant. Think about it after a long weekend you could legitimately remain dopey and unproductive until Tuesday midday (you will anyway, so you might as well have it as a right). After a formight off, you need barely speak to your colleagues until Wednesday. After a month, you get four days' recuperation when your mind can be visibly elsewhere, your lunch-hours evasively lengthened and your telephone callers fobbed

off with impunity. After maternity leave you would have a full fortnight in which to behave as badly as you wish. Just think of it none of that showy dynamism and brittle pretended enthusiasm, none of those tight Lycra skirts to prove to the boss you am't a back number yet. You could began picking up World Service, stick with your floral sacks, riffle **WORKING LIFE** 

Libby Purves points out the wisdom of

through beloved photographs all day with favoured colleagues, shove the URGENT pile into the drawer and lope off home to the baby at four-fifteen, without even bothering to mutter some fie about a dental appointment. And nobody could interfere with your legitimate sulking-period. But when it ended you would be expected to snap back into full productivity, willingness and

into employment law, this compassionate-leave-of-your-senses. because few of us come back from holiday entirely normal. Nor is it a charter for lead-swingers and idlers, because in fact the habitual idler comes back more predictable - still idle and sulky - than the dedicated worksholic. Everybody has higher expectations of the latter, but the fact is that once a conscientious, nitpicking office worrier does actually succeed in switching off (and it can take days of pacing the beach sands worrying about the restructuring of the Middle East branch), it is equally

difficult to switch him on again. He - or she - looks at the same worn carpet, the same peeling yearplanners, the same telephone grimed with the panic grip of old deadlines, and feels the creening horror of an addict looking back on his old degradation. The sight is about as welcome as handcuffs to a freed hostage, or a full ashtray to a reformed smoker. When you have been another and younger man, or a happy and carefree woman for a fortnight the very sight of the office can hit you like a physical blow. You get over it, and shrug on the old yoke eventually with resigna-tion, but it takes time. Sulking time.

They really might as well write it trauma leave? You are in grief,

mourning your holiday self. Perhaps they should also hand out a few little texts to read during the days of yawning. There is a very splendid one from Jonathan Gathorne-Hardy quoted in the new Chatto Book of Office Life.

Mr Gathorne-Hardy says, "that they will be in an office all their working lives. For 45 years. Secretly they believe something will rescue them — a football pool. arson. 'I'm sorry, sir. Yes, completely burnt to the ground. As you see, sir, just a gaping hole. Not a hope of it starting up again, I'm airaid. All the files gone, the records - the whole Board consumed in the flarnes too. I'm afraid. But I understand they were well insured, very well insured. Compensation should amount to three-quarters full salary for the rest of each employee's lifetime. Yes, quite sure,

Sharing this fantasy unhindered. just for those few sulking days, might make all the difference. Then the blazing holiday light will pale, the office furniture cease to look so like a rack and serew, and the returned solker turn into a reasonably committed colleague again. It is Wright's Law. Let it be So why not make it official, like recognised.

and the second and the second and the second second

THE PAINTED NUDE: Up until the time of Eth in the early 19th century the nude in Britain was often a subject from classical might or a Biblical story Gradually the nude in penting became accepted in its own right — it can be the major preoccupation of a painter such as Lugan Freud without raised eyebrows. ## THEATRE

# Vain attempt to better the Bard

HERE is a conundrum. Which Shakespeare play does the eminent Romanian director, Alexandru Darie, have in mind when he writes in the Oxford Stage Company programme that "it portrays a world of conquerors and conquered where passions and aversions are strong: a world without borders or barriers that lives its short but strong life between two wars, a world of spies and cheating, of whispers and loud laughter, of vulgar military jokes and essential rituals"? No. sorry, not Hamlet, nor Coriola-

nus, nor Cymbeline. You are stuck? Here is another clue. The play is "particularly relevant to the state of Europe and the world today as, like the characters, we cannot escape from the tensions of conflict but nonetheless desperately seek happiness". You give up? Well, the title on the programme is Much Ado About Nothing, and the events on the stage sometimes bring that play to mind. Yes, Much Ado must be the answer.

Perhaps the references to conquerors, conquered and two wars confused you, as they did me. But Darie has made up for Shakespeare's deficiencies in several ways. First, he opens his production with the battle in which Don Pedro, Benedick and their comrades have just triumphed. This is a bloodthirsty affair in which a figure remarkably like Tony Forsyth's Claudio cuts the throat of Don John's sidekick. Borachio, and Karl James's Borachio is then resuscitated, complete with scar and nihilistic smirk, by a woman witchdoctor identified in the cast-list only as "Angel".

That is rather odd, not least because

**Much Ado About Nothing** Oxford Playhouse

Transfer and Trans

Claudio, John and Borachio are supposed to be fighting on the same side. But Darie has only just started. Jan Alphonse's Angel often appears in her white-and-red robes. Indeed, it is she who, quaintly mistaken by the other characters for a Sicilian Friar sings African chants over Diane Parish's poor rejected Hero, pouring gold dust over the girl's prone body and ritually washing her limbs as she does so.

The Angel is also there at an ending in which the line "your brother John is ta'en in flight and brought with armed men back to Messina" is transformed to "your brother John has turned his flight and brings armed men back to Messina". The Bard may have thought the play ended happily, with the arrest of the villain who badmouthed Hero to her fiancee Claudio. Darie knows that this is Europe, and even in Shakespeare's most amusing comedy civil war must be in the offing.

But is it Europe? Here is another oddity. The set, all looming timber and brightly coloured drapes, sometimes resembles a Turkish harem, and the costumes might be summed up as Africo-Asiatic-Ruritanian. Hero's first, failed wedding combines antique Japan with Peking Opera, and the guests at her second, successful one seem to be Greek freedom fighters. Her maid, Margaret, enters wearing billowing pantaloons and a ballet skirt and smoking a pipe. The love of Marie Francis's combatively Irish Beatrice for

Simmons and Francis: oriental chesspiece and beribboned maypole

James Simmons's edgy English Benedick might at one point be the love of a beribboned maypole for an oriental chesspiece.

Amid all this sumptuous display even Darie's attempts to italicise the play's cruelties get lost. So do wit, fun. narrative clarity, the exploration of character and relationships, and, for all the cast's efforts, interesting acting. This is a touring production, due to visit (among other places) Arundel, Crawley, Kuala Lumpur and Tokyo after it leaves Oxford. Fine - but should it not be marketed as some other play?

BENEDICT NIGHTINGALE

## DANCE

# **Eager for** experience

Romeo and Juliet Covent Garden

ONE thing I find hard to believe about Altynai Asylmuratova's Juliet is that she would still be playing with a doll. even before first Paris and then Romeo come courting. This is a girl ready and eager for experience, who seizes love with both hands when it comes.

Thursday night was her first performance in MacMillan's version of the ballet, and once she had put the toy aside she was convincing in every detail. She makes the character come alive by the way she inflects her the manner in which she picked her feet up so high as she stepped forward when forcing herself to pretend to agree to her arranged marriage, also the long, yearning line of arm, body and leg as she reached towards the absent Romeo before collapsing from the potion.

Zoltan Solymosi as Romeo was also

sexual tension.

and fluidity of form.

new to this production: presumably the character interests him more than Solor did in the recent La Bayadere because this time his acting was lively and impetuous. He makes Romeo a humorous fellow at first (I liked the little strum on his mandolin as Rosaline goes marching off), then deeply committed. There is a wildness about his dancing which suits the role

A matinee cast with Bonnie Moore's waif-like Juliet (her first in Britain) and Bruce Sansom's neat, eager Romeo was greeted by a cascade of flowers. But dramatically this performance was eclipsed by the high-powered evening

Now the Royal Ballet's summer season is over, having concluded with a flurry of new casts in a few old ballets. But in spite of employing both a principal choreographer (MacMillan) and a resident choreographer (David Bintley), it managed only one creation year, and has announced only one for the whole of next year. If this conservative policy filled seats, one could understand it: but too often lately it has not done so. There is a problem for the management to think about during their holidays.

## **PROMS**

# A universe in sound

BBC SSO/Maksymiuk Albert Hall/Radio 3

AFTER their pale performances in the previous evening's Promenade Concert, the BBC Scottish Symphony Orchestra hauled themselves back into form playing music of the kind that was always likely to help them to do so. They began with the busy textures of Mussorgsky's Night on the Bare Mountain, heard in the 1867 version rather than in Rimsky-Korsakov's bastardisation. This piece might not be the most soul-searching or even the most grippingly dramatic music orchestra on its mettle. Jerzy Maksymiuk and his charges thoroughly enjoyed the diabolic romp. Limbs and minds thus loosened, they then progressed to deeper things.

Lutoslawski's Livre pour orchestre. composed in 1968, stands as one of this composer's finest achievements. JOHN PERCIVAL | An essay in tension and release and in

unifying the diverse, it accumulates different types of sound. Instinctively dramatic and immediately attractive the work was given the keenest of readings, and it was well received by the large audience; perhaps we really are catching up on the music of our own century.

Though probably more popular. and composed far earlier (1924). Sibelius's Seventh Symphony demands more from the intellect, because it deals with huge, "cosmic" matters in an innately spacious language which is used with the utmost economy. Not a gesture, not even a tremolando accompaniment, bears the remotest taint of superficiality. Maksymiuk and the BBC SSO concentrated hard, and the piece unfolded unhurriedly which helped reconcile its awesome universality and its intimacy. Perhaps Rachmaninov's Fourth

Piano Concerto was not the ideal work Demidenko gave an exciting yet poetic performance complemented by an alert orchestra. Surely not even the most bureaucratic of the BBC's schedulers would have resented him his encore. Rachmaninov's G minor Prelude, Op 23 No 5.

STEPHEN PETTITT

## PROMS: ALBERT HALL/RADIO 3

# Visitors well in front

Bartók's lean, Classical textures are shot-through with glittering brass calls or eerie sibilant timbres from the percussion department, all of which emerged with striking clarity.

Even more notable was the brooding Adagio, whose mysteriously weaving fifths and sinister drum rolls, like some dragon lurking in the Wagnerian forest, conjured an atmosphere of extraordinary expectancy. So muted was the body of strings at one point that every ear strained to catch the thread of sound. thread of sound.

The playing of the CBSO here, as in Jeux and in Mahler's Blumine movement that opened the concert, was beyond praise. The garland of the title

was woven by players in all departments — including an impeccably controlled trumpet solo — with a delicacy that took the breath away. When the CBSO play like this, the gap between them and the top London orchestras seems narrow indeed.

Not only does Stravinsky's Rite of Spring no longer shock - not in the way it did at the notorious premiere in 1913 - but it is now standard fare for a popular Saturday night concert, it seems. As the second half of the programme with Mozart (Magic Flute Overture) and Beethoven (Violin Concerto), the Stravinsky was received as attentively and rapturously by a packed hall as was the first half.

A large part of the attraction, no doubt, lies in the virtuosity it demands from players and conductor alike. The BBC SO under Gianhigi Gelmetti took the work, as one would expect, in their stride. But for all the fierce cacophony of brass, with bells raised, of shricking wind and grinding disso-nances, the only excitement was that engendered by sheer volume. With true rhythmic drive lacking, the raw vitality and barbaric aggression of the score were given only half measure.

The Beethoven concerto was similarly disappointing, with neither conductor nor soloist (Frank Peter Zimmermann) managing to kick any rhythmic life into this old war horse, let 👸 alone offer any new insights by way of interpretation. It was a smooth, competent performance, but hardly a remark-

adaptation for Venice

## FOR six weeks starting on

October 2. Nomingham is hosting its fourth arts festival, with 23 premieres and live performances spanning the disciplines of dance, theatre, film, video, visual arts and music.

Among the dance high-lights will be the Cholmondeleys in Walkle Talkie, and Belgium's Wim Vandekeybus. Ralf Ralf and Dogs in Honey are to present two of the 12 new theatrical works, while the most bizarre offering has to be Vinyl Requiem, a "scratch orchestra" of over 40 vintage turntables and hundreds of gramophone records. Details on 0602 419419.

ARTS BRIEF

producers in the history of musicals, Cameron Mackintosh, is to receive the Richard Rodgers Award for Excellence in Musical Theatre. The award, established by the families of Richard Rodgers and Oscar Hammerstein II in association with the Pittsburgh Civic Light Opera, goes to the British impresario for his unparalleled success in the production of musicals that have become hits around the world, among them Cats, Les Misérables, The Phantom of the Opera and Miss Saigon.

Mackintosh currently has eight shows playing in more than a dozen languages in 44 countries. Five of his productions are running on Broad-way and in the West End simultaneously. The award is to be presented in Pittsburgh on October 16. Previous winners include the director Harold Prince (Cais, Les Miserables, Phantom of the Opera), and the actresses Julie Andrews and Mary Martin.

tion of Virginia Woolf's novel Orlando will be the sole British entry among the 19 films competing at the Venice Film Festival, which runs from September 1 to 12. Our jury representation is stronger: the team of seven includes Sheila Whitaker, director of the London Film Festival, and the writer Hanif Kureishi, as well as the Irish director Neil Jordan. Others competing for Venice's Golden Lion include Zhang Yimou's The Story of Qiu Ju, Bertrand Tavernier's L 627, and new films by Otar Iosseliani, Agniezska Holland and Brian De Palma.

# Hidden depths beneath Swan Lake

This year's Edinburgh Festival, which begins on Sunday, offers an important platform for reassessing Tchaikovsky's musical achievements, says David Brown

wo years ago we celebrated Tchaikovsky's 150th birthday; next year we com-memorate the centenary of his death. So it was an inspired idea of this year's Edinburgh Interna-tional Festival to place a special emphasis upon his music. Inspired, because 1990's gentle festivities may have primed our awareness that there is still much unknown, but Russian Orthodox mass, The Liturexcellent Tchaikovsky to be discovered; inspired, too, because by next year's festival we may well have had our fill of him (though, pray God, we may be spared the more fulsome which marked Mozart

True, Edinburgh is offering cycles of the familiar symphonies and piano concertos, as well as all the chamber music, among the 30 performances of Tchaikovsky's work. Yet how many music lovers are still little acquainted with the Third Concerto or that intriguing piece, the Concert Fantasia? And what about the original version of the Second Symphony ("Little Russian"), whose first movement is almost totally different from the familiar one, and which will be receiving only its second-ever professional performance in the British

How many music lovers for musicians, for that matter) know that Tchaikovsky wrote three cantatas, the first a setting of Schiller's Ode to joy, no less. Beethoven has no fear of competition from this one, and Edinburgh has tactfully passed it over. But we can hear the third, Moscow, written in celebration of the coronation of Alexander III in 1883, and will be able to discover a gracious, sometimes very beautiful 25-minute work which could usefully become an occasional piece in the programmes of our British choral

As for the rest (to pick only some of the larger plums), there is a concert performance of The Oprichnik, the third of Tchaikovsky's ten operas. and melodically one of his most cornucopian scores, and three recitals by Peter Donohoe including a healthy representation of the piano music - none of it Tchaikovsky at his greatest, but often very much better than our neglect of it-

We shall have the chance, too, of hearing the one act opers, Yolanta, and two-act ballet, The Nutcracker, performed as the double bill they were intended to be. And, at the.

gy of St John Chrysostom. Here, instead of the turbulence or even violence, melancholy or even pain, so familiar in some of his operatic and concert music, we encounter a spirit of mysticism, even a timelessness, that we might have suspected was beyond him.

Indeed, the very range of the prompt a reassessment of the man who created it, for no composer ever entangled his personal experience of life with his creative work more than Tchaikovsky did. Forty years ago, when I was a student, it seemed easy. Tchaikovsky was no more than a neurotic homosexual who poured out his inner woes unrestrainedly in his music, and perhaps felt better afterwards. He had a flair for good tunes, but was otherwise a bit of a simpleton in both his life and his work. And how wrong we were.

What turned the single volume of 150,000 words commissioned from me in 1975 into four volumes of 600,000 was the sheer range and richness I discovered in his music. and the complexity — and extraordinary attractiveness — of the man. No one was kinder, more generous in responding to any case of need; whether it was a student unable to fund himself (or herself) through conservatoire, a relative in difficulties; or simply a woman in his publisher's office whom he chanced to hear was in desperate straits.

More surprisingly, he could be very clear-headed, even wise. In his own life he may have made some appalling decisions — that, for instance, he could defeat his homosexuality through marriage, an experiment he ventured upon in 1877 and which drove him to attempt suicide. But when it was another's problem he was looking at, he was the most balanced of counsellors. generous in advice, and unstiming in giving of his own time. In 1883, when his eldest niece became pregnant and; on the pretext of needing a cure for drug dependency, was removed to Paris so that her parents would not discover the truth, it was

Living with a gun to his head: no composer ever entangled his personal life with his creative work more than Tchaikovsky did

the adoption of her son by a French

family, then supported the child. Most surprisingly of all, he was an excellent troubleshooter. In the mid-1880s, when the Moscow Conservatoire was falling apart through personality clashes and resignations, it was Tchaikovsky who was begged to spend days going round Moscow, banging heads together, persuading people to withdraw resignations, to accept redeployment. But for his efforts, the institution would probably have disintegrated.

nd all this kind of activity and involvement continued even when the de-I mands on him, both as composer and internationally famed conductor, would have made the burden of life almost intolerable for a lesser man. He travelled to the United States in 1891 to share in the inauguration of the new Carnegle Hall in New York; he came to England several times, the last in June 1893, only months before his acoustic of Edinburgh's cathedral during the last weeks, saw her death, to receive an honorary kovsky from becoming a public ship becoming public incredulous, will be sung his setting of the through her confinement, arranged D.Mus. from Cambridge Univer- acandal, and thus besmirching the Mooser had sought out the compos-

sity. Yet for all the strains these trips entailed, the impression he made as a person was always the same: "lovable", "endearing", "modest",

"courteous", "gentle". Nevertheless, within months he had died in circumstances that are certainly quite different from those officially promulgated. The story given out was that he had succumbed to cholera through drinking unboiled water. Few seem to have believed this, but the esteem and affection Russian society had conceived for him seems to have

resulted in a conspiracy of silence. The issue was raised again in 1979, when the Soviet scholar. Alexandra Orlova, emigrated to the West and smuggled out a story she had come across quite by accident in 1966. This told of a court of honour convened by some of Tchaikovsky's former school fellows from the School of Jurisprudence in St Petersburg (one of Russia's most prestigious schools) to prevent a homosexual liaison involving Tchai-

honour of the school. Tchaikovsky was summoned to appear, and after more than five hours of deliberations was told to go away and kill himself. Five years ago support for this story came unexpectedly from a

second, quite independent source, hether this really happened we shall probably never know. What does seem absolutely certain is that Tchaikovsky committed suicide. Many in the old Soviet Union had long accepted this privately, and only very recently corroboration came from a study made by the American scholar, Dr Mary Woodside, of the unpublished papers of Aloys Mooser, the Swiss musicologist. Mooser had worked in St Petersburg from 1896 to 1909, and was surprised when the conductor, Riccardo Drigo, who had directed the first performance of The Nutcracker, told him that Tchaikovsky had committed suicide

er Alexander Glazunov, who had been close to Tchaikovsky in his last years and who was noted for his integrity. Glazunov had unequivocally confirmed Drigo's assertion.

Would it have made any difference if this scandal (assuming there was any foundation for it) had become common knowledge? Very little, I suspect. Tchaikovsky's homosexuality had long been public knowledge, but it does not seem to have impaired the love his compatriots had developed for him.

He was given a state funeral - the first commoner to be granted this honour — and 60,000 people applied for tickets to attend. Finally 8,000 were crammed into the Kazan Cathedral while the remainder seem to have packed the streets. for it was only four hours later that the procession reached the cemetery. Ninety-nine years later many may still wonder whether Tchaikovsky really merited this homage. If so, Edinburgh this year offers a chance

# **Playing with Peter Rabbit**

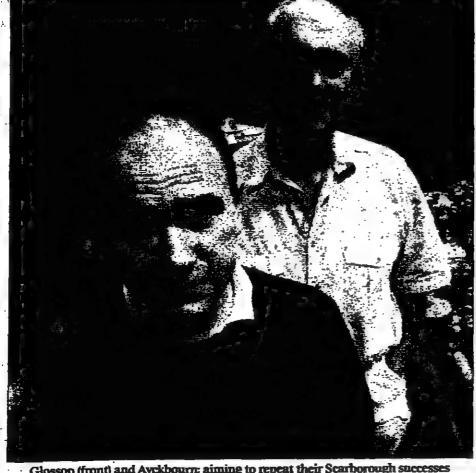

Heather Neill on how Cumbria gets a new theatre, and Alan Ayckbourn gets a second home

A coording to Alan Ayck-bourn, "Roger is a committed regionalist. He gets the jitters when he approaches. Shepherd's Bush." The playwright who put Scarborough on the map with in the round productions of his plays before television snooker discovered the place, helping his friend, the designer Roger Glossop, to do the same for another northern town, Bowness-on-Windermere in Cumbria.

Glossop's Old Laundry Visitor Centre, featuring "The World of Beatrix Potter" exhibition, has been open in Bowness for just over a year. It has a café, a shop, a small lecture theatre — and a hit of space left over. Glossop says he kept looking at this space, wondering how best to use it. Then it struck him: the dimensions were almost exactly the same as those of Ayckbourn's Stephen Joseph Theatre in Scarborough. Glossop knows that theatre well, having designed many of Ayckbourn's plays there as well as in London, including Invisible Friends at the National, and Man of the Moment and Revengers Comedies in the West End.

The latest Scarborough Ayckbourn, a comedy about family tensions called Time of My Life, also designed by Roger Glossop, will open at Bowness next Monday. Both hope this will be the first of many transfers. Ayckbourn even envisages a possible shunting of repertoire between the two venues. Both are cautious, but then, as Ayckbourn says Twenty years ago people said you could run for 13 weeks and 13 weeks only in Scarborough. Now our season goes from

March to January." Glossop appears relaxed as he confemplates the shell of the new theatre with only days to go before opening. He is

Glossop (front) and Ayekbourn: aiming to repeat their Scarborough successes

any deadline. Ayckbourn says Glossop leaves design deci-sions "hair-raisingly late" when they are working together — which he loves, relishing the flexibility of last-minute changes. There will be pre-cious little time to oversee the transfer: the technical rehearsal for Ayckbourn's new musi-. cal in Scarborough, Dreams from a Summer House, is scheduled to coincide with the Bowness opening. The new space is an almost exact replica, however, a simple cube designed for theatre-in-the round and seating 260. ..

Glossop is clearly as talented a businessman as he is a designer. The Old Laundry is funded entirely by private investment and bank loans. He and his wife Charlottle Scott run two companies. Lakes Story Limited, which manages the Bowness development, and its parent company, Velvetfield, which carries out scenery construction for heritage projects such as The White Cliffs Experience in Dover, as well as for theatrical

Theatre skills inform all the work at Bowness: The Beatrix Potter exhibition is deverly lit and arranged as a series of environments, from Mr Toad. the fox's bedroom to Mrs Tiggywinkle's laundry. The new theatre will benefit from the financial stability afforded by the exhibition. "It is reassuring to know that we don't have to out on plays 52 weeks

of the year," says Glossop.

There has been talk of building a theatre in Bowness for thirty years. A local amateur dramatic group is already planning a production of Spring and Port Wine in

panies will bring children's plays and a piece about Houdini — including escape acts.
Glossop says that part of his
intention was to provide a

service for the community. The building he bought two years ago was virtually derelict. It once dealt with all the laundry from the surrounding hotels and then became a boat yard. Its discreet metamorphosis into "visitor centre" could scarcely have been more successful - 120,000 visitors in the first year.

Glossop, however, is a natural pessimist: "The first day 700 people came in. I said we could never keep that up." With Ayckbourn in support, he seems to have provided himself with another excuse for some enjoyable worrying. Time of My Life opens at The December and visiting com- E84141

# Breaking the great white taboo

Last week's case in the High Court was

compulsive reading in South Africa.

Arthur Goldstuck reports on a country in

the first stage of sexual liberation

The evidence from the Jani Allan libel trial was so explicit that, had it been a movie, it would have been instantly banned in South Africa. her homeland, for offending the morals of supposedly decent

As it was, the case enjoyed daily front-page coverage, sharing space with reports of the country's cities coming to a standstill as hundreds of thousands of African National Congress followers poured into the streets. That an argument over who slept with whom can compete for space with such important events in a country's history attests to the compulsive fascination sex has for white South Africans. It is a

fascination that is born not only from prurient interest. South but also from religious repressive-Africans are ness and sheer ignorance. In a much more typical case in while point. London the High Court heard evishocked than dence of the sexual Europeans by behaviour of Ms Allan and her flatmate. South Afdiscussion of rican radio listeners sexual topics were treated to a different kind of sex education. The

country's most renowned sex therapist. Wolf Solomon, was hosting station 702's weekly Sexually Talking show. A woman called in and told him she had a problem with

"What is the problem?" Solomon asked. "I have an orgasm every time I have sex. Is this abnormal? she asked. "Every woman wishes she had your problem." Solomon

Notions of what is sexually permissible and what is too permissive, what is tabus and what is acceptable have changed at an astounding pace in South Africa since the transition from apartheid to democracy began in early 1990.

But even today sexually explicit films, books or magazines are regularly banned. The censors usually say that banned material "will transgress the tolerance of the reasonable person who will regard this as blatantly shameless". The catalogue of recent bannings has hardly lived up to such advertisements. They started the year by the nighorow staduic novels of the Hispanic-American comic book creators Gilbert and

cently declared the band Guns N° Roses undesirable, by banning their Illusions I and II albums. In each case the bannings were

The censors are unable to ban the reporting of court cases from forign capitals. As a result. South Africans gleefully took in every nuance of the Ms Allan's case against Channel 4

Ms Allan's former employer, the Johannesburg Sunday Times, urged readers to look inside for "Sex, lies and steamy fantasies". A rival paper, the Sunday Star ran the headline: We all thought it might turn out to be dirty, but nothing had quite prepared us for

this". The daily Star, in a departure from its staid image, ran in-depth daily coverage, starting on the front page under headlines such as: Through a keyhole I saw a naked bottom". The case as well as the manner in which it was reported and followed in South Africa revealed much about the sexual psyche of the white

only a repressive society, but also a repressed one.

White South Africa exists on a virtual bedrock of Calvinism and it was the Calvinist influence that extended apartheid from the sociopolitical field to sexual and social prohibition. The Mixed Marriages Act and the Immorality Act, passed 40 years ago, made it illegal for a white person either to marry or sleep with someone of another racial category.

nation. It is not

The laws were designed to protect the morals of white South Africa from the supposed evils of black flesh, although the authorities tried to sell it as a way of protecting the "cultural diversity and unique characteristics of each community". Giving a definition of "immorality" to inter-racial sex was a classic example of the manner in which the authorities abused the language of morality.

The obsession with social control that made apartheid possible also resulted in one of the most sexually inhibited societies in the world.

South Atricans are much more shocked than a European would be by open discussion of sexual top-

Front page news: accounts of Jani Alian's libel action were avidly followed in a country where the censor still holds sway

of broadcasting on topics that had never before been raised publicly in South Africa, his Sexually Talking has become the most popular talk show in the country.

"Doctor Paul", the name under which listeners know Mr Solomon. is not the only source of once-taboo information. In October last year. SOUTH ATTICA s nualogiaced to rue concept of 087 lines - premiumrate telephone information and 087 lines were reasonably respectable and included information on sexual practises and problems, pioneered by Mr Solomon. His formula has been parodied by dozens of sleazy operators. Almost overnight, South Africa has grown up, and not everybody likes the

Danie du Toit, the managing director of the state telephone and

telecommunications body. Telkom. However, he says, such services have long been available at a much higher price — via American. British and Australian premium rate services, which add the cost of international calls to the bill.

Profit is not the only motive for changing the sexual mores of a have had a tremendous impact because people suddenly have all this information a phone call away," Mr Solomon says. "People, young men, find out about sex on the streets, or from the odd book. Mostly, they didn't find out. People suffered so much torment."

In a survey in 1987 by the Human Sciences research Council in Pretoria, Dr Louise Olivier discovered that 69.2 per cent of their parents. For the more conser-

figure was 77.8 per cent. Sex education at school is virtually unknown. Where it has been introduced, there has been a public outery about the corruption of children's morais.

"The Calvinist doctrine is that performing sex, let alone talking about it, is almost taboo," Mr Solomon says. "We have among the highest rates of divorce lone in three marriages ends in divorce). alcoholism and child molestation in the world. That must have something to do with our repressive

Teenage pregnancy is a scourge in schools, but statistics are shrouded in secrecy: authorities do not want the world to know how far their moral guidance has slipped. Nevertheless, a study at 16 schools in Cape Town showed that 31 per cent of matric boys (equivalent of A level students) were sexually active. and 25 per cent of matric girls.

tsunchly traditional and conservative Afrikaners, of the type found especially in rightwing movements such as the Afrikaner Weerstandsbeweging (AWB, or Afrikaner Resistance Movement, are regarded in South Africa as a personification of the country's sexual repressiveness Most of the followers of AWB

leader Eugene Terre Blanche would find it impossible to accept that he could have strayed so far from his own moral puritanism as to sleep with Ms Allan. The church and state have always

ustified banning nudity on the basis that it would corrupt the nation, and weaken its moral fibre. But the argument diminishes with every new statistic on divorce, childmolestation, wife-beating and rape.

"Years ago, when the Immorality Act was still in place," Mr Solomon says, "you could go to Swaziland or Lesotho, and find high and mighty churchgoers seducing black people and picking up black prostitutes. It was like forbidden fruit."

The government finally acknowledged last year that the display of naked body parts was not entirely undesirable. It allowed girly magazines to feature pin-ups that revealed that women actually had nipples. Until now, most of these magazines relied on a peculiarly South African phenomenon: nipple-stars, pasted on to photographs by the magazines' art departments.

The change came with the arrival in South Africa of a local edition of Penthouse. There were only hints of nipples, and all in soft focus. But the censors banned five editions in row, only to see all the bannings lifted on appeal. Other magazines watched the appeal cases closely. and gradually began removing the nipple stars.

for the country's satirists, women's breasts in South Africa once again

Are we really a nation of scroungers? The dilemma of the rich and famous who are the target of begging letters

**TOMORROW** 

"If I didn't care about you. I would say the hell with the whole thing" — the private letters of Groucho Marx to his daughter

From Notting Hill to Edinburgh, carnival and street theatre have become part of the British way of life.

The TES reports this Friday.

75p Every Friday

Then Dame Barbara Cartland receives a When something begging letter, she explains to the writer that "I simply can't give money but I has to give will give a signed copy of one Dame Barbara receives a steady 30,000 such letters

every year from around the world asking for advice or money. The church has dealing with "tragic letters", believes that the guilt experifailed, education has gone to pot and the family doctor has enced by those who do receive disappeared so people turn to myself and Princess Diana." these letters is enormous. "For the rich it is the equivalent of walking past a beggar on the street. It makes you feel awful but there are so many scare Begging letters have a long history. Jane Austen got them, Daniel Defoe and James Joyce stories you do not know whethsent them. Shakespeare reer to give." she says.

Mrs Rayner always replies

to letters and says you get a sixth sense about the liars. Some are so skilful that you know they are professionals. I get a lot from Nigeria saying I have chosen you to be my mother, please look after me and educate me. I have to say I am sorry I already have a lot of children. The charlatans take their words straight out of romantic novels. 'It was a dark bleak night or 'l am

Few people willingly admit ging letter. As Richard Branson's agent says: "We get 15,000 letters a month and I don't want to talk about the issue because we will probably get another 15,000. The mon-ey they ask for already comes to twice our annual turnover and the quarter of a million charities in Britain keep us

rs Rayner can't help herself. "One woman didn't even ask for money, she just said she wanted a gravestone for her baby. I wanted to pay for it. She sent me a photo afterwards and kept in touch,"

worst. The poverty in Britain breaks my heart. I have put a lot of £5 notes in envelopes."

Dame Barbara's advice to Mrs Cookson is simple. Give assistance not money. "I have four secretaries here and one in London. They know the answers to most problems now and are equiped with lists of charities and counselling agencies," she says. Though this assumes that you have enough money for a clutch of

One letter recently was so pitiful it nearly broke her resolve, but Ms Cartland has another tactic. "I rang the local vicar and told them about this poor, starving family. He went round to the house which was actually very opulent and saw

Companies such as Sain-sbury's are often asked for products rather than money and any family that makes it into the 100 richest people in Britain is a target. Five thou-sand individuals a year write to the company. Although they answer all letters, the Sainsbury family, through their charitable trust, has developed a stringent policy of only sponsoring charities, nev-er individuals, and it sticks to the arts and community investment. But the trust still needs two managers and four secretaries to cope with all the

The Queen, as the richest and best known woman in the country, receives "vast quanti-ties of personal letters", ac-cording to her press office. "All letters go to her desk but she feels she cannot respond to individual cases and gives her money instead to charities."

Last year the Sun newspaper sent begging letters to 11 chairmen in industry who had received substantial pay rises. The letter purported to be from a diabetic mother of

Helping hand: Robin Leigh-Pemberton

two whose husband was jobless and who wanted to take her children on a day trip to Alton Towers funfair. Six said no and four did not reply. Only Robin Leigh-Pemberton, the governor of the Bank of England, sent a personal

If most of these letters fall on deaf ears, why do people write them? Cecilia Boggis, the advertising manager of Private
Eye magazine, who deals who
with 30 entries a week in her
Eye-Need column of classifieds, says: "Its a bit like
gambling You might just be
the lurge one." the lucky one."

The key to a successful plea. according to Miss Boggis, is originality. For just under £30 Carl Proctor, an independent producer, secured £13,000 investment from an individual after he placed an ad in the Bye-Need column in July 1991. His plea, reading "Angels wanted for West End rock 'n' roll musical", got replies from two girls wanting parts as celestial bodies, a Hells Angel offering his services and a substantial donation which allowed Good Golly Miss Molly its four-month run in the West End. "I found I raised £60,000 without too much difficulty, Mr Proctor

One benefactor, who re-fused to be named for fear of more letters, said that although it is wiser to give to a charity you do not get the same glow from impersonal giving.

The giving has to stop: Catherine Cookson says "Britain has become a nation of beggars . . . it has gone too far"

The bandanna, once the cowboy's trademark, has been transformed into the fashion craze of the season, reports Liz Smith

# Romantics queue up to tie the knot

can fashion photogra-pher, has worn a bandanna on his head for years. He knots it at each corner for a Margate beach look, a style which has singularly failed to catch on. The traditional knotted hanky of the McGill seaside postcard however, about the only way in which the bandanna is not being worn this summer.

The present craze for wearing a colourful cotton handkerchief, gyp-sy-style on the head, knotted at the neck - and on your dog's neck, too, instead of a collar - or twisted around wrist and ankle, is adding a raffish air to the summer uniforms of T-shirt, denim shirt, bikers'

shorts and jeans. For a humble conton square the bandanna is managing to send out a remarkable network of signals. It was originally worn by cowboys for practical purposes, folded in a triangle around the neck and tied with the knot at the back. It could then be pulled up over the

Ponytail-bandanna

Now it has become the freedom flag for every romantic who hankers after unlimited hori-zons. Even if it ends up being knotted inside a tweed hacking acket rather than a Buffalo Bill fringed-back suede cowboy shirt, the bandanna reaffirms a longing for a more rugged life and the chance to "ride to the ridge where the West commences.

Californian hippies in the "right-on" 1970s, male and female, picked up the idea and wore bandannas knotted at the back of the head like gypsy scarves and twisted them into headlounds across the forehead. The Native American feather, an optional extra, somev. American bikers recklessly dispensing with crash helmets - not statutory. motorbike gear in the United States wear bandannas to keep their hair out of their eyes. British bikers have to make do with a token bandanna, tied on the wrist or inside the collar of their leathers.

When Pat Cash, John McEnroe and other floppy-haired tennis players donned bandannas Indianstyle, it was seen to be as much a declaration of independence. against sartorial rules imposed by the international tennis authorities as a simple expedient to catch sweat and keep hair out of their eyes.

Guy Forget, the French tennis player, manages to wear his bandanna with more natural aplomb. You just know that he does not even bother to look in a mirror when he knots his Gitane-blue bandanna inside the neck of his Lacoste tennis

The French, being a nation of dog-lovers, can also take credit for establishing the vogue for laid-back pooches everywhere to sport a wardrobe of cotton bandannas. Rather more practically, babies have taken to wearing them in place of the catch-all bib.

Comfort is not always the priority
when it comes to establishing a fad as a fashion fact. The nicely brokenin bandanna, however, when it has been tumbled a few times in a bot wash and pressed, becomes more: comfortable to wear and easier to

knot than any Hermes silk square. There is now the designer bandanna. Ralph Lauren, who has made the old Frontier country the inspiration for much of his collec-tion every season — he retreats regularly to his 13,000-acre Colorado ranch for inspiration - signs his name on humble bandannas as well as using the bandanna dot and paisley print on chambray shirts and skirts. Giorgio Armani seems

to have picked up the idea of marrying a knotted gypsy baseball cap. For next summer has invented a hybrid in red and white polka-dotted cotton with basena knot combined. Spotted cotton handkerchiefs count as bandannas, although the

originals were printed with a paisley pattern using a tie-dye process known in 16th-century India as "bandhu". Hence bandanna.

Peter Rogers, who runs the second-hand department of American Classics, a clothing shop at the bend of the King's Road in Cheisea, west London, says that some now buy them, half a dozen at a time, as napkins for dinner parties and let guests take them

He believes that, like the bumbeg" the lashion was established by skateboarders, who wear bandannas tied around wrists or ankles, or gypsy-style with long hair and pigtails. You do not have to wash voor had for weeks 11 vo wear a bandanna, and your mum never knows," Mr Rogers says.

American Classics sells basic cotton cowboy bandannas from the US at £2.50 each. Prices for muchprized second hand Levi's or Osh Kosh bandannas, however, are up to £15. At Flip in Covent Garden, central London, vintage Harley Davidson bandarmas, lovingly tramed, decorate the walls like works of pop art. These and Union Jack bandannas, and a wide choice of other designs, sell for £2.

Brian Roe, from Flip, sees today's bandwagon bandannas as tribal totems. Wearing a bandanna says you are a rebel. It is a throwback to 1969 Woodstock," Mr Roe says. Surfers and skateboarders may wear them for practical reasons, but the present craze comes from the music scene, from Axl Rose and

Bandannas are also used as the tribal "colours" of Californian street gangs Bloods are identified by their red bandannas, the Crypts by blue. And a bandanna stuffed in the back pocket of your Levi's can indicate, according to its colour, your sexual tastes.

If you've got it, flaunt it: the versatile bandanna is no longer a fad, but has become a fashion fact. The small cotton square can be twisted and turned into a style to suit nearly every occasion. Clockwise from top left, an Italian tourist in Covent Garden sports a cowboy-knot; Adrian Norris, a graphic designer, prefers the gypsy look; John McEnroe, the tennis player, goes for the Indian knot while Guy Forget, another tennis player, wears his bandanna as a necktie. Brian Roe,

from Flip in Covent Garden, is another to choose the gypsy look while kate Papineau, aged seven months, takes a more practical approach and swaps her bib for a bandanna. Even animals can be followers of fashion; Missie Gibbs. centre, models a raffish little number in place of a collar. With the emergence of the designer bandanna, the little cotton square has come a long way from the days when it was the preserve of the cowboy galloping into the sunset.

PASSPORT TO FRANCE COMPETITION: The Times, in association with Relais & Châteaux, offers five luxury breaks for two in France

# A weekend of luxury

TODAY The Times invites you to take advantage of the first of five opportunities to win luxury weekend break for two at a Relais & Chateaux hotel of your

choice in France with return flights and car hire included.

Regarded by many as the world's finest chain of hotels

and restaurants, Relais & Châteanx is offering readers a weekend for two including table d'hôte dinner, accommodation and breakfast with service and tax included. Winners may select from a choice of 123 hotels of character throughout France. Relais & Châteaux originated in France and was created by seven like-minded hoteliers in '

1954. As well teaux, the group has dude mills. abbeys, manhouses and important houses that have been converted into com-

hotels or elegant restaurants. Beyond that of quality, the philosophy now, as then, is based on the five "Cs" of the association: character, courtesy, calm, charm and cuisine. From a gastronomic experience in Alsace to a late-season. break on the Côte d'Azur, from the golf courses of Brittany to the culture and beauty of the Loire, Relais & Châteaux offers hospitality at its best. Most Relais & Châteaux

Who murdered the French revolutionary leader Marat in his bath?

The Passport to France page will appear occasionally, rather than daily, until the and of Aurora

# **Grandeur in** the pines

One of the finest hotels in the group

¬ he Cap Ferrat peninsula, between Nice and Monte Carlo, is one of the most exclusive parts of the Riviera — a region of very expensive villas. On the point is the little port of St-Jean-Cap Ferrat, and here you will find one of the most luxurious hotels in the Relais & Cháteaux group, the Bel Air Cap-Ferrat. It is the old Grand Hotel of the town, now totally modernised and fitted out to make it the match of its Californian cousin, the Bel-Air

of Los Angeles. The bedrooms have splendid views either of either the Mediterranean or the scented pines in the hotel's own park. There is a poolside restaurant, and a piano bar named after one of the well-known residents of the Côte, the writer Somerset Maugham. The vachts of the famous glide in and out of the marina, and at

the edge of the town is an art

gallery, the He-de-France Mu-

seum, which contains the paintings collected by the Rothschild heiress Madame Ephrussi.

In nearby Villefranche, there is a chapel decorated by Jean Cocteau: beyond it you find the great sweep of the Baie des Anges and the city of Nice. On the other side of Car Ferrat is Monte Carlo, with itcasino and opera house (you acts) and the comfortable reson of Menton, Winter has its charms here, especially during the Menton festival, at which great sculptures are made out of oranges and lemons.

## WEDNESDAY

Your second chance to answer a question and win a luxury weekend stay for two at a Relais & Châteaux hotel

# EDUCATION TIMES

# In the good old study time

Summertime, and the schools are open. Philip Howard reports on a profitable

sideline for institutions of learning

Complaining

about the

ignorance

of the

modern

generation

is garbage

the beginning of August is the formight of Britain's fastest-growing academic institution: the summer school. There have always been such goings-on during the summer hols, but they were restricted to the élite: undergraduates from the older universities putting the polish on for their final examinations next year. with their tutors, in some alpine chalet or gloomy Hebridean fastness remote from the temptations

of the world. Because of increased leisure, increased pressure on schools and universities to earn money rather than close for the summer, and because of increased thirst for by the Joint Association of Classical

learning or exam results, or even an urge to get the young out of the house at some safe for a formight, the British summer become democratised and popu-

For the next fortnight, summer schools constitute a mass academic industry. From Aberdeen to Exercer, there are Open Uni-

versity summer schools, courses for foreign students to study British culture and history, and specialist study groups in every discipline known to academe.

At Eton College, for example, among other exotic activities there is a sporting summer school for about 80 athletic or would-beathletic young aged between 12 and 15. During the day they are coached in their sports by such masters as David Wilkie for swimming in the magnificent pools, Daley Thompson at the running track, and John Hollis on the Field.

In the evening Dickie Davies, a television presenter, takes the m through "A Question of Sport", and at night they learn that the Battle of Waterloo was really won by endurance learnt on the iron

he fortnight that straddles bedsteads of Eton. At Aberystwyth, the summer workshop in Greek and Latin caters for all sorts and conditions of student, from the third-age grey panthers who are just begining, to young gazelles on

their way to double firsts. The curriculum is as eclectic as the scholars, providing a great lake in which elephants can swim and

The school even has room for a scholarly seminar on "A Text of St Basil", as well as a video of the Seven Wonders of the Ancient World, and me encouraging them to read a good newspaper, such as

The Times. Teachers celebrated

its 25th anniversary feast, for which the maximi atque optimi of classical studies turned out, led by Sir Kenneth Dover himself.

As evidence of the breaking of barriers across the old Roman Empire, there are a number of students from Thrace and points east: two Czech students from Charles University, Prague, three

Polish students from Wroclaw, and others from all over the basin of western civilisation, counting the United States. This year, while other young are

on the beach or at the camping site. there are 241 students working harder than they ever have in their lives in the wooded seclusion of Bryanston School, near Blandford Forum in Dorset.

They are taught by the brightest and best teachers of Greek in British schools and universities, among whom Eric Handley, the Regius Professor of Greek at Cambridge, and Professor Malcoim Willcock of University College, London, are just another couple of stars in the bright constellation of

Bryanston summer school 1992

breaks down as 150 females and 91 males. There are 39 from maintained schools, 183 from independents, 16 at university, as undergraduates or postgraduates, and three are already working in the world outside scholarship.

There are 45 beginners, 86 intermediate, and 110 advanced, of a standard to keep visiting amateurs nervously on their toes. You can come to Bryanston or

Aber hardly knowing alpha from omega, and leave able to read a bit of Homer and other classic texts. You can come as a scholar and leave as an even riper and brighter

scholar, having had your mind stretched by the best Hellenists and wits in Britain. Bursaries worth £11,300 have been given to 73 applicants, to make sure that no scholar is kept away from learning

Starting from scratch, the students always play a tragedy in Greek at the end of the fortnight in Bryanston's Greek theatre, looking across the valley to the woods a mile away. This year they are doing the Andromache, Euripides' powerful piece first produced at the beginning of the Peloponnesian

Twenty-five centuries later its black propaganda about Spartan Menelaus will have powerful contemporary resonances for those emerging from the Cold War.

It is politically correct garbage to complain about the state of British education and the ignorance of the modern generation. At summer schools round the land, students of many countries and talents are giving the lie to fashionable whingeing by working for fun, while the rest of the world is on

For their future and ours, it is a thoroughly inspiring spectrale.

# More faith in the future

Has the era of secularism had its day?

VIEWPOINT

John Witheridge

I holce and Diversity, the government's white paper on education, gives emphasis to religious and moral truths and values. This is to be applauded by everyone con-cerned with the future of education and the quality and cohesion of society itself.

Over the past 30 years, moral and spiritual education in mainpained schools has suffered perhaps more than any other part of the curriculum. Secular liberalism has ensured the destruction of confident Christian education, and its replacement by a detached and superficial inspection of a display of religions and philosophies.

No one faith or set of values has been presented as demand-

ing loyalty and cept (at worst) a tempt for religion and ethics in general. For those who understand the supreme importance of education for creating a civilised society it comes as no surprise to find a country with little moral

or religious coherence or confi-

Such a decline has proved less pronounced in the independent sector. Marty schools have a Christian foundation, and at least a reverence for their founders and traditions has protected the public schools from so complete a betrayal of the faith of

The national curriculum, as well as the provision for grantmaintained schools, promise a radical improvement in the academic achievements of the state sector. This will reduce the differences in standards between maintained and independent schools.

Furthermore, the white paper's attention to religious and moral education promises to bridge the gap between the two sectors in this area, too; an achievement which can have profound and far-reaching elfects on our society.

It would be a mistake to

suggest that independent schools have survived intact the onslaughts of secularism since the 1960s. In perhaps a majority of public schools, compulsory chapel has given way to voluntary. increasing curricular pressures and the introduction of new subjects threaten to squeeze RE into a very cramped corner of the timetable. In addition, independent schools have not enjoyed the patronage of the Church of England in the way that they used to. Over the past generation, too many of the church's

leaders have been at best embarrassed and at worst hostile to the public schools. This has been spurred as much by the egalitarian spirit of the 1960s and 1970s as by any theological

could provide a

potent opportunity for independent and maintained schools to move closer together in religious and moral education, and for the Church of England to involve itself with both sectors in helping to establish a new and essentially Christian syllabus and ethos.

Here is an opportunity, too, for the church to play its part again as a national church and to escape from a sectarian straitjacket. Here, instead, is a chance to help shape the hearts and minds of a whole generation, and to rebuild a nation that understands and appreciates a religion which is our heritage and the source of our future liberty, culture and cohesion.

The Rev John Witherlage is Conduct of Eton College.

11.05 Kids on Kitroy.

© CHOICE: In a variation on his usual show Robert Kitroy-Silk is besting a sense of discussions among spending the next formight hosting a senes of discussions among school-age children. The success of such a venture lies in choosing the guests, who must not only represent a wide variety of experience but also have plenty to say. Yoday's opening programme, which deals with brothers and sisters, scores highly on both counts. We have twins, triplets, only children, adopted children, brothers and sisters who cannot stand each other, siblings separated by big gaps in age, and so on. As for volubility Kilroy sometimes has a job keeping order The undoubted stars are Dean (16) and sister Leonie (11), who cheerfully admit that they do not hit it off and spend much of the programme showing us why (8733010) 11.50 The Travel Show Traveller. O Via the Astre and Marcos

 CHOICE: The singer Lynsey de Paul presents a cool and sensible guide on how women can best deal with attacks by men.
 According to Home Office figures, 180,000 women are attacked each year, though as many incidents are not reported the real total is probably much higher. The official line in Britain is that women should not resist as this is likely to make their assailants even more violent. For this reason the police tend to be lukewarm about recommending self-defence classes. But research in the United States suggests that woman who hit back have a better chance of avoiding serious injury and particularly of being raped. The film considers both arguments and stages reconstructions of actual incidents that add much to the discussion. (Ceefax) (557045)

11.00 Cagney and Lacey. The two policewomen give a television counterpart an insight into the ways of the force (r). (Ceefax)

10.40 China Rising: Paradise of Adventurers.

• CHOICE: A three-part series on the modern history of China opens by drawing on archive film and the memories of wizered old men to chart the political turmoil of the 1920s. As in all the programmes the focus is on one city or region, in this case Shanghai, it is a good choice. Shanghai had been seized by the British in 1842 and was still a monument to colonialism, much resented by the nationalists under Chiang Kai-shek. Chiang was fighting on other fronts, against the Communists, against war-lords who controlled vast areas of northern China and, from the early 1930s, against attacks from the Japanese. The film negotiates a lucid path through a complex story, while evoking the unique flavour of a city described by one of its newspapers as parasitic, criminal and the paradise of adventurers. (Oracle) (724300) 11.40 Magnum. Tom Sellick stars as the Hawaii-based private detective

Deceived: victim of shameful medical research (9.00pm)

 CHOICE: In 1932 400 black men from Alabama, poor and mostly litterate, were offered free medical treatment for what they were told was bad blood. In fact they were guinea pigs in a study by the United States government into the progress of syphilis. The experiment began with high motives. Syphilis was rampant, particularly among blacks, and no cure had been found. But not particularly among blacks, and no cure had been found. But not only were the men deceived into taking part in the survey but they were deliberately denied treatment, even when effective drugs, notably penicillin, became available. In the cause of medical research they were allowed to die and many did. Clive Gordon's film is a mediculously researched and grippingly presented account of a dark episode in American medical history which was not officially brought to an end until the early 1970s. (Teletext) (5799) 10.00 Films Hush-a-Bye-Baby (1989) starring Emer McCourt, Michael Liebmann and Sineed O'Connor. Tough drama about a 15-year-old insh convent girt who becomes pregnant by a young man. When he is picked up in a British Army swoop, her life disintegrates and she is driven into isolation from her family and friends. Directed by Margo Harkin (29478)

Harkin (29478) 11.30 Devil's Advocate. The first of six programmes in which Darcus

Howe challenges conventional wisdom about an important topical issue (925497) 12.15am Play Mas. The second programme describing carnival time in Trinidad (9109530)

12.35 Quo Vadis? Episode one of a lavish three-part drama set in Rome at the time of Nero. Staming Klaus Maria Brandauer, Max von Sydow and Frederic Forrest (r) (290053). Ends at 2.36

**MONDAY AUGUST 10 1992** 

BUSINESS EDITOR JOHN BELL

## IN THE NEWS

# **Fishing** for a fortune abroad

f John Banstow's life story could be cap-tured in a phrase it would be "one fortune good two fortunes better". For the man who says he did not go into business to make money has turned out to be singularly, or more accurately plurally, good at doing exactly that An Essex man born and

bred, his first fortune

came from what is virtually the county business, houses. The Brentwood estate agency he founded in the fifties grew with successive housing booms. When Bairstow Eves came to the stock market in 1982, via an offer for sale that was 24.5 times oversubscribed, it was valued at about £7 million. The Essex business community knows a bargain when it subscribes for one: three years later Bairstow Eves was bought by Hambros

Bank for £77 million. But by then the second string to Mr Bairstow's bow was humming. Es-tablished in the late sixties, when he converted his Tudor residence (the Most House, Brentwood) into the county's first fourstar hotel, his recipe for success was simple; serve the local business community and the chances are the same people will bring you their weddings and anniversaries. The formula has clearly worked, not

Bairstow: Essex-bred

just in Britain but in continental Europe, where Queens Most Houses has been expanding for the past five years. From a 50strong Britain-only chain in 1982, Queens Most now has more than 190 hotels, almost half on the Continent, and property assets of about £2 billion.

espite all this, Mr Bairstow, at 62. is happy man. This may be the third recession Queens Moat has survived but its severity is unprecedented. The three-day conference becomes one day, the 125guest wedding is cut to 75. Spending is sharply down and competition is fierce. The expansion on to the more affinent Continent will rarely look more

Nor can he find much solace in his passion for fishing, with even his beloved Wye affected by falling water levels. The big question at Queens Moat is which will come first the rains or the recovery?

# CBI says wages have stopped chasing prices

By Ross Tieman, industrial corresponden

BRITISH companies have severed the link between pay and inflation that has dogged national competitive However, it is clear that officials believe Britain is approach-in a bound reading too much into provisional figures that may later be corrected.

al cantion about reading too much into provisional figures that may later be corrected. However, it is clear that officials believe Britain is approach-into about reading too much into provisional figures. eration of British Industry believes. The CBI argues that pay is no longer contributing significantly to inflation.

If this is accepted, it will add to pressure on the government to stimulate the economy rather than continuing to focus on

Provisional figures from the CBI's pay databank suggest pay rises in the April to June period averaged 4.3 per cent for the third successive quar-ter. With productivity expected to climb at an annual rate of 3.2 per cent, pay settlements in manufacturing are now

largely self-financing.

The employers organisation maintained its tradition-

ing a turning point in the post-war industrial climate.

"Pay behaviour is settling into the non-inflationary patterms set by our most successful industrial competitors," said Robbie Gilbert, CBI director of employment affairs.

Pay is being driven more by business factors — the need to keep prices competitive, to defend profitability, and to win orders — than by infla-tionary pressures. If that pattern can be maintained into the upturn, the wage/price spiral will be broken to the permanent benefit of UK competitiveness and jobs."

Confirmation of a further rise in the number of jobless is

# Lloyds pins revival hope on South East

By Anatole Kaletsky, economics editor

THE south east of England is likely to lead Britain out of recession, but a recovery will the housing market and a reduction in the "strong urge to save" among consumers in the region. Although there are no signs of such a turnround, the preconditions are in place.

according to a report pub-lished today by Lloyds Bank. Lloyds notes that the ratio of house prices to incomes in the South East is at its lowest for 20 years, while houses are far less affordable in other regions of the country. Consumer confidence is also highest in the South East, although surveys how that general confidence mitigated by a belief that this is a good time to save, rather

than spend. Lloyds also argues that the South East's dependency on service industries has not been a factor in its relatively poor performance during the recession. The South East's manufacturing companies, which find to be smaller and newer than those in other areas, have been responsible for most job losses, while services in the region have continued to do

relatively well, By contrast, an analysis by Morgan Grenfell, the merchant bank, argues that house prices in the south of England will fall by a further 5 per cent

and that no recovery in housing is likely until 1994. A separate report out today, from Infolink, the consumer credit assessment service, says there is no sign of a consistent recovery in spending confidence, although it notes a

credit from retail stores on the same period last year. The reports are published at the start of what promises to be another trying week for the government, with sterling lan-guishing at its lowest since ERM entry, and official statis-tics locusing attention on the

small increase in enquiries for

economy's parious state.

The official tally of industrial production for June, due on Thursday, will fuel arguments over whether the recession is continuing to deepen or whether a bottom was reached in the second quarter, as hirited by government cyclical indicators last week.

According to MMS International, the investment research firm, the City expects manufacturing output to be unchanged from May, while industrial production, which includes energy output, is expected to show a fall of 0.2 per cent. Other statistics this week include producer and retail price data, expected to show little change in annual rates of inflation.

Economic View, page 17

rangement is expected to in-

chide Lonrho's 45 per cent stake in the Ashanti gold mine

the department of employ-ment publishes the July jobless total. City forecasters expect a rise of about 25,000, taking the number claiming benefit to almost 2.75 million.

There may also be new confirmation from the index of average earnings of a narrowing gap between pay and productivity. The CBI settle-ment figures are sharply below pay inflation as measured by the index of average manufac turing earnings, compiled by the department of employ-ment, which showed a rise of 6's per cent in the year to May. But average manufacturing carnings are also fall-ing, recording a one-point drop since April, the biggest month-on-month fall for a

Andrew Sentance, CBI economics director, said the gap was partly explained by "drift", the additions to basic pay caused by bonuses and

But the average earnings figure also reflected settlements a year ago, whereas the pay databank numbers indi-cated rises that would affect the coming 12 months. At a time of falling pay deals, settlements were bound to be lower. Mr Sentance said many manufacturers had succeeded in maintaining productivity

volumes tended to increase fixed costs per unit of output. He said: "I think prospects for productivity are good, and that once output starts to rise, we will be improving our productivity faster than our main competitors, and certainly faster than Germany."

improvements over the past few years even though falling

CBI statisticians are especially encouraged by the ap-parent disappearance of any going rate for pay settlements. According to provisionai CBI figures, one pay has been at or below 3.5 per

A quarter have been in the 3.5 to 4.5 per cent range and a similar proportion between 4.5 and 5.5 per cent. Only one manufacturing deal in five has been over 5.5 per cent. In the 12 months ended June, the rise in the retail prices index

was 3.9 per cent.
The databank figures also show a fall in service sector settlements. During the first half, settlements averaged 4.3 per cent, down from 6 per cent. during the second half of last year and 7.1 per cent in the same period of 1991.

# City men draw a blank as maiden bowls 'em over

# Cheltenham tops building societies performance table

By Lindsay Cook, money editor

ester would be a fine acquisi-

tion for a foreign bank or

FOR the third year running, the Cheltenham & Gloucester Building Society has topped the building societies' performance survey carried out by UBS Phillips & Drew.

Cheitenham & Gloucester, the sixth-largest society, has also beaten Abbey National, the building society that converted to a bank in 1989, for the first time.

John Wriglesworth, author of the report, says that com-pared on the same factors of profitability, capital strength, market shares and growth, Cheltenham & Gioncester had improved its position at the end of 1991. "The society continues to go from strength

Mr Wriglesworth argues that slower growth in the mortgage market is likely to lead to the number of building societies falling by more than half, to no more than 40, by the end of the century.

Many smaller societies will

be weeded out, he suggests, though none of the top 20 is likely to be rescued through a merger. The survey could mark a turning point in Cheltenham & Gloucester's history as the £15 billion society looks at what its next move could be. Andrew Longhurst, its chief executive, is not wedded to the concept of mutuality if his society's

reluctance to increase the wholesale funding limit from 40 per cent to 50 per cent could soon become a problem for Cheltenham & Gloucester unless it can merge with a large society or convert to a company. Too small to consider a conversion alone like the Abbey, Cheltenham & Gioucfifth in the table.

insurance company.

Mr Longhurst has been mentioned as a potential leader of the Halifax Building Society after 10 years at the helm of C&G. It is not beyond the bounds of possibility that the Halifax, with assets of £58.7 billion, and Cheltena good team. A merger would make sure that the Halifax

assets are creeping up at £57.4 Leeds Permanent Building Society has moved up from eighth position in 1990 to second. The most

improved society is the Nat-

remained the largest mort-

gage lender. Abbey National's

ional & Provincial, also under new management, which has moved up 11 positions to take eighth place. The Derbyshire is up seven places to sixth and Bristol & West up six places to 10. The Halifax, the largest society, has risen four places to

The report says that at the end of 1991 building societies held more than 60 per cent of the nation's mortgage loans and looked after 47 per cent of its liquid savings. Their total assets exceeded £230 billion. sharing a total of 32 million The guide gives an immedi-

ate indication of the strength of societies and also reveals with their arrears. These are not always clear.

though. For example, the Bristol & West merged with the Cheshunt on December 31. This means that the Cheshunt's provisions are not inchided in the table but its arrears are.

Comment, page 17

of Charterhouse, and chairman of Hambro Bank, enjoy a break during a six-a-side cricket tournament at Mr Blank's Oxfordshire estate yesterday (Jon Ashworth writes). Teams from Schroder Securities, Warburg Securities, Lazard Brothers, Smith New Court Charterhouse and Hambros entered into the spirit of the occasion, helped in the battle for the City stickers' cricket crown by several Lord's Taverners celebrity cricketers. They included Mike Denness, former Kent and England cricketer, Eddie Butler, Welsh rugby international, and Phil Edmonds, Middlesex and England cricketer, who was bowled first ball. Leslie Crowther, president of Lord's Taverners, helped umpire Smith New Court to win the crown, with Schroders third. The award for best bowler went to Alison Carnwath of Schroders, the only woman in any team, who took three wickets in one over. Mr Blank's celebrity cricket days are an annual highlight of the City's social calendar.

# Libya reveals joint venture with Lonrho

... BY OUR FINANCIAL STAFF

LONRHO, the conglomerate led by Tiny Rowland, is re-ported to have reached agreement with the Libyan Arab Foreign Investment Company to form a joint venture to develop assets in Africa. Omar Muntasser, Libya's minister of finance, is quoted in The Sunday Times as saying: "We have formed a joint venture with Lonrho to invest and develop our combined existing

interests in Africa." If it goes ahead, the ar-

in Ghana. Such a deal, though fraught with political controversy, could help reduce Lonrho's borrowings and enable the group to develop its assets faster.
The Libyan authorities already have business links with

Lontho. This year, the Libyan state investment company put up £177.5 million for a 33 per

Metropole Hotel subsidiary. Paul Spicer, a director of Lourino, said: "We have signed no agreement to sell Ashanti, nor have we signed any agreement to sell any of our other assets."

Mr Muntasser explained: Lonrho has extensive holdings in Africa and we have a lot of activities in Africa. We said if we put our forces together - his relationships in Africa and our financial rening venture." Mr Muntasser told The Sunday Times that the venture's turnover could be "tens of billions of dollars". Lourho is reported to believe that output from the Ashanti mine, 55 per cent owned by Ghana's government, could be doubled with an investment of \$300 million.

Libya is also reported to be interested in Londo's cobalt and copper reserves in Zaire, as well as the Safari Club: a huxury hotel in Kenva.

## sources - we can have a wincent stake in Lonrho's Encouraging gloom over share prices

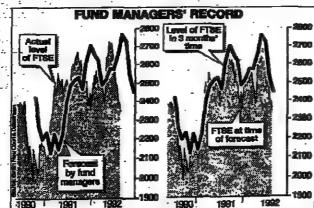

By GRAHAM SEARJEANT FINANCIAL EDITOR

IF THOSE who make the big investment decisions are right. the outlook for shares on the stock market is peculiarly gloomy. Fund managers are more pessimistic about the outlook for share prices than at

any time since March 1991. Private investors need not despair, however, for professionals paid to invest billions seem to be as much affected by the mood of the moment as armchair amateurs acting on headlines of stock market

booms and slumps. The August survey of fund managers, conducted last week by Gallup for Smith New Court, the securities house, shows fewer expecting to invest more in London quoted shares than at any time since the monthly survey, stocks or continental equities. started two years ago.

Only 7 per cent more are planning to invest extra mon-

tutions managing £550 billion SE 100 share index to rise by

of funds, suggesting that share only 5 per cent to 2,462 over

cy than those who expect to reduce their holdings. This compares with a balance of 49 per cent putting new money into British shares just four months ago. Far more are planning to direct their funds into foreign bands, gilt-edged

The survey covered 97 insti-

prices can expect little help from their most vital source of support. Not surprisingly, the managers are far less optimistic about share price prospects. Since three fifths of their funds are in British shares, managers tend to be inveter-

ately optimistic. Even so, on

average, they expect the FT-

sawed to a peak of 2,738 in May this year, only to fall 14 per cent to 2,350 since. Their gloom is shared by share chartists, many of whom project recent falls as the start of a new bear market and predict that, after a short-term

lowest forecast for 17 months,

since when the index has see-

rally, prices could fall a further 10 per cent. As the chart shows, however, fund managers in the SNC-Gallup survey have a less

than brilliant record at prediction. Their forecasts bear a dose relation to the level and trend of share prices at the time they are made. Three months later, the actual level of the index is often completely different from what they expected. Indeed, the armchair investor might conclude that they cannot look beyond their noses and that the amateur might have done better by

# 100% mortgages are now available at John Charcol. (Just when you thought they'd 100% vanished.)

A lot of people need to borrow a high proportion of their property's value right now -- not just first-time buyers, but also people who are left without any capital when they sell their current homes.

If you're in that position, you'll know that just when you need a mortgage of up to 100% of the property's value, they've become extremely hard to find.

Not at John Charcol. A number of major financial institutions are still making 100% loans available through us - because they know that we will only recommend them to suitable applicants. As a result, we can offer you a range of alternatives, some

including special discounts and extra benefits. And at the very least, we can save you a lot of time by making it clear whether or not you qualify.

So if you need a 100% mortgage, you can count on our 100% support. For a written quotation, call John Charcol on (071) 589 7080. Or write to us at Mercury House, (FIMBRA) 195 Knightsbridge, London SW7 LRE.

# Hongkong Bank seeks dealing site

THE Hongkong and Shang-hai Bank is seeking a landmark site in the City to create the largest dealing room in Europe, with places for up to 1.000 traders.

The bank is considering many of the City's largest developments, including Broadgate, Vintners Court, and even the controversial Alban Gate. Billingsgate, the former fish market next to Midland Montagu's offices, had been the bank's favourite but it has

# **Factory row** at centre of Kalon bid

KALON Group's £93 million bid for Manders Holdings shifted into top gear over the weekend amid suggestions of foul play over a factory in Yorkshire (Jon Ashworth

The rival paint manufacturers have accused one another of planning to close the Windeck factory in Bingley. Yorkshire.

Mike Hennessy, Kalon's chief executive, has been criticised by Manders for saying he would shut down the Windeck factory if the bid suc-ceeded. Now Manders, which has emphasised the impor-tance of keeping Windeck running, has admitted it considered shutting down the

The row was sparked by a circular from James Capel, the broker, which questioned an E800,000 provision in Manders' 1991 accounts. Manders first said the amount related to the closure of Windeck, but later denied this. Instead, the money related to building

A Manders spokesman said yesterday the company had "briefly" considered closing the plant, but had since decided not to and invested in it.

Kalon is offering 17 new Kalon shares for every six Manders shares held. The offer values Manders shares at 253½ p. There is a partial cash alternative of 300p plus 14 Manders shares.

The offer closes a week on

decided there are technical problems with the site. Billingsgate has stood empty for more than six years after being fitted out as a dealing centre

by Citicorp.

Hongkong Bank needs to find a site where it can merge its own treasury operations, which employ more than 100 dealers, with those from Midland Montagu, which have

The bank wants to place all the dealers on a single trading floor, with enough space to expand to up to 1,000 trading positions. The new centre will also have a single settlements floor, with an estimated 1,200 staff. The search is offering hope to hard-pressed property developers who are desperate-ly seeking tenants to fill their imposing buildings.

Hongkong Bank plans to dominate the London currency and money markets with the new trading floor, which will link directly to its trading operations in the Far East. The extra revenue it hopes to generate from merging its operations with the Midland's was one of the key reasons behind the £3.7 billion

So far Hongkong and Shanghai Bank has not identified an ideal site for its operations since few buildings are large enough to accommo-date all the dealers on a single

At one stage the bank had hoped to take over the Leb-man Brothers building in Broadgate when the firm moved to Canary Wharf. Now that Canary Wharf is in administration, Lehman and its parent, American Express, are unlikely to proceed.

The upheaval will empty a large part of the Hongkong Bank's existing offices in Bishopsgate, where it rents ten floors of a tower block. Some of these will be sublet.

Hongkong Bank's directors are also discussing where they should install the group head office when it moves to London at the beginning of next year.

The favourite is Poultry. Midland's listed headquarters opposite the Bank of England. but the group may instead new Kalon shares for every six | move to Midland Montagu's Thames, or in the new dealing

Henlys has predicted a £3.6

back on track.

HENLYS Group, the motor trader and coach manufacturer fighting a £26.5 million bid from T Cowie, has won its biggest bus order. The £9 million deal with Badgerline Group, one of Britain's biggest private bus companies. was struck as the battle with Cowie moves into a critical phase. Henlys is expected to publish its latest defence dociment today.

Henlys' subsidiary company, Plaxton, the Scarborough-based coach and bus body specialist, will supply blue-glass block beside the 396 buses to Badgerline for delivery in 1993 and 1994. The latest deal takes the total

pected to reduce costs by £4 new order intake in the past million a year. few weeks to £26 million and a newly signed trading agree-ment with Volvo could be Badgerline, bought out

from the National Bus Company by management and employees in 1986, has a fleet of 2,200 buses in central and southern Britain. Thamesway, a subsidiary based in Essex, launches a central London service on Friday. Trevor Smallwood, chairman of Badgerline, and David Quainton, bus sales director at Plaxion, unveiled the new buses last week.

By March, 38 per cent of the London bus network had been put out to private

# Growth prospects protected at MTL

PROFIT-taking halted a strong run in MTL Instruments shares, but its favourable prospects are likely to attract renewed support from

A year ago MTL traded at 175p. The shares more than doubled to 373p before slipping to 323p. With pre-tax profits of £5.1 million-expected this year, the prospective price earnings ratio of just over 17 does not fully reflect growth prospects in its core industrial

safety products business.

MTL makes and supplies electronic explosion-protection instruments and devices used mainly in the measurement and control of processes in hazardous areas. These de-vices are based on the principle of intrinsic safety, limiting the electrical energy used in hazardous areas to remove the threat of a short circuit.

Big markets include the oil and gas industry and chemicals. North Sea platforms represent about one-third of British sales, although no one client represents a significant percentage of turnover.

Last year, the company was able to increase pre-tax profits by 22 per cent to £4.6 million without recourse to acquisitions or external funding. Despite record capital expendinure of £2 million, MTL generated cash, ending the year with £6.3 million in cash, expected to rise to £7.2 million

this year.

Capital expenditure is expected to continue at similar levels, with investment focussed on machinery and factory space. The company has spent less than £100,000 on acquisitions since joining the market in 1988 and remains cautious shout such deals, preferring to nurture organic growth.

Last year's results were boosted by the one-off benefits of new manufacturing techniques, enabling MTL to bring forward £500,000 of sales into 1991. Historic levels of growth are unlikely to be repeated this year. Brokers at Barclays de Zoete Wedd, however, anticipate a 9 per cent rise in turnover and a modest increase in investment income as cash balances rise, for taxable profits of £5.1 million, rising to £5.7 million in 1993.

MARTIN BARROW

# **Date set for Coopers** disciplinary hearing

AFTER one postponement and one adjournment, the controversial disciplinary hearing of two partners at Coopers & Lybrand, the accountant, is now scheduled for October 12. It will decide whether Michael Jordan, head of the Coopers insolvency practice. Cork Gully, and Richard Stone, head of corporate finance at Coopers, breached the Institute of Chartered Accountants' guidelines when they accepted the administration of Polly Peck International in October 1990.

A rival accountancy firm complained to the ICA that Coopers had a conflict of interest because it had worked previously for Asil Nadir, former chairman of Polly Peck. Coopers maintains there was no conflict and consequently had its appointment confirmed by the High Court and Polly Peck's creditors' comminee. The case has dragged on since April, casting a cloud over two of Britain's most prominent practitioners. The private hearing is likely to last a further five days before a three man sub-committee of the institute's professional conduct committee

# Ewart fights revamp

SHAREHOLDERS of Ewart, the Belfast-based property SHAREHOLDERS of Ewart, the Benast-based property group, will meet on September 4 to vote on proposals to remove four directors from the board. Monarch Properties, a Dublin-based company that holds 29.2 per cent of Ewart, requisitioned an extraordinary meeting last month. Ewart has written to shareholders accusing Monarch of trying to win control without making a general offer and origing them to vote against the proposals. Philip Monahan, chairman of Monarch, has deried trying to win "back door" control. In a letter, he said Ewart needed a smaller, more tightly focused board to assist decision-making. Ewart reported pre-tax profits down 21 per cent to £201,000 in the year to end-April but lifted earnings per share to 1.18p (0.34p).

# Uphill for van sales

SALES of commercial vehicles in Britain fell for the 34th consecutive month in July. The fall in sales of lorries shows signs of bottoming out but sales of vans continue to decline signs of bottoming out but sales of vans continue to decline. At 7,887, the number of registrations was 20.9 per cent down on the same month of last year. Sales of vans and lorries for the first seven months of the year were 110,394, down 9.63 per cent. The fall was especially severe in the van sector, where the impact on Umited Kingdom manufacturers was compounded by large falls in the sales of British-built vehicles. Sales of british-built vans fell by 28 per cent year on year. Sales of imports more than doubled. Sales of medium and heavy vans dropped 36 per cent year on war to 2 270 and heavy vans dropped 36 per cent year on year, to 3,270. Sales of British-built vans slumped by 43 per cent.

# Apple case dismissed

A FEDERAL district court judge in San Francisco has dismissed most of Apple Computer's copyright infringement suit against Microsoft and Hewlett-Packard. Apple claimed in a suit brought in 1988 that the two copied the "look and feel" of its Macintosh computer graphics, but Judge Vaughn Walker dismissed all but a few items from the case. "Obviously we are disappointed with the judge's decision," Apple said. "However, we never based our business on this decision. It's nothing more than status quo for the industry." Apple stated in a pre-trial document that the alleged infringement had cost it more than \$5 billion in damages.

# Crown Agents advise

THE British Crown Agents have been appointed to oversee \$350 million of Russian government spending, much of it on import procurement, financed by the World Bank and to ensure that it conforms to bank requirements. They will also help train Russian staff in World Bank procedures for using the credits. The project, worth about £500,000, is to be sponsored by the Buitsh government's Know-How Fund.

REPORTING THIS WEEK

# GA looks for signs of recovery

THIS week's results will be dominated by first-half figures from composite insurance companies. Tumbling house prices are wreaking more havoc than storms, bombs and other disasters. City analysts will still be hoping for some underlying signs of recovery. General Accident starts the

PHILIP PANGALOS

# M4 may be Lamont's best route

have jemisoned plans to raise a substantial proportion of financing for the PSBR through National Savings. That, at least, was the message from the hasty decision last week to cut interest rates on National Savings products.

Although National Savings have made a useful contribution to official funding since the beginning of the financial year, this avenue is now effectively blocked off. The Chancellor's concern to avoid a mortgage rate increase overrides all other consider-ations, except possibly his de-fence of the DM 2.95 parity for the pound.

It is questionable whether building societies net inflows will benefit from the easing in National Savings terms to the extent the government hopes. A significant part of their problem stems from withdrawal of small companies' deposits. These would not have been tempted by National Savings and will probably continue to flow out as the continuing recession takes its toll of company finances. The important point is that the Chancellor believes he is relieving pressure on the hous ing sector while building society managers are willing to stand pai on mortgage rate

for the moment. About £2.1 billion of finance was raised through National Savings in the April to July period. This is a drop in the ocean compared with a PSBR that appears set to exceed £30 billion this year. If National Savings inflows tail off, more of the funding burden should logically fall on the gilt-edged market.

The government would then, within the constraint of the overall funding requirement, be keeping short-term rates low at the expense of intensifying upward pressure on long-dated yields. In other words, the government would be affording relief to the housing market but only by raising the cost of long-term finance for companies. The Chancellor is likely to

reassess the value of the "funding rule" because of this policy

Since the mid-1980s, with various modifications, the government has pursued a rule on funding that has sought to neutralise the impact of public: sector transactions on growth in broad money. The rule was introduced when the government was edging away from broad money targeting but wanted a substitute guideline to reassure financial markets that it was still following a responsible anti-inflation course. In fact, close observance of the "funding rule" still allowed the late 1980s private credit surge that fed a

double-figure inflation rate. The authorities, therefore, would probably lose little in terms of inflation control by abandoning the "funding rule". The problem is that scrapping it might risk undermining confidence in the gilts market. Though few gilt investors can have much confidence now that observance of the rule is a sufficient condition for general price stability, they might be anxious if they felt there were no guidelines governing the authorities' action

in the gilts market. It seems unlikely that the authorities would be prepared to scrap the "funding rule" without replacing it with something else. The ERM commitment, cornerstone of Norman Lamont's monetary policy, is probably too imprecise to serve this purpose. The government may be tempted, therefore, to return to broad money targeting to reassure the financial markets that a move away from the funding rule" does not imply abandonment of monetary control.

The argument against broad money targets has been that financial deregulation makes broad money measures poor indicators of economic trends. The effects of 1980s deregulation on broad money have now surely been exhausted. In any case, broad money, even with the 1980s distortions, was not such a bad guide to policy as officials

growth in 1987 and 1988 heralded the subsequent inflationary burst, while the collapse of growth rates in all the broad money measures since 1989 ties in neatly with the

TECESSION. In present conditions, with the government aiming for 3 per cent real growth and, say, 2 per cent inflation - in line with the best in Europe - M4 might be allowed to grow at an annual rate of 8 per cent. after taking account of the longterm average annual fall in 👣 M4 velocity of 3 per cent.

This compares with the pre sent M4 growth rate of 5 per cent. The difference between 5 and 8 per cent M4 growth would enable the authorities to sell £15 billion less gilts than if they kept to the "funding rule". The market eagerly awaits Mr Lamont's views on this subject in his Mansion House speech.

Tougher times for building societies

ROUNDUP

van sales

1000

R etreat by the Treasury averted a critical moment for many building societies in the stand-off over competition from National Savings. The government could not afford to be seen to be pushing up mortgage rates. The affair exposed a more fundamental dilemma for many building societies, which will not be so easily resolved. If market forces operated logically, a good part of the nation's savings should be diverted over the next two or three years from the housing market, where they are not immediately needed, into financing the public sector borrowing requirement, which is as embarrassingly buoyant as the demand for mortgages is slack. The idea that building societies are somehow entitled to some self-defined fair share of savings is nonsensical. Instead, rationalisation among societies may have to be accelerated, perhaps halving their numbers to between 40 and 45 by the time state finances are back on an even keel "

The excesses in the housing market that preceded today's slump owed much to the quiescence of National Savings in the years of public sector surplus and the neglect of retail savings by the main banks. Once the societies come under competitive pressure, especially from such a non-commercial state competitor, the vulnerability of their balance sheets is exposed. A sharp downturn in net deposit inflows could readily be accommodated at a slack time. As soon as lumps of mobile funds started flowing out of societies, alarm hells rang threatening higher mortgage costs for millions of existing borrowers.

A typical big building society balance sheet has about 83 per cent of assets tied up in mortgages and about 13 per cent in liquid assets. A high street bank. by contrast, might have nearly a quarter of its assets in liquid or readily realisable form, while loans and advances, many of which are more swiftly recallable than mortgage loans, account for two thirds.

This traditional illiquidity of building societies hardly matters if they can rely on a stable base of savings deposited at branches by regular customers. The more that they operate like banks or rely on footloose funds, the less appropriate this structure looks. Many societies, from Halifax, the largest, to the more modest Derbyshire and scores of small societies, still basically rely on their traditional base, though services to depositors are more complex and bank-like. As banks realised earlier, this is expensive in terms of inflexible overhead costs and can limit growth rates, though the Midland has stopped a branch closure programme for fear of losing too many regular customers.

ther societies have exploited their relatively recent ability to tap wholesale money markets and compete more actively in the intensively competitive market for substantial lumps of short to medium-term capital, whether from individuals or private businesses, which do not require heavy branch overheads. For instance, Cheitenham and Gloucester, sixth-biggest but the top-performing society on most financial tests, manages with far fewer branches than its nearest competitors. Wholesale funds need not be less stable: indeed they can be tailored better to fit the average life of mortgages. The downside, as C&G found when it had to react first to the high National Savings bond rate, is that the cost of thoriey can inici more widely, at times putting such societies at a disadvantage that compensates for lower overheads.

Future rationalisation is therefore likely to go beyond the traditional absorption of smaller societies that cannot compete on services or cope with losses in housing recessions. There will surely be a polarisation between those that are essentially marketers of mortgages, which naturally sit as part of bigger banks or larger financial groups, and those that concentrate on their traditional role as savings institutions. This magnet produce some surprises. ECONOMIC VIEW

# Barclays' voice of gloom lends credibility to hopes of recovery

Gloomy forecasts by the hapless clearer

mean the time is ripe

for steps to quicken

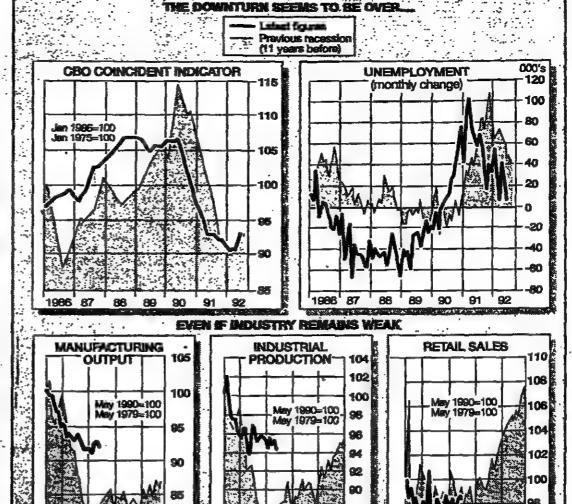

the imminent upturn, says Anatole Kaletsky

ir John Quinton, the chair-man of Barclays Bank, de-clared last week that two more years would have to pass before the British economy showed any clear signs of recovery. Given Bardays' record of being caught napping by economic cycles. Sir John's prediction of never-ending recession should probably be greeted as one of the "green shoots" of economic spring.

Using a Barclays forecast as a contrary indicator seems sensible not only because of the bank's lamentable lending decisions, but also because of its choice of top personnel. After all, the Barclays economics department was headed until recently by Alan Budd, now chief economic adviser to the government. Nigel Lawson and Sir Peter Middleton, the Permanent Secretary of the Treasury who put sterling into the ERM at DM 2.95, both parachuted safely out of the economy they had so skilfully sabotaged into the comfort of the Barclays. boardroom. Putting it all together, aforecast of perpetual recession from Sir John Quinton adds up to a bankable guarantee that the recession is all but over.

This message does, in fact, finally seem to be emerging from the statistical indicators. Most of the economic and political developments in the three weeks since I went on holiday have been quite consistent with the theme of my last Economic View, that the darkest hour is just before the dawn. Politicians and businessmen have whipped themselves into a panic about neverending recession. Economists and investment analysts who worshipped dutifully before the ERM totem for two years have suddenly experienced Pauline conversions and write of inevitable devaluation. The prime minister's obsessive desire to make Britain the world's lowest-inflation economy (or economic graveyard) are suddenly being exposed to the deri-sion they long deserved. Yet almost imnoticed, the economic statistics have gradually been improving. The charts here tell the story. The

first one, which shows the index of coincident indicators compiled by the Central Statistical Office, suggests that the recession, as formally defined, probably ended in April. For the coincident index, which is a weighted average of live crucial indicators of economic activity and industrial sentiment, is what defines the beginning and end of each economic cycle. Last Wednesday, the CSO revealed a sharp rise in the

dent indicators since the peak of May, 1990. It was also by far the steepest rise since early 1987. Admittedly the index, since April, has been based on incomplete figures. Its final values will not be available for another two weeks, when the first estimates of second-quarter gross domestic product are produced. If GDP falls again in the second quarter, the coincident index may well be revised downwards, though it would take an improbably big GDP drop to wipe out the gains in the index since March. It is a telling reflection of the present despondency in Britain that no newspaper apart from this one even reported the rise in the coincident index last week.

Of course, cyclical indices are too technical to make any impression on political and business opinion, but more tangible evidence on economic activity also suggests the gloom is overdone. Last month's jobs figures, which showed an increase of only 7,000 in seasonally adjusted unemployment, may have been erratically good, but the long-term pattern is clear — job losses are steadily declining and the increase in unemployindex in May and June. This was the ment has peaked much earlier in the first two-month increase in the coincipresent economic cycle than in the

last one. The figures on manufacturing output, industrial production and retail sales are also perfectly consistent with the end of recession, even if they are only "bumping along the bottom". As the second row of charts shows, it took two years after the end of the last recession before manufacturing output started to show percep-tible growth, and it was a year before retail sales really picked up.

he main danger now for the economy is not that recession will go on for ever. It is that history will be repeated and, as in the early 1980s, recession will be followed by a miserable convalescence instead of a proper recovery. As a result, tens of thousands more jobs and businesses will be needlessly lost. What businessmen should now be demanding from ministers is not simply an end to recession, but a robust recovery with target growth rates of at least 3 to 31/2 per cent annually, as promised in Norman Lamont's Budget

In today's universal gloom, even such moderate growth rates may seem completely fantastic. Yet they should be easily attainable in Britain, given the huge improvements in the

supply side of the economy that have occurred in the past decade.

The surest way to achieve faster growth, as even the former devotees Treasury orthodoxy are finally admitting, would be to cut interest rates to 7 per cent or less and pull sterling out of the ERM. But this is politically out of the question unless the French referendum rejects Maastricht, in which case the entire ERM will probably collapse.

The task therefore, must be to stimulate a strong recovery in Britain, accepting as given the ERM con-straint. This should be quite possible. The main requirements are economic competence, political will and a bit of imagination. At present, all these are sadly missing in the Treasury and Downing Street. Fortunately, the CBI, the building societies and even the clearing banks have shown signs of greater determination in their lobbying during the past few weeks. Now the election is over, businessmen could exert enough pressure on the prime minister and the Conservative Party to make the Treasury sit up and take notice, if only they could agree on a common approach.

What, then, should the business

community be demanding? Before

measures which, between them, would have transformed the recession into a powerful recovery almost overnight. These were the abolition of the 10 per cent car tax, the temporary reintroduction of 100 per cent investment allowances and a package of policies to help the housing market, built around a temporary increase in mortgage tax relief that would ease in long-term abolition of the present system. The car and investment measures were seriously promoted by some people in the government, and even the idea of helping homeowners was seriously considered. But complacent as ever, the Treasury transformed all such sensible proposals into the single pathetic gesture of halving car tax.

he car industry should now lobby strongly for the total elimination of car tax (and vehicle excise duty) with revenues to be replaced through higher petrol taxes. The CBI should also be renewing its demands for higher tax allowances. But in reality, private investment is never going to be the prime mover behind a strong recovery. Before businesses invest they need to see stronger demand and even with tax incentives high real interest rates will place a crushing burden on investment. Since ERM membership also rules out any strong growth in exports, extra demand can come only from two sources, con-

sumption and public spending, Much as businessmen would like a recovery led by investment or exports, they must face this fact as long as Britain remains in the ERM, higher consumption and government spending will have to be the catalysts for growth. The implications may seem even more unpalatable to business orthodoxy. To stimulate consumption, the government must either encourage laster wage growth or it must stimulate personal borrow-

ing and discourage saving.
In budgetary policies, the Treasury should also favour public spending over tax cuts, since a large part o these will be saved rather than spent. If only they could overcome their instinctive aversion to these principles, the business and financial communities could throw so much weight behind a package of powerful economic measures that a government with a 20-seat majority would find it hard to resist.

In my opinion, such a package should have four main components: tax and regulatory changes to boost the housing market, as well as to restore fiscal neutrality and revive private rented accommodation; an acceleration of public-sector investment plans in railways, road repairs and social housing; the temporary suspension of all tax distortions, such as Tessas and personal equity plans. that | favour personal saving over consumption; financial reforms that would segment the financial markets, helping to insulate consumers and small businesses from the high real interest rates imposed by the ERM. For details, watch this space.

## A Case of going contemporary

FEW are given £355,000 to indulge in art but John Case. director of development at Pearl Assurance, has just spent Pearl Assortance, has just spent £350,000 buying 128 contem-porary works of art for Pearl's new £100 million offices in Peterborough after Pearl raised £580,000 selling works from its old Holborn headquarters. Petronilla Silver, director of CASP, the arm of the Contemporary Art Society that advises corporate buyers, act-ed as consultant. She says Pearl's collection is now a microcosm of contemporary art. It takes Pearl right away from the boardroom full of portraits of directors. Although Case admits he has no special knowledge of art", Silver thinks he was a good choice to handle the acquisitions. "There are very few people who have the specialist knowledge and who are in the position to buy contemporary. painting," she says. "He had a real feel. You really want people like him who have the courage of their points of view and an open mind." Among Case's selection were established artists Maggi Hambling, Keith Milow and John Keane but he "really went gaga" over young artist Lucy iones, Silver says. He bought two paintings by most artists but all four of her "vigorous and brightly coloured views of London.

leum and others cutting dividends, but one index that can sometimes help them face the music is the Kleinwort Benson TOPSI-100. The index measures the top-yielding shares and is the brainchild of Mich-aci Daniels and Hilton Seely of Kleinwort. They set it up last September and have just scored something of a coup by getting Datastream to make it the only broker's index on general access. Since September, the TOPSI-100 index has won fans among income fund managers and has been quoted in their annual reports to show how well they have done in their own sector which is useful if, as now, the sector is underperforming the FT all-share index "Before TOPSI, high income funds had no yardstick against which their performance could be measured." says Daniels. "It enables a fund to compare its performance with the high-yielding sector in: general and we're delighted that it's now more generally available."

Flipper kid THE latest phase of dolphin mania, where dolphins will be used as "midwives" to expectant mothers, has found a surprising supporter in the world of City head-hunting — an area more readily associated with sharks than Flipper Jonathan Evans, managing director of Josephine Sammons, a rising name in equity markets, is one of 12 husbands flying to Israel in September where his wife will give birth in the Red FUND managers specialising
Sea surrounded by dolphins.
The experiment, reported in European Commission's Scitough time, with British PetroThe Times last week, aims to ence and Technology Directions.

establish whether the dolphins' presence can ease foetal distress in childbirth and whether they can make ultrasonic contact with the unborn child. Far from being scepti-cal, Evans thirtles if "entirely possible" the dolphins will make contact and then recognise the children after they are born. "We'll be able to tell by the way they swim alongside the babies," he says: "You can tell if a dolphin recognises you by the way it midges you." A keen scuba diver, however, Evans has other reasons for being interested. "1'Il have two weeks diving in the Red Sea. so I'm happy to go along with it," he says.

Stride ahead HUGH Logue, the former Stormont politician turned Eurocrat, has just returned to Brussels after a visit to his old stamping ground to present the first of six Stride awards to Ulster wirmers. He dreamed up the programme, Stride, which stands for Science and Technology for Regional Innovation and Development in allowed to see it."

torate. The title was not conjured up out of an office in the Berlaymont but, Logue re-veals, by his children, after he rejected as not quite suitable their first suggestion of Strip-per — Science, Technology. Research and Innovation Programme for the Peripheral European Regions, "I did not think the Northern Ireland Secretary or any other public figure would necessarily welcome being invited to present Stripper awards," Logue explains.

## Round ribbon

WHO says businesses cannot start up in a recession? Julie Wright, 33, has just been given £250,000 by 3i, the venture capital giant, to expand her printer ribbon recycling business after hitting on a product that combines the two jin" virthat combines the two jun wrthes of green-ness and costsavings. Wright set up Inkwell
in a garden shed in Chew
Stoke, near Bristol just two
years ago after her father, a design engineer, conceived the
idea while recovering from
heart lampery. It was an instheart surgery. It was an instant success, with companies such as B&Q alone recycling about 7,000 till ribbons from its 270 stores. Wright has now patented the machine in 14 countries, won her first green award, and even had her first case of industrial espionage when the machine was stolen from her shed. "Luckily, we had just patented it in time so nobody else could exploit it. Now it's kept under lock and key. Nobody except staff is

## Why DMI transfers housing risk wich Building Society is

From P. Groen Sir, Jonathan Prynn's article in Business Times (August 6) on the insurance industry and the domestic mortgage indemnity insurance begs the question: is this really a subject for insurance?

The DMI is in fact a put option given by the insurance companies to the building societies, thereby transferring the risk of the housing market. It looks as if insurance company shareholders now carry the can instead of building society depositors for the less than cautious lending policies of the societies.

i do not know whether an equivalent to the DMI exists in other countries but I doubt it. Put options are always dangerous and giving such an option without hedging possi-bilities is suicidal — a bit like being a Lloyd's name. Yours faithfully, F. GROEN. 60 Dorling Drive.

Epsom, Surrey. From Mr David Blake Sir, 1 refer to the article by Jonathan Prynn (August 6). The reference to Sun Alliance withdrawing mortgage in-demnity cover from the Wool-

insurance. The Woolwich therefore knew before making its decision that it would necessitate the replacement of Sun Alliance for the provision of new mortgage indemnity practical difference to customers either now or in the future. Sun Alliance and the Woolwich continue to enjoy a close working relationship, includ-ing a very successful joint venture — Woolwich Life. Yours faithfully

DAVID BLAKE (Group head of corporate affairs). Woolwich Building Society. Watling Street, | Bexleyheath, Kent.

## Lloyd's special levy is lawful and proper ( )

From the Solicitor to the Corporation of Lloyd's Sir As solicitor to the Corporation of Lloyd's, I read with

surprise Mr Sokol's comments (Business Letters, August 7) about the recent Central Fund levy. I entirely reject his Naturally, before taking its decision, the Council of

Lloyd's considered in great detail the commercial, technical and legal arguments. It concluded that it was right to impose the levy, which has

now been collected from the membership. Leading coursel was consulted on a range of issues, including the extention our by-law powers to which Mr Sokol refers. The unequivocal advice which we received was that the levy was lawful and proper, and the Council would not have proceeded in the absence of that advice.

JOHN R. MALLINSON. Solicitor to the Corporation of Lloyd's,

One Lime Street, EC3.

Yours faithfully.

the Champions Trophy tour-nament in Malaysia next year. The shortage of quality players and a lack of skill led to the downfall. There was, however, one area of success, with the discovery of Robert Hill as the new short-corner specialist. In this vital area of play, he has scored 16 goals in as many international matches since

the first week of May. Germany, Holland and Spain were far ahead of Britain in the art of stopping the ball and distributing it. Furthermore, Britain gave too much of it away.

Sean Kerly did his utmost to spearhead an attack handicapped by the inability of its inside forwards to score, Garcia, Clift and Shaw all having nothing to show in seven matches. Shaw, however, did not have a full game. Of the 11 goals scored, six were obtained penalty stroke, leaving only

BRITISH men's four from open play. Thompson scored two of these. Kerly and Batchelor one each In the World Cup standings, England dropped from

second in 1986 to fish in 1990 and in Europe, from second in 1987 to third in 1991, albeit after a penalty stroke shoot-out with the former Soviet Union. This unhappy state of affairs calls for an overhaul in the system of management, training and selection. Encouraging signs. have appeared at age-group levels, but the talent there can go forward only if shown the

Three routes remain to the next Olympic Games in Atlanta. If England win the World Cup at Sydney in 1994 or the European championship in Dublin the following year, Britain will automatically qualify; otherwise, they will have to play in the qualifying

tournament, as the women. did in Auckland last year. In contrast, over the last two years considerable progress was made in the women's game, with Britain winning the bronze medal here and England securing the Europe

☐ There were thrills in plenty on Samrday at Terrassa, where Germany won the gold medal, Australia the silver and Pakistan the bronze in the

Germany defeated Australia 2-1 in the final for their second title, having previously won it at Munich in 1972. A goal by Hilgers in the second minute and another by him in the 59th minute gave the Germans a 2-0 lead. Corbit replied for Australia from a short corner four minutes before the end, but it was not enough to prevent them losing their third final. They also lost in 1968 and 1976.

In a thrilling play off for the bronze medal, Pakistan beat Holland 4-3.

The Dutch looked to be in

control, with a 2-0 lead and only 16 minutes left, when Pakistan struck. Two goals by Mohammed Shahbaz and two by Khalid Bashir, from short corners, saw them forge into a 4-2 lead and not even a late goal from the Dutch could prevent a dramatic victory.

FINAL MEN'S PLACINGS: 1, Germany; 2, Australia; 3, Paidaten; 4, Holland 5, Spain, 6, Gross Britain; 7, Incle; 8, New Zeelend; 9, Maleysia; 10, UniSed Tears; 11, Argentine; 12, Edward.

# Carruth lands gold for **Ireland**

urday, Michael Carruth, a stocky Dubliner of modest maneating breakfast with his father, Anstin, as another hot and humid day dawned on Barcelona (Craig Lord writes). Just over six hours later he became Ire-land's first Olympic boxing

# Olympians show mankind's better side to world

pic Village has been that nobody wants to leave. It used to be the Commonwealth Games that carried the accolade of the Friendly Games. That title must be awarded unreservedly to the festival just concluded in Barcelona.

From King Juan Carlos to the humblest competitor, from Spain's unprecedented 13 gold medal-winners and the legendary Carl Lewis to the anonymous army of Catalan volunteers, these have been the happiest as well as the most successful Games ever staged.

This is something I doubted would be possible to say after Seoul four years ago. The people of Barcelona, as well as the myriad of athletes, have surpassed themselves in what has been achieved. But this has been the ultimate demon-

stration of peacefulness.

It would be facile to suggest. at a time in history tormented by political and financial strife. by famine and wars, that the account of 16 days of sport. Yet the sporting world, gathered in unique harmony, has presented a face of tranquillity amid intense competition that must surely carry some legacy

have so many heads of state and political leaders given such acknowledgment to this gathering of peoples.

The Games began against a background of criticism and cynicism, directed against overt commercialism, professionalism, drugs and the exploitation of power, against competitors and administrators corrupted by any or all of these vices. What has been witnessed, by hundreds of thousands present here and by billions on television, has been a cavalcade of exploits that demonstrated so many of mankind's more agreeable characteristics, whether in suc-

The Games have been, unequivocally, a huge success. The inter-relation between the sports, the competitors and the host city has been more inti-mate, spontaneous and uninhibited than any before, and will prove to have been a landmark in the social development of both. The administration, involving 120,000 accredited personnel, has held firm, while Barcelona has passed through a watershed in its international perception, from within and without. The

cess or failure.

Games have shown the world, in the words of Juan Antonio Samaranch, that Spain is simultaneously an old and a young country.
The Catalans have discov-

bolic than the daily involvement and enthusiasm at events of the King, a mood that has found a British echo in the presence of John Major. Sport has emerged with a relevance to life somewhat beyond, in the phrase of Robert Scott, "the unwashed on a Saturday afternoon". To have descended from the

Olympic stadium on Mont-

juic, down through the gar-There have been the usual dens and past the palace and

hundreds of thousands of inhabitants who had no tickets the plazas to savour the fun, the feel of the circus and the drama of things unseen, has been exhilarating and at times overwhelming. On the hill behind the city. Gaudi's illuminated Parc Guell has cast a magical spell over the nighttime city. For a fortnight. Barcelona has hardly slept. There have been a hundred,

a thousand unforgettable mo-ments, many acclaimed, many ered they can be a part of more that slipped by unrecord-Spain, while the rest of the ed; intense, private expericountry has learning can be ences. None can forget the happy, when supporting the estacy on the face of be represented by Catalonia. Patoulidou, of Greece, when Nothing has been more symecstacy on the face of she won her country's first athletics gold medal for 80 years, nor the grace of Devers, of America, having fallen when leading the race only yards from the line. The admiration of Akabusi, having set a British record in the 400 metres hurdles in third place, standing in awe on the track to watch the rerun of Young, of America, the new world record-holder, was a

most populous country. China, with more than 50 medals, and India, the second most populous, with none for the second Games running. It is the contrast between a totalitarian regime that has succeeded the Soviet Union and East Germany in projectionthrough-sport, and a struggling democracy fraught with more pressing social priorities.

Equally evident has been the decline of former Eastern European sports powerhouses, notably Bulgaria with a single gold medal. Poland and Czechoslovakia with three each. Bulgaria won the itregularities.
The decline of these coun-

tries reflects a sharp downtum in expenditure on sport that will continue-with economic also be becoming apparent in the former Soviet republics. Their collective 90-odd medals this time will prove to have been, for a while, their last hurrah. Hungary have held on, with 20 medals in fifth place on the gold count, because theirs is the most progressive economy of the

former involuntarily Commu-

As Eastern Europe declines, and with it the ideological challenge to the United States there will be an upsurge in Eastern Asia. South Korea lies sixth and Japan, on total medals, eighth.

We have seen the emer-gence of African women runners, headed by Derartu Tuhi, of Ethiopia, a runaway winner ahead of Elena Meyer, of South Africa, In the women's 10,000 metres, and by Hassiba Boulmerka, of Alge-ria, in the 1,500 metres. By the

year 2000; China's women may well have overtaken America on all-round medals So accustomed to domi-

nance is the United States that there have been dismayed faces and gium reports on their various "failures". Despite massive funding, I believe the trend will continue as the rest of the world improves; and the Games will be better for that.

Drug scandals, fortunately. have been few, though doubtless more have been guilty than have been caught. Bloodtesting is likely to be intro-duced by the time of the Winter Games at Lillehammer in 1994, and that should proye a far more effective determent. If China wishes to be free of suspicion, it will have to produce evidence of domestic random testing to match its sudden upturn in medals.

It was hugely beneficial to the fight against drugs in Germany that on the final day of track events there should be Baumann and Heike Henkel in the men's 5,000 metres and women's high jump, respec-tively. They have a reputation of antipathy to artificial assisKirabbe and others.

There has been evidence of a fall in standard in men's middle distances, or rather fewer peaks, because of continyous running round the calen-

dar for money. World and Olympic records will be fewer.

I have had few dreams, awake or asleep, about the US basketball team. This game, together with women's gyin-nastics, is populated by physical freaks, and seems to me devoid of drama, unless you call winning by 117 to 116 exciting, which was a prospect never confronted by the Dream Team. What Magic Johnson gave to the Games was the ethic of his desire to be

My lasting memories, among others, will be of the beauty of the rowing and and Le Seu d'Urgell, with their staging of two of the purest Olympic sports; the intensity of competition at the tennis in impossible temperatures; the unparalleled success of the Spanish in the yachting events, and elsewhere: and the enduring genius of Carl Lewis. the outstanding athlete of 100

# A new spirit is born from the ashes of once-great machine

# American relay men give British a lesson in the value of long-term practice

# Dream teams out on their own

called America's

referring to the 4 x 100 metres have been talking about the United States 4 x 400 metres squad (David Powell writes). Both set world records on Saturday without anyone getting near them.

It can be argued that Lewis's achievements here were as meritorious as his accomplishments in his previous two Olympics. Winner of four golds in Los Angeles and two in Seoul, he came to the Montiuic stadium with bullet holes in his uniform but leaves with them patched over.

This had been an ignominious season for Lewis, who looked a forlorn figure in the US trials last month, failing to qualify for the 100 metres and finishing second to Mike Powell in the long jump. He had that must now be recorded as reason, not excuse, for his poor

He defeated Powell to win the long jump on Thursday, then, on Saturday, secured his eighth Olympic gold medal by anchoring the 4 x 100 metres team to 37.40sec, an improvement of 0.10sec on the previous record. "I felt incredible." Lewis said."I feel I am back to where I belong, in great shape. I look forward to sprinting in Stuttgart [the world championships] next year." He did not discount the possibility of returning for a fourth Olympics in 1996, when he

will be aged 35. Mike Marsh, who led off the team, made an observation which shames the British effort. "As a unit we have worked together the last three years," Marsh said. Contrast this with the words of Frank Dick, Britain's director of coaching, who said: "As a unit they the British four who ran in the final] have not ever practised together." Goodness knows, though, Dick has tried

to assemble them. Britain's third changeover, from John Regis to Christie, was ragged, "Because it was a late box change, Linford turned his head and, in doing

Relay medal-winners: Britain's Sally Gunnell, Sandra Douglas, Jennifer Stoute and Phylis Smith

Britain lost the European

Cup last year because of a poor relay changeover. Such errors are more likely from a team that does not practise. When Dick organised a squad training session in Zurich, only Christie of the four who ran in the final was present. "We have seen enough of this now to understand that you have to put together a squad and the squad has to work together regularly over a long period,"

Quincy Watts ran the fastest lap of a track ever seen, taking 43.1sec for the second leg of the 4 x 400 metres relay. British hopes of adding the Olym-pic title to the world title were

so, his hand moved," Dick said. It took Regis two goes to get the baron in.

Andrew Valmon ran faster than Roger Black. David Grindley needed Black to be ahead to have even the slightest chance of staving within striking distance of Watts on

> Kriss Akabusi began the third leg 30 metres down and worse was to follow as Roberto Hernandez held off Regis to secure second place for Cuba. But they were four seconds behind the winners, whose world record now stands at 2min 55.74sec.

Sally Gunnell added a x 400 metres bronze to her 400 metres hurdles gold. She ran a 50.4 sec last leg, running scared from a shadow. "You get a shadow when you are running with your baton and I thought it was someone right behind me." Gunnell said.

FROM JOHN GOODBODY

Javelin thrower gracious in defeat

# Injured Backley to miss competition for rest of season

From David Powell, athletics correspondent, in barcelona

World ,

ung-term practic

ar own

throwing arm was the cause of his inability to challenge Jan Zelezny for the

Olympic javelin title here on Saturday, he resisted the temptation to say so. To Backley's credit, he declined to make excuses, just as he had at the world championships last "I had a small problem with

the elbow, nothing major," Backley said. "I do not think there was a thrower out there who did not have some sort of injury." However, his an-nouncement that he would not compete again this season, because he wanted to "straighten out" his body, suggests he was inhibited more than most. An adductor tear compounded his

difficulties.

Backley said it would be "a joke" to suggest that he might be content with his bronze medal in the circumstances, but he should not be so dismissive. He is only the second British man to win an Olympic javelin medal. Dave Ottley was the first, with a silver in 1984.

The champion said that he thought the gold medal would be Backley's next time. "It is likely that I will not be taking part in Atlanta," Zelezny, 26, said. "I think Stree Backley, if

remains healthy, will be the Olympic champion in Atlanta. He is the javelin thrower of the

Aged 23, Backley, the European and Commonwealth champion, was competing in his first Olympics. Zelezny, from Czechoslovakia, was the silver medal-winner at the last Games and Seppo Raty, the Finn who took the silver here, was third. Kimmo Kimmunen, the world champion from Finland, appeared to be head-ing for the bronze until Backley produced his best throw in the fourth round. Zelezny's winning distance of 89.66 metres came in the

first round, his support belt falling off just before he re-leased the javelin. Backley had strapping on his right elbow but, with his throws worsening by the round, he took it off for the fourth. to move ahead of Kinnunen and in behind Raty's 86.60 silver-medal distance. It was a mixed day for

tion began, the International Amateur Athletic Federation (IAAF) ruled that the world record he set in January would not be taken by a recent throw from Zelezny. Backley's 91.46 had been beaten by Zelezny in Oslo last month; but Zelezny's 94.74 was achieved with a javelin which the IAAF ruled outside legal specifications.

Zelezny said: "I felt fruit by things people had said and written about me after the world record, so I wanted to

win at all costs and show the world that I am a great javelin

thrower and capable of a

world record in the future." Backley, who also had the world record renumed to him on a technicality last year, did not feel like a world recordholder. "I do not think that the javelin he threw 94 metres with was anything special," Backley said. He added that a capricious wind here had made throwing difficult.
"Jan's 89 metres in these

# Heat nearly costs Rosset gold

MARC Rosset throwing in the lower before winning Switzerland's first summer Olympic gold for 12 years. The roasting

Barcelona sun left Rosset feeling so ill that he thought several times of defaulting during his five-hour struggle to beat Jordi Arrese, of Spain, in the men's tennis singles. A rank outsider for the title

when he arrived in Barcelona, Rosset fully deserved the win

world no. 1, Emilio Sanchez. the twelfth seed, and Goran Ivanisevic, the world No. 4, on the way to the final.

Rosset, ranked 44 in the world, and Arrese battled to the point of exhaustion on another hot, humid day before the Swiss won 7-6, 6-4, 3-6, 4-

"I was very close to default-ing, I felt so terrible," Rosset said. "The previous night I child not sleep and I went on court feeling really bad. I just concentrated on my serve, but in the third and fourth sets I

gave me something for my stomach. I just wanted to stop, go into the locker room, have a shower and a drink. But I thought, 'They'll kill me, there's no way I can stop in a major final. "Maybe it was the sun

because in the fifth set, when it

vas cooler. I feit better." It was the first five-set match Rosset had played at the Games. He had spent the previous week water skling and partying and arrived in watching the other sports than

# Boulmerka adds cry of defiance to moment of joy

THERE are many expressions to be seen in the face of tion. The look in the eyes of Hassiba Boulmerka, from Algeria, was one of unrelent-

ing defiance.

Reviled by the Muslim fundamentalists in her country as a woman for stripping her arms, legs and her face bare in order to run, her victory in the 1,500 metres made her less a heroine than a martyr for the free expression of Algerian women. As she crossed the line in

triumph, despite that strange, ungainly gait, her instantaneous mood, like Sebastian Coe's at Los Angeles in 1984, was one of unveiled aggression: not, as with him. towards the press and tele-vision which had assailed him with doubt, but towards all those who questioned her right to be there, to express herself as a woman, never mind to be champion of the world, which she already was from last year.

Her gesture, with arms and legs spread wide and taut, as though still lunging for victory, said: "Here I am, look at me, acknowledge me and accept me." She tore at her bib-number, trying to reveal her country's name on her vest as the cameras closed in to convey her image to every corner of the globe. But the Olympic stage can carry a multitude of different

Just under a year ago Boulmerka, whose first re-corded time at the age of 16 eight years ago was almost five minutes, had won the world championship in 4 min 2.21sec, by a brief margin becoming Algeria's first athletic champion ahead of Noureddine Moroell in the men's event

In Tokyo, Boulmerka had beaten the world's best to become also the first female African world champion in athletics (although Nawal el Moutawakel, of Morocco, won the Olympic 400 metres hurdles in 1984) and at home the insults and intimidation became intense. For religious fanatics, her fame

Could she repeat the feat, painst the same array of illustrious opposition: Dorovskikh, from Ukraine,

year, the improving Li Liu and Yunxia Qu, of China: the veterans, Podkopayeva, 40, of Russia; and Melinte, 35,

For three laps, Rogachova made the running, compact and confident, but the Algeridogging her footsteps, in turn trailed by the other Unified Team and Chinese rivals. On the final bend, Boulmerka let rip, a picture of power and willpower. Her splayed right foot has a plant more twisted than Cram's. but there was now nothing to stop her as she surged

Her time of 3 min 55.30 sec was the fifth fastest all-time, and the race was the first with four runners under four minutes. Rogachova took the silver, the 20-year-old Qu the bronze with the 30-year-old Dorovskikh fourth. "Alg-erie!" Boulmerka shouted at the cameras. "Algerie!"

Her national pride was to be shared only with Hocine Soltani, a bronze medal winner in the 57kg category in boxing. Within half an hour of her victory. Morceli, after a season of injuries, would finish no better than seventh in a race surprisingly won by Fermin Cacho, a comparatively unknown Spaniard.

He gave his country one of the great prizes of the Games, a blue riband event. And who cared a jot that it was the slowest time, 3min 40.12sec, since Ron Delany won in Melbourne 36 years

So astonished was Cacho to find himself leading, having made his effort down the last back straight to outpace the three Kenyans, Chesire Birir and Kibet, Herold, of Germany, and Spivey, of America, that down the home straight he looked behind him five times. Where were the others!

Nowhere. In the last 50 metres, the silver and bronze were claimed by El-Basir, of Morocco, and Sulaiman, of Qatar. Morceli, badly boxed in from 800 metres to 1,200 metres, was never in the hunt. A bizarre race with a

greatest team ever to be

Earvin "Magic" Johnson, Charles Barkley, Larry Bird

and David Robinson were just the cream of the cake. Eleven

of the 12 players are legitimate superstars in the NBA and the

all millionaires, to boot.

assembled. Michael Jordan,

# Camera that kept Games on track

ONE quiet British success came from the television innovation of the Games the tracking camera running along under the roof of the main stand at the Monjuic Stadium. The system came from a

new, three-man company, based at the old Shepperton film studios. Malcolm Rogers, - Sam Heaphy and Pete Howland set up the Camera Tracking Company just before Christmas and are already getting a considerable reputation for their work with motorised cameras.

For the games, they had to develop a 420ft track, rigged 120ft in the air, with an acceleration and velocity to match the world's fastest athletes. The outcome is a camera that sped along at 12.5 metres a second, with an acceleration of 6.5 metres a second. It started running just when the ath-letes did — its starter was triggered by a command from the official Seiko timing pulse, which derived from the starter's gun.

Scots bloomer

It just bien

SCOTTISH journalists have spent a lot of time in Olympic city scouring the biographies of all the world's competitors in the hope of finding that Carl Lewis had an uncle from Auchermuchtie or that Maxim Tarassov's pole for vaulting was made in

Christie: flag-bearer

Barrhead. So it was with the utmost irony that when the Flower of Scotland was finally sung by Simon Terry, the archer who won two bronze medals, it fell on deaf ears Top of the ranks of those

northern papers to miss the bullseye was the Daily Record, which failed even to spot the target. In a centre-page spread on the eve of competition, it had published photographs and mini-profiles of all 31 Scottish hopefuls. Trouble was, there were 32 and it was Terry, a self-employed roofer who lives in Lincolnshire but was born and bred in Stirling who became the only Scot to win a medal.

Sad commentary

TELEVISION commentators had their own obstacle course. During the synchronised swimming, the Eurosport man noted that one elegant pair had chosen dark, sombre costumes to match their music: "Which is 'Dance Macabre' by Saint." Sans doubt. Struggling to keep up with the culture later, he was right up to date with another duo, threshing in the water to music from Shostakovich's Spartacus ballet. "And we can all recognise their music, can't we? The Onedin Line'."

Linford who?

AND final thoughts from the "Dream Team", who went out draped in the Stars and Stripes to prove that money wasn't their only motivation, honest That Canadian guy who won the 100-yard dash and then draped himself in the Canadian flag and went round the track. He was the inspiration," the ineffable Chuck Daly, the team coach explained Uh, one thing, Chuck That Canadian guy was Linford Christic.

## **Dream Team in line** for a wake-up call DREAM Team ball Association (NBA) and they may be, but it is unlikely to be the USA Basketball Federation. Quite simply, it was the

a recurring one. So, the rest of the

basketball world can now sleep easier. The United States men's side duly won the surest gold medal of these Games in Barcelons on Saturday, 117-85 over Croatia, and then the criticism of team selection started, from within, no less. The United States Olympic

team chief, LeRoy Walker, said the choice of NBA professionals had left no room for Olympic hopefuls from American college basketball and pledged it would not happen for the 1996 Games in Atlanta. "I don't want every youngster who has a dream of making the Olympic team to feel that he can't do this unless he makes the NBA," Walker, who is favoured to become the next president of the US Olympic Committee, said.

"I don't want it [the Dream Team] in Atlanta under the same set of circumstances. I don't want to disenfranchise every college player." The American team was

invited to play in the Olympics

in Barcelona, said: "I don't believe that there aren't some college players who could fit into this process and we could still have our best team." Boris Stankovic, head of Fiba, the international basketball federation, which let professionals into the Olympic tournament, said the move had benefited the sport. "Our basketball players in the world by a selection committee of the professional National Basket-est is enormous," he said.

# Boxers caught fighting

after being involved in a scuffle with ten Iranian wrestlers last Wednesday. The trio. Paul Lawson, from London. Peter Richardson, from Middlesbrough, and Stephen Wilson, from Edinburgh, were accompanied by Peter Wren, the team's medical officer.

The British boxers were arrested by Spanish police after the skirmish outside the Olympic village when one Iranian was slightly hurt. Nobody was charged.

Money talks

CHINA has been less ready to embrace capitalism than eastem Europe so far. But things are changing and their athletes are already on Westernstyle money as a reward for their 16 gold medals. The government is giving each winner about \$15,000. But that is only a start.

A Hong Kong businessman, mindful of the forthcoming change in the colony's status, is also giving each gold medal-winner US\$27,500 and, in China, the Communist Party and other organisations are queueing up terday. She is the fourth to hand over gifts.

Leeds on top in curtain-raiser to football season

# Clinical Cantona makes most of Liverpool's charity

Liverpool ...

By STUART JONES FOOTBALL CORRESPONDENT

THE picture painted by two of England's leading clubs at Wembley, which contrasted so vividly with the nation's miserably negative contribution to the European championship. was seen by some as a bright portent for the inaugural Pre-mier League season. If only it was indicative of a new

beginning. The Charity Shield on Saturday was, indisputably, the most spectacular that anyone could remember, but the occasion, as the respective managers conceded, represented a public practice match. Once the genuine competition starts, Liverpool's defence, in particular, is unlikely to act like a collection of independent free spirits.

Only once last season did they concede as many as four goals and that, their heaviest defeat for nine years, was at Highbury in April when they had already drifted far out of contention for the League title. We were extremely charitable today," Graeme Souness, their manager, said.

He insisted he will persist with the 3-5-2 formation he has used in each pre-season game — apparently, it suits his players — but unless he changes the personnel. Liverpool promise to be more vulnerable at the back than they have been for several decades. Walters and Saunders may enhance and broaden a powerful attack, but neither can adequately fill the role of a "wing back" and

RICK Parry yesterday prom-ised Premier League clubs that they would receive their

most consistent individual last season, could have done, but he was surprisingly sold during the summer.

Howard Wilkinson, aware of the possibilities, selected three forwards. In omitting Strachan and Rocastle, he ran the risk of his numerically weakened midfield being overrun. At times, it was, but his own front line, especially the diminutive Wallace, was able to run into unusually

wide, open spaces. Nobody benefited more than the tall and elegant Cantona. The French "enfant terrible", who spent an anony-mous evening in the shadow of Keown when he represented his country against England in the same stadium six months ago, scored three goals for the first time in his

A member of France's equally undistinguished European championship side, he will doubless continue to be unpredictable and rely on inspiration rather than industry. Although Wilkinson said Cantona has trained diligently, he admitted: "Language is still a barrier when I suggest that he should work harder. He understands when I say anything complimentary."

The first player since Tommy Taylor in 1957 to claim three goals in the Charity Shield, Cantona completed his haul courtesy of a typically abberant Grobbelaar waving at Wallace's cross. Nevertheless, Souness stated that his goalkeeper, who has been picked by Zimbabwe for a World Cup qualifying tie next weekend, will not be released.

dub, Real Societian, work untur-place after defeating Premier League Middlesbrough in the third place play-off. Real, managed by the Toshack, the former Livernool and Wales player, lost a 2-0 lead when Middleshrough hit three goals in five second-half minutes. but immediately recovered to level the scores at 3-3 and won a penalty shoot-out when their goalkeeper, Herdandez Patri. saved the final spot-kick from Andy Payton the Middles-

brough forward usually so deadly in front of goal. Real led through Oceano, who scored after 39 minutes, with Meho Kodro's 55thminute free kick stretching their advantage. Paul Wilkinson, after 61

minutes, Willie Falconer, after 63 minutes and Robbie Mustoe, after 66 minutes. turned the tables in speciacular style before Ian Ironside, the reserve home goalkeeper, then unfortunately presented Luis Perez with a simple

# Tenby continues classic education in Newbury test

By MICHAEL SEELY

TENBY, the 16-1 ante-post favourite for the 1993 2,000 Guineas after an impressive win at Goodwood, is likely to embark on the next step of his education in the Washington Singer Stakes at Newbury on

"He's had only the one

race, " said Henry Cecil yesterday. "So we want to give him more experience. If all goes well there, we'll consider races like the Royal Lodge Stakes and the Racing Post Trophy."

Although backing highly-rated maiden winners at short prices for the following season's classics is not a practice to be recommended, it is

interesting to note that Geof-frey Gibbs, the Jockey Club senior handicapper, also holds Tenby in high regard.

"Our top colt is Son Pardo, rated at 117 before yesterday's race in Ireland," he said. "Giving Tenby the right to make 5lb improvement in his

next race, I'd put him around the 108 to 110 mark." Disappointingly, only five have been entered for the Berkshire track's seven- furlong listed event, but they include Paul Cole's highly thought of Goodwood winner,

Firm Pledge, and Richard Hannon's easy Newmarket scorer. Right Win. Of the talented band of fillies at Warren Place, the trainer intends running Magique Rond Point in the Lowther Stakes at York. How-ever, the comfortable Good-wood winner will not be opposed by Dancing Bloom, at present one of the second favourites for the 1,000

"She's just started work again," said Michael Stoute. "If she goes for a pattern race next, it would be the Prestige

Stakes at Goodwood."

Stoute was in the money at Newmarket on Saturday when Mystic Goddess gained just reward for her courage and consistency when proving too good for Reine De Neige in the Sweet Solera Stakes.

Although Michael Roberts took the riding honours for the afternoon with a 112-1 treble, and went on to add another three at Lingfield's evening fixture, Willie Carson was also seen at his determined best. Following his win on Mystic Goddess, the Scot went on to complete a double by winning the valuable Brierley Invest-ments Handicap on Deprecator for John Gosden.

The same combination of trainer and jockey have high hopes of capturing next week's Ebor Handicap with Turgenev, currently the 8-1 favourite for the highlight of York's three-day meeting.

"He's an improving three-ear-old," Gosden said, "and he'll be suited by the extra distance." But, even though Gosden also has the second favourite, Brier Creek, Stoute is hopeful of a bold showing from Hawait Al-Barr, who ran a sound race when fourth to Witness Box in the Northumberland Plate.

"It's always been a tough race as the three-year-olds are coming to their best," said the trainer. "But I thought Hawait Al-Barr ran well at Newcastle considering that he had an interrupted prepara-

The final shape of the £250,000 Juddmonte International Stakes, the feature of the first day of the meeting. has not yet been determined Kooyonga, Dr Devious and Alnast Alwasheek are all intended runners, but Jim Bolger has yet to reach a decision about St Jovite.

## RUGBY UNION

# South Africa's lack of experience exposed

THE predicament of South for the international on Saturday against New Zealand, their first against the All Blacks since 1981.

The average age of the eight forwards is nearly 30 — Ian MacDonald, 24, is responsible for holding down the average — while they share only 20 international caps.

The captain, Nass Boths,

and his veteran centre partner, Danie Gerber, both 34, total more international appearances (42) than the rest of the South African side together. Gerber has been recalled to the side following a serious

injury to Brendan Venter. The New Zealanders delayed the announcements of their team until today when they play a selection of central and, rural unions (in effect second and third division) at Withank.

John Williams, the Spring-Africa, deprived of regular bok coach, confirmed that the international competition for names of those selected had nearly a decade, is emphasised been decided before the weektors and the junior Springboks in Pretoria.

That could explain, to a large extent, the subdued almost lethargic nature of the game expected to match in fashion, and commitment, if not in violence, the early two New Zealand outings against Natal and Orange Free State

On Saturday New Zealand won easier than the 25-10 score - two goals, one try and two penalty goals to one goal and one penalty -- might

The world champions, Australia, arrived yesterday in Pretoria. They start their tour with a game against Western Transvaal Potchefstrom. SOUTH AFRICA: T Van Rensburg, J Small D Gerber, P Muller, P Hendriks; N Bothe (captain), R Du Pretz, H Rodgers, U Schmidt, L Muller, W Bartmann, A Malen, A Geldenhuys, J MacDonald, J Breedt.

# **LeMond looking for** injection of form

By Peter Bryan

GREG LeMond goes to the line today for the start of the 518- mile Kellogg's Tour of Britain in Dundee desperate to inject some form into what has been, for him, a lack-lustre

It will be the American's first race since he abandoned the Tour de France on the fourteenth stage, nearly an hour behind Miguel Indur-áin, the overall leader. LeMond last rode in Britain ten years ago, when he fin-ished second in the world professional road race championship at Goodwood

With three previous winners - Robert Millar, Michel Demies and the defending champion, Phil Anderson among the 98 riders, LeMond may again be in for a disappointment. Anderson has as his lead-out man, the British champion, Sean Yates.

Stephen Roche, still to reproduce the form of 1987 when he capped victories in. the Tour de France and the Giro d'Italia with the world road race title, was to have led a strong Carrera squad but will be a non-starter after crashing in San Sebastian on

in a head wound. The Irishman will not be replaced. The Italian team also includes Dzsmolidine Abduzhaparov, from the Commonwealth of Indepen-

dent States, a triple stage winner when an amateur in the Milk Race, but best remembered for a spectacular crash on the last day of the 1991 Tour de France along the Champs-Elysées. The British team, Banana

Met, have signed three guest riders to bring their strength up to the limit of seven the national criterium champion, Neil Hoban, Spoencer Wingrave, a new professional, and Martin van Unen, of Australia.

OTHER, OR MUSICALE.

OTHER HY: Today: First stage: Cay Crout, Dundee (St rates, start tym, lines) spril, Tomorrow: Second stage: Edinburgh-Setshwad (133 miles start 9.30m, linish 3.35pm). Wadnesday: Third stage: linid lessows.jb-Humberside (103 miles start 11em, firsh 3.40pm). Thursday: Fourth stage: Uncoin-Covenity 1114 miles start 11em, firsh 3.30pm). Friday: Fifth stage: Notinginan Leeds (118 miles start 10 15ass, linish 3.15pm).

Olympic riders took the first two places in the High Wycombe 102-mile road race near Stokenchurch, Steve Farrell finish ten seconds ahead of the French-based rider, Matthew

# YACHTING

# Youth rises to challenge of conditions

BY BARRY PICKTHAIL

MATTHEW Humphries and his Youth Challenge team led the Round Britain race on handicap yesterday after mak-ing a flying start from Cowes on Saturday. Humphries and his crew.

who are all aged 21 or under, have entered the 2,000-mile Round Britain race, spon-sored by Hartlepool Renaissance, as a training exercise for the 1993 Whitbread Round the World Race.
Their 39-foot yacht was

third among the 28-strong fleet to leave the Solent via Spithead, and yesterday they were trading tacks off Start of Sunday. "It was quite scary. Point with much larger yachts, including Richard Fenhalis's Swan 57, Noonmark V. of Sunday. "It was quite scary. The flashes of lightning lit up the sky and the wind picked right up. We are expecting "Conditions are not very clear, but we believe there are

only three yachts ahead of us." Humphries reported by radio Those ahead of The Youth Challenge were Mike Slade's 80-foot Ocean, Leopard, the 54-foot Dump Truck, skip-pered by Colin Watkins, and Bounder, the Beneteau 45footer skippered by Chris

Humphries also reported that his crew had sailed right

more than sixth place in the

CHS dass I pecking order.

Heavy penalties for two retire-

ments on Thursday and Fri-

day and for failing to start on Saturday ruined their chall-

another low pressure system shortly, which should swing the winds northwest, and give us a fast reach to Bishop's Rock," he said. Don Parr, skipper of the 63-

foot Quailo of Wight, who is competing in his fifth Round Britain race, had a more jaundiced view of the conditions when he spoke to race control yesterday. The weather is lousy. The winds have dropped from 22 to ten knots through the eye of a thunder-storm during the early hours and heading southwest," he said miserably, thinking no

doubt of another wet night spent bashing to windward on their course around the Scilly isies and up to Cork

If the weather stays as predicted Ocean Leopard and Dump Truck, the two yachts expected to beat Robin Knox-Johnston's 16-year record, are expected to reach the Irish haven today, chased hard by Humphries and The Youth

☐ A group of Scottish yachtsmen have set up Sea Vision (Scotland) to enable the British round of the international formula one world yachting grand prix to go ahead on the Clyde in two weeks.

# Change of wind blows favourites off course

BY ALEX RAMSAY

FOR all the skill and technology that goes into sailing, it was the weather that had the final say in Land Rover Cowes Week. After the last day of racing on Saturday the overall class championships were de-cided, and suddenly those who had been steaming towards honours in the early part of the week found themselves out of the running as the wind dropped in the last couple of

days.

Despite three wins in seven

enge and allowed Rubin XII, owned by Hans Otto Schumann, to sneak in and win the class with two late victories on Thursday and Saturday. Stephen Fein in the Etchells He had steered Full Pelt to

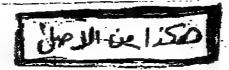

It was the same story for three victories in the early part

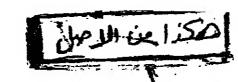

races. Richard Matthews's of the week, but by being Crusader ended up with no disqualified on Thursday and not making it to the starting line on Saturday, he picked up too many penalties to stop Richard Power and Nick Griffith winning the class trophy aboami Jessica

Some of the early leaders could not be beaten. Stephen Bailey had done enough with Arbitrator in the opening stages to win the Sigma 38 class. It was the same for James Gresham and Nicholas Inchbald in the Contessa 32s. With Trader Jo racking up

four wins before the breeze deserted Cowes, they too claimed the class honours. By far the closest of the classes was the J24s. Just half a point separated Paul Woodman's Fuzzy Duck in first

place from Pat Miles's Deejay. The only question left to be answered is whether Land Rover will be back next year to support the event. After committing four years of work and £600,000 to Cowes Week, the firm has until the end of the month to decide whether it

# Progressive Green's Cassatt weighted to land swift treble

IF PATIENCE is a virtue,
Mark Brisbourne has his fair share. After saddling his first runner at Thirsk last August, Brisbourne made his first appearance in the winner's enclosure, again at Thirsk, with Green's Cassatt a year

However, Brisbourne, who rode 60 winners as a National Hunt jockey, has not wasted much time since and Green's Cassatt attempts her third victory in 10 days in the Robert Morley Memorial Handicap at Windsor this afternoon. She is my nap.

The filly, who came back into training after being tested in foal, did not get a clear run on her return to racing when sixth of 18 at Chester in July and ran too freely early on at Wolverhampton next time

She then finished four-anda-quarter lengths fourth to Kirriemuir over an inade-

quate trip at Leicester before winning over a mile at Thirsk.
She followed up by beating.
Irish Groom by a comfortable looking two lengths at Not-

tingham three days later. Explaining his quick-fire policy. Brisbourne said: "She won't be in training for more than about another three weeks. I can't see her getting into many more races with 7st 9lb, including Steve Maloney's claim."

The dangers could be Congress and Grand Vitesse. Congress won over a mile as a invenile and reverts to a shorter trip after two unsuc-cessful attempts over 10 fur-longs. Although the drop in distance may help I feel she has more weight than her form merits.

Grand Vitesse was a winner at Goodwood in May and has put up some worthy perfor-mances since, notably when a close sixth to Etharisto in the Britannia Handicap at Royal Ascot. However, he has been-finding little in the closing

After two promising performances over the minimum distance, Palm Chat came good when tried over six

Taking up the lead before halfway, she kept on well in the final furlong to beat Runrig by half-a-length and looks capable of following up in the Robert And Norah

Wilmot Nursery Handicap. Awestruck caused a shock when beating hot favourite Musical Prospect at Epsom last time out. However, it will be much less of a surprise if he can supplement that success by winning the Institute Of Insurance Brokers Nursery Handican at Leicester this

Victory could come at the expense of Time's Arrow, who looked to have his limitations exposed at Newmarket last

Rock Opera, who has not been disgraced in his last two runs, can resume winning in the Sunderland AFC/Johnny Ridley Handi-cap at Thirsk.

# Pips Pride gives Hannon victory

FROM OUR IRISH RACING CORRESPONDENT IN DUBLIN

RICHARD Hannon landed the group one Ir£150.000 Heinz 57 Phoenix Stakes at Leopardstown yesterday but with the 10-1 Pips Pride rather than the 2-1 favourite Son Pardo, who did not reach the first six.

The explanation for the upset lay in the decision of the executive to put the starting stalls in the middle of the track. Normally they are on the far side, giving the high numbers a clear advantage. The English-based jockeys who walked the track before

racing discovered that the fastest ground was under the stands' rails and accordingly the field split into two groups with those drawn one to six tacking over to the near side. This left Son Pardo, Kamaatera and Aradanza rac-

ing on the far side of the track. Son Pardo won this particular race but was beaten a total of almost 14 lengths.

Going: good to soft

Pips Pride had been strongly fancied for the Scottish Equitable Richmond Stakes at Goodwood but resented

being held up. Here Frankie Dettori allowed him to make full use of his speed and although Shahik was going as well a furlong out, Pips Pride stayed on the better to win by threequarters of a length. Hannon believes Pips Pride

will stay seven furiongs and is booked for Doncaster's Champagne Stakes while Son Pardo will tackle the Gimcrack Stakes at York.

At Leopardstown on Saturday, Jim Bolger's Park Dream landed the group three Waterford Foods Phoenix Stakes, in which the 6-4 joint favourites Prince Ferdinand and Flowing never threatened.

Park Dream, who is still improving has the Prix de l'Abbaye de Longchamp as her long-term objective.

MR BROOKS (Lester Pig-gott) held off the challenge of Monde Bleu to land the

Hannon, also successful in Ireland with Pips Pride.
Owner Paul Green said:

We are in all the big sprints but have no wish to take on Lyric Fantasy. His next race could be the Haydock Sprint Cup and we will think about the Abbaye after that."

At Neuss, Ian Balding's Saratoga Source (Willie Ryan) was beaten into second behind Arastou in the Deutscher Buchmacher-Stutenpreis.

Always Friendly (Alan Munro) fared best of three

Gatting leads run charge

# Middlesex tighten their grip on title

BY RICHARD STREETON

LORD'S (Essex won toss): Middlesex (4pts) beat Essex by 94 runs

THIS showdown between the only two teams who can win the Sunday League was won in convincing fashion yester-day by Middlesex. Their suc-cess virtually clinched them the title, the only competition they have never won. Set to make 237 in 39 overs, Essex were bowled out for just 142.

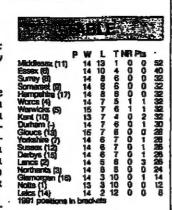

Middlesex received a standing ovation as they left the field after completing victory with 5.5 overs in hand. To be deprived of the £25,000 for first place. Middlesex must lose their three remaining theirs with a high run-rate.

Middlesex are at home to Yorkshire next Sunday and against Sussex and Surrey.

Middlesex, once again, owed much to their ability to score rapid runs, Gatting and Roseberry the dominant lactors. These two added 151 in 25 overs for the second wicket after Haynes, with a Sunday average of 90.50. was caught behind in Topley's first over. Gatting provided marvellous entertainment for a crowd of 8,000 as he drove and pulled with his own, inimitable brand of power and timing. He and Roseberry ran like

hares between the wickets. Roseberry's strokeplay was less obviously violent. A minor curiousity was that he did not hit a four but he did on-drive Fraser for six and pulled Childs for another.

The tempo picked up when llott finished and both the Essex spinners, Such and Childs, were punished, with Childs being removed from the attack after three overs cost 32. Stephenson did a good, containing job but Middle-

sex's tenth Sunday total this year over 200 always looked

when he was well caught by Topley on the run at mid-wicket. Gatting had made 89 from 83 balls, with a six and seven fours, when he mistimed a push against Fraser in the next over and lifted a catch

to short cover. Carr, Brown and Weekes contributed in turn to the two putting on 40 in five overs for the fifth wicket.

Essex began shakily, with Stephenson caught at mid-wicket in the sixth over. Prichard stroked the ball positively before he moved out against Weekes as soon as the left-arm spinner bowled and was stumped. Hussain drove a catch to mid-on against the same bowler and, in the next

over, Knight was caught behind against Headley.

Weeker's telling spell was not yet finished. Garnham was run out and Weekes then had Fraser caught at long-on to finish with three significant wickets. Headley chimed in with three late wickets, which

# Alleyne assumes control

MARK Allevne hit an unbeat- caught, giving Smith the firs en 134 for Gloucestershire as Leicestershire were left at the bottom of the Sunday League table after a nine-wicket defeat at Bristol yesterday. With Athey, Alleyne put on 155 for the second wicket to move past Leicestershire's total of 205 in the 39th over.

Alleyne passed his previous Sunday League best of 76 (also against Leicestershire) and reached his hundred with ten houndaries. He finished with a six and 12 fours off 121 balls. Athey contributed only 19 to the three-figure stand.

Robinson and Boon had put on 122 in 22 overs for Leicestershire, after Babington had removed Whitaker and Briers with only nine on the board. Robinson made 88, with nine fours, before being

of four wickets for 38. An unbeaten stand of 90 in 12 overs by Cowdrey and Fleming led Kent to a sixwicket win over Hampshire with an over to spare at Canterbury. Cowdrey, who

finished on 51, reached his

half-century off 56 balls and

Fleming was 45 not out. Kent had struggled after James took two for 17 in his opening eight overs, and they were no better than 86 for four in the 27th over.

Hampshire, put in to bat, were troubled by Eatham's accurate medium pace, and he finished with three for 24 from eight overs. Middleton was Hampshire's top scorer with 71 off 112 balls, his third successive Sunday League half-century.

# If Mushtaq does not get you, the two Ws surely will

Half the trouble: Wasim Akram claims another victim, this

IMAGINE you were a Paki-stan batsman at the Oval. You have just survived an inconver-niemly good and uncomfort-ably fast spell of bowling from Devon Malcolm, and are pleased to see him taken off. your profound relief. Derek Pringle replaces him

Imagine, now, that you are batting for England. At one end. Mushtaq is asking questions to which, very often, you find yourself guessing the answer. At the other, the relief of seeing Wagar take his sweater after 40 minutes of bowling at such speed as you have never faced before is infinite — until there, taking Waqar's place, is the dreaded Wasim Akram, about to sent a set of quite different but no less difficult problems.

It is bowling that wins matches. Although West Indies have never been without didly entertaining batsmen, it was not until they found Ramadhin and Valentine in the early 1950s, and then, nearly 30 years later, that they started to produce a chain of fearsome fast bowiers, also

But there is a lot more oleasure to be had from watching the present Pakistan attack in action than there has been from watching the modern West Indians. To some extent this may be attributable to the much-criticised rule which allows only one outright

bouncer an over at the same

Wasim and Wagar may well have bowled bener for it. They have been able to target the did at the start of England's first innings at the Oval — without carrying infimidation to such lengths as the West Indians have. Had Waqar been born a West Indian, I doubt whether he would have bowled a full enough length to develop the inswinging yorker as he has.

We should feel indebted to the Pakistanis for having shown that there is more to bowling than containment and oppression. They are a young side too. Wasim is 26, Waqar 20 and Mushtaq 22.

As a pair of bowlers, Waqar

and Wasim are no less formi-dable than Miller and Lindwall Tyson and Statham, Statham and Trueman or Heine and Adcock They are different from Hall and Griffith in that they bowl a fuller length, and also from Lillee and Thomson in that they are

less bloodthirsty. To have saluted Lillee and Thomson or the West Indian fast bowlers, and yet now to state the Pakistanis for flouring the spirit of the game, is simply ignorant. It would be think that, because Pakistan are playing so well at the moment, they will spend the before them. They never have

equable, and never will be. Their next hurdle, other than any number of lesser-ones, such as a succession of one day internationals in Australia and South Africa, will be a Test series in West Indies next spring. England have now lost four series in a row to only ever lost one to them, and that was over 30 years ago. The two Ws and Mushtag

# Essex enjoy their absence

WHAT with inciement weather all around the country, losing two players to England and having suffered three successive defeats, this has been no bad time for Essex not to be appearing in the Britannic Assurance county championship (Ivo Tennant writes). Noninghamshire, pretenders to their title, did not face a ball on Saturday.

Warwickshire, tipped by Nottinghamshire's captain as more likely than Essex to become champions if they themselves do not did not start until 4pm. In the 41 overs possible, they made their

lead over Durham one of 180 - sufficient, perhaps, to condemn them to a fifth successive defeat. Lloyd and Moles both made half-

At the start of this round of championship matches, Warwickshire were 30 points adrift of Essex. In other words, this is a match they need to win. On Friday, Donald took seven wickets in Durham's first innings to take his tally to 65 for the season. Few counties can have relied so heavily on one bowler to win them the

innings in keeping with the traditions of the festival week Fleming's century, his first of contrast to Hampshire's laborious inmings the previous day. The fourth of his career, it

In the brach interval, the sixar old building at Canterbury, now the Colin Cowdrey governor of the Bank of Engpriorities were clear: he interepted his own innings at a

# Horton recovers to take seniors title in dramatic finish

FROM JOHN HENNESSEY IN DURLIN

senior to Horton, to withstand

the Raglish invasion. He left his 60-foot putt five feet short. For much of the afternoon.

as indeed at the finish, Horton

and Grubb had cast a pall over the afternoon by keeping O'Connor in third place.

with Horton as joint leader,

but he fell behind the English

Ryder Cup player with a five at the 7th and behind both

O'Connor had started out

IN A thrilling finish at Royal Dublin yesterday. Tommy Horton beat Christy O'Con-nor, the pride of Ireland, and Tony Grubb, a fellow Englishman, at the first extra hole of a

play-off.
The three had tied on 290. six over par, and it was Horton, who seemed to have thrown away the Forte Seniors (over 50) championship and £7,500 first prize with a wretched finish, who holed the birdie-putt from all of 30 feet. Grubb had hit his second Horton and Grabb with a six

Elkington in the swing

Grand Blanc, Michigan: Steve Elkington, of Australia. shot a 67 on Saturday to join Mike Sulfivan, of the United States, in the lead, two strokes clear, going into the final round of the Buick Open here. Sullivan shot a 68 to come in, with Elkington, ten under par on 206. Elkington's com-

John Huston, 71, and the money list with \$424.852.

defending champion, Brad "I played very well."

Faxon, 70, all finished the day. Elkington said. "My game's on 208.

Elkington began five under like I was going to play well all on 139 and had a bogey on week."

the 2nd hole. But birdies on the 5th and 7th enabled him to turn six-under. He started the back nine with birdles on the 10th and 11th and finished with birdies on the 16th and 17th.

Elkington, who won the came to nothing if you can Tournament of Champions in call \$6,500 nothing. par on 206. Elkingion scannel the New Engiana cassangariot, Wayne Grady, with a the New Engiana cassangariot, Wayne Grady, with a the New Engiana cassangariot, Wayne Grady, with a 18th on the prize with \$424,852.

shot out of bounds, so it was left to O'Connor, 67, 16 years at the long 8th. Not until the 18th was he able again to get

Horton: who has already had two second places on the seniors tour this year, had the title in his grasp when he led by three shots with two holes to play. He dropped two at the 17th and snother at the 18th. At the 17th, where Grubb had already surrendered the

shot by driving into deep rough, Horton took too much club and from behind the green took two chips to climb the bank and then missed from four feet. Horton still had a shot to spare but that went at the 18th and it was O'Connor, to clamorous ap-plause, who got up and down. Having seen Horton miss from 18 feet, he rolled the ball in from eight, for a rock-solid finish of four successive fours. It was sad that in the end it

what he has got and Floyd is

# Ruddock wants to be sure

FROM SRIKUMAR SEN IN ATLANTIC CITY

IF THE coolness displayed by Lennox Lewis at the prospect of facing Donovan 'Razor' Ruddock, in London on October 31 has not quite dispelled the doubts of the experts about the advisability of tak-ing on the most dangerous heavyweight in the world, it appears to have made an impression on Ruddock himself and Lewis's other main rival, Riddick Bowe.

While Lewis's friends and critics feel he could simply be whistling in the dark Rud-dock and Bowe are wonder-ing if the English boxer's boast that he can dispose of anyone, including Evander Holyfield, the world champion, has any solid grounds. They are both going to be at ringside to see for themselves how Lewis deals with Mike Dixon, of Tennessee, at Harrah's Casino here tomor-

Even though Ruddock has

met better men than Lewis

has, given Mike Tyson two

hard fights, and outpointed got. I have not seen him on Lewis as a schoolboy, he wants to be doubly sure and Bowe, who was knocked out by Lewis in the Seoul Olympic Games, wants to see if under will be bringing along his trainer, Floyd Paterson, the former world champion. the direction of his new trainer, Pepe Correa, Lewis has Ruddock said yesterday: rediscovered his big punch. Bowe's manager, Rock New-"Lennox used to be a pretty good boxer. I'm coming to see

ember 11, would be only too happy to make his first de-fence against Lewis. \*Riddick has always wanted to get Lewis back in the ring. He wants to beat him up."

Lewis, who arrived here today from his training camp in Washington, said: "They won't know what to expect even by seeing the Dixon fight. I'm a boxer who boxes according to what the oppoman, said that Bowe, who nent puts before me." challenges Holyfield on Nov-

dictably rubbished by New-man as being "a small guy with no calibre", was himself not too sure about things. "Get past me and you'll win the world title," said the man who had lost five of his 15 contests and then added, "Lewis is a good fighter and it's a great opportunity for me. It's my biggest pay day. But I will have to improve a lot to beat him." Let us hope Dixon's boxing makes more sense IN BRIEF

# Ice hockey man dies in motel

John Kordic, 27, a Quebec Nordiques player, died late on Saturday after police were called to a brawl at a motel in the city suburbs. He appeared intoxicated, police said, and he died in an ambulance taking him to hospital. Syringes and steroids were found in

Kordic's motel room. Known for his hard-hitting style, Kordic played for the Montreal Canadiens, Washington Capitals, and the Toronto Maple Leafs before moving to Quebec.

## Krickstein hurt

Tennis: Aaron Krickstein, the top seed, broke his left foot during his semi-final against Woodforde, of Australia, in the Volvo tournament in Los Angeles. Woodforde, unseeded, went on to meet the second-seeded Richard Krajicek, of Holland, in the final,

## Jenvey's title

Powerboating: Tony Jenvey. of Beaulieu, won the world 2litre offshore title at Swansea on Saturday, with 1,025pts, just 25pts ahead of his main rival, Richard Lucas, of Petersfield, against whom he raced neck-and neck over the third and final heat.

## Nicoll closes in

Motocross: Kurt Nicoll, of Briton, won the Luxembourg Grand Prix 500cc race at Kohlenberg yesterday. He is I lots behind the leader. Georges Jobe, of Belgium, with only the Swiss Grand Prix on August 23 remaining.

## Title retained

Lacrosse: The United States retained the under-19 men's world championship beating Australia 24-11 at Long Island, New York, on Saturday. England were fourth, losing 17-9 to Canada.

## Harvey again

Motor racing: Tim Harvey had his third win of the season, leading home a quartet of BMWs in the 11th round of the Esso British touring car championship at Pembrey. John Cleland, contest leader. retired and 28 points now cover the top four places.

Eye on the main chance: Lewis in training for his clash tomorrow with Dixon

# Calm Azinger survives sudden death

PAUL Azinger birdied the 16th hole twice in 45 minutes today to capture his second BMW International Open title after a sudden-death playoff in Munich

The 32-year-old American, who beat David Feherty with a birdle at the same hole in a play-off two years ago, holed from six feet to win a five-man shoot-out this time.

Just 45 minutes earlier. Azinger sank a nine-foot putt. for his fourth birdle in an inward half of 32. That enabled him to squeeze into 'extra time' with Bernhard

under-par total of 266, but it was Azinger who held his nerve after the players were ferried out to the 1 oth tee.

Forsbrand lost his chance by nudging his approach into the water hazard and James and Day from Oklamaha overshot the green.

Langer, carrying the hopes of the Bavarian crowd, saw his 15-footer graze the hole, leaving Azinger calmly to sink his effort for a second play-off

272: P Fowler (Aus), 57, 67, 70, 68; M Jiminoz (Spain), 69, 67, 67, 69; D Feberty, 68, 67, 69, 70; C Pavin (JS), 71, 64, 68, 71, 275: M Machanozia, 68, 71, 69, 67; D Myovic (Carl), 67, 70, 68, 68;

ENGLAND were unbeaten after four sessions in the pairs and triples at the close of the second day of the Woolwich world bowls championships at

Worthing yesterday.

Tony Allcock and John Ottaway head their section of the pairs, just in front of Namibia, while Roy Cutts, Andy Thomson and John Bell stand second in the triples to South Africa, who have a much superior shots

Allcock and Ottaway had

fourth behind Canada, who beat Graham Robertson, Willie Wood and Angus Blair of Scotland. Peter Mutter, the Canadian skip, played a decisive part with his knack of altering adverse heads.

POLO

# Shrewd ponies economy

By JOHN WATSON TRAMONTANA beat Ellerston White 10-9 at Smith's Lawn yesterday in the final of the 26-goal Prince Philip Trophy, Europe's high-est handicap challenge, for which five teams have been competing since July 22.

This was the best display of classic polo of the whole tournament, much better than last Thursday's league match between the same two quartets when it was clear Tramontana, who were then trounced, were saving their ponies.

Ellerston White, still without their regular No. 1, Wilfiam Lucas, with an injured hand, fielded the lower-handicapped Henry Brett, and therefore began the duel with three goals on the scoreboard. However, Tramontana's Mexican Gracida brothers brought their side level in the second chukka and into the lead before treading in time.

Ellerston played a more thoughtful, tactical game in the second half and the tally was subsequently level peg-ging until halfway through the sixth and last chukka. Carlos Gracida then brought on the outstandingly fast dark brown pony. Chesney, which had carried him in the first chukka. Scoring three goals in quick succession, he made it 10-8, but Ellerston were awarded a close penalty a fraction before the last bell. TRAMONTANA: 1, A Embarcos (2): 2, C Gracida (10), 3, M Gracida (10), Back, M Brown (4), ELLERSTON WHITE: 1, N Brest (2): 2, B Haguy (10), 3, G Peres (10); Back, R Harson (1)

# Ramblers triumph with a spin

VINCENT SQUARE (Eton Ramblers won toss): Eton Rambers beat Repton Pilgrims by 115 runs

HAVING taken 26 years to reach a final of the Beachcroft Stanley's Cricketer Cup, Eton Rambiers left little to chance yesterday. Their spinners exerted such control over Repton Pilgrims' batsmen that the match was effectively settled long before the end. .

Barday, once of Sussex, and Whittington, on the Middlesex staff and a protege of Phil Edmonds, no less, bowled 23 overs between them for six wickets at a cost of 40 runs. On a slow pitch, not one Reptonian found a method of hitting them off their length. Earlier, Eton's openers, Macleay and Robins, had begun with a partnership of 117 off 35 overs. Both were dropped early in their innings. It mattered little that Eton ultimately fell around 50 runs short of the ideal total. There were 14.5 overs still remaining when they secured a cherished victory.

RESULT: Earn Ramblers 198 for nine (95 overs: R D O Mackey 65, C W V Robins 52), Repton Provins 84 (40.1 overs, J R 7 Berclays 4-19).

# Liam Botham does little with the bat

IAN Botham's son, Liam, managed only six as England scored 276 for seven before declaring 46 behind South Africa in the under-15 Test match at Arundel yesterday.

Botham, caught off a mistimed off drive, was one of three victims for Andile Mxenge, who also dismissed David Roberts and Alex Morris in a 14-over spell which cost 51. England's top scorer was the opener, Alex Swann, who hit 77.

SOUTH AFFICA UNDER-15 328-3dec (M Berfield 144 not out) and 57-2; ENGLAND UNDER-15 276-6 dec (A Swenn-77, O Wilson 70, T Wade 56 not out). ☐ Harry Brind, the TCCB pitches consultant, has been awarded a testimonial in 1993 by Surrey, where he is head groundsman, Brind, 62. iomed Surrey from Essex in

Spotlight falls on fast-bowling pair as Pakistan clinch Test series in convincing fashion at the Oval

# England wilt before Wasim and Waqar

By Alan Lee, cricket correspondent

THE OVAL (fourth day of five): Pakistan beat England

PAKISTAN have been guilty of demonstrable indiscipline, tainted by suspicions of murky malpractice and generally damned by faint praise. But in a little more than three days at phantly paraded their prouder ossessions, the finest bowlers in the world.

The hundreds of spectators who spent yesterday afternoon picnicking on the outfield were testimony to the sheer quality of an attack now unrivalled in Test cricket. England had been overwhelmed, bowled out twice in five sessions, and even the impeccable Oval pitch provided no sanctuary as the final Test, and Cornhill series, were spectacularly conceded.

Robin Smith's four hours of unbroken defiance counted for nothing as England, 173 behind on the first innings, were dismissed for 174, the lowest total of the series. Two balls from Ramprakash finished the game 15 minutes before lunch, but the debates

ods of obtaining swing from

Theories about how Paki-stan bowlers make the old bail

At the end of his final series as England manager, and his third defeat by Pakistan, Micky Stewart awarded the man-of-the-series prize jointly to Wasim Akram and Waqar Younis. But when pressed on the legitimacy of the pair's stunning swing bowling. Stewart was curiously coy.

Hinning that he was aware of their method of making an old ball swing. Stewart repeat-edly refused to comment on whether it fell within the laws of the game. "I won't spread it around," he said, "because once we perfect it ..." His trailing sentence provoked a further volley of questions which brought Stewart to his feet, announcing that he was

terminating the conference. Stewart did not stint in his flattery of the two bowlers, who have between them taken 43 wickets in the five games and 28 in Pakistan's two victories. "They are the best pair of swing bowlers I have seen in all my years in the game," he said.

But the manager was notably reluctant to dispel the gossip of ball doctoring which has accompanied Pakistan, at increasing volume, through-

as Wagar and Wasim."

make it heavier.

out this tour. It has persisted despite regular, copious ball inspections by the umpires and despite the inscrutable denials of Javed Miandad. Miandad, whose record of

seven victories in ten series as captain stands comparison with that of the great leaders, repeated yesterday: "There is no secret. Our bowlers are brought up to swing the ball and, because of the way your

of it gets rough very quickly." Whether one accepts this or not, there is an unedifying tendency to suspect the worst whenever new standards are set in any sport. Wasim and Waqar are doing things that are regarded as sinister because they are different.

They deserve better, as a deflated Graham Gooch admitted. "They were too good for us," he said. "Those two bowlers have been decisive and our batsmen have found it very hard to cope with the old ball swinging. The devastat-ing thing is that they are both genuinely fast bowlers. I have never known anyone swing the ball so much at that pace." In hindsight, England did

both." Told he was being mysterious, he said: "I know

how it's done, but I would not

want to spread it around

because once we perfect it, if

that were the idea ..."

Javed Miandad, Pakistan's

captain, said: "England lost

because of pace, not because

of swing. The umpires looked at the ball all the time. One

side goes rough because of the hardness of the pitch, and we

keep the other side shiny."

terms. In four of the five Tests Pakistan have looked better, bowlers. In this game, the message has been deafening. England did not bowl badly, indeed Tufnell and Malcolm did all they were chosen for. But the achievement of dismissing Pakistan for 380 paled into insignificance when England had to bat.

But for Smith, belatedly discarding the nervy imposter of recent Tests, the game would have been over on Saturday and the Test and County Cricket Board would have had the embarrassment of refunding yesterday's full house. Once Gooch had be-come the third of four wickets in 29 balls for Waqar, it was no longer a case of who would

Smith held firm to reach his 25th half-century in Tests. Lewis kept him company, but never comfortably, and when he charged at Mushtaq yesterday and was stumped by yards, it was no more than the

little leg spinner deserved.

This ended a two-hour stand of 61 and Wasim, predictably, saw the opening and darted through. Pringle and Tufnell were bowled by balls, delivered around the wicket, which pitched on and hit off stump, Mallender flashed instinctively and Malcolm was yorked leg stump, giving Waqar a 22-21 margin over his team-mate. They danced off together,

wreathed in smiles and embraces. England had not picked the right side but, as Gooch said: "The only mistake that mattered was that we couldn't get enough runs."

Harm-raising: Pakistan's potent pairing, Waqar, left, and Wasim acknowledge victory at the Oval yesterday

## of the ball that made it swing swing more than the new one so suddenly when 40 or more include scuffing one side of the ball and applying sweat overs old. Stewart said: "It's Olympic officials to

seek more funds By JOHN GOODBODY

THE funding of Britain's elite never had an outstanding competitors is to be reviewed following the moderate team performances at the summer and winter Olympic Games.

The British Olympic Associ-ation (BOA) will take part in talks over the winter to try to persuade the government that it should provide extra money. At the two Games in 1992, a total of 20 medals (including five gold medals) were won, whereas in 1988 there were 24, with the same number of

Dick Palmer, the BOA secretary, said yesterday: "I would like to see a more direct interest and involvement by the government."

Not since London hosted the event in 1948 have so many British politicians visited the Olympics. Led by the prime minister, who is committed to Manchester's campaign to stage the 2000 Games, they will have seen the investment needed for success.

Palmer said: The politi-cians must realise that we cannot play at this any more. The lesson we must take away is that in future we must to compete not participate." Spain, a country which has

# Britain's medal hopes fade as Whitaker and Milton stumble out of contention

# Classic Touch finds the golden touch

Full stretch: John Whitaker on Milton finished in fourteenth place

FROM JENNY MACARTHUR IN BARCELONA

LUDGER Beerbaum, of Germany, who thought he had "little chance" of even qualifying for the individual showjumping final after retir-ing with a broken bridle from the team contest, won the gold medal yesterday after two faultless rounds on Classic

The 28-year-old Bavarian. whose victory in the bright sunshine was in marked contrast to the storms and driving rain which had delayed the start of the competition, is only the second rider to win the competition outright with two clear rounds. The first was his compatriot Alwin Shockemöhle on Warwick Rex in

Piet Raymakers and Ratina Z, members of the gold medalwinning Dutch team, were within a whisker of doing the same. But a quarter of a second time fault in the second round relegated them to the silver medal.

Norman dello Joio, of the United States, who had asked last month if he could withdraw from the team because he thought his eight-year-old horse Irish was too young, won the bronze. "She got better with each round." the 1983 World Cup winner said

Simon Barnes, page 14 Olympic honours, page 19 Hockey, page 19 David Miller, page 20 Results, page 21

afterwards, "but it's a hell of a place to school." Britain's tale of woe in the equestrian events at these Olympic Games continued when John Whitaker and Milton, lying joint first after the opening round, stumbled badly after fence 4A in the second round. Whitaker cleared the double at the second attempt but the 15-year-old Milton then hit the second two elements of fence the influential combination.

They finished fourteenth. Whitaker's younger brother, Michael, and Monsanta, fin-ished eighteenth. Tim Grubb, the only other Briton in it, bowed out of the competition when Denizen fell on his nose after taking off too early for fence 6 in the first round.

When the competition started, in driving rain, with spectators wrapped in dustbin liners, the conditions were atrocious. The Dutch favourite Jos Lansink, with Egano, paid a heavy price. Egano, never known to stop, was eliminated at fence 8.

After the tenth rider the rain stopped, and the scores improved. Beerbaum. Raymakers, Whitaker and Dello Joio all had clear rounds. Dello Joio and Irish had just

one fence down in the second round. Raymakers, worried about losing control of the strong Ratina took a long turn to fence 7 and paid dearly with a quarter time fault. Ît still meant Beerbaum had

to go clear to win the gold ourright. But he is no stranger to pressure. In Seoul, riding The Freak, a horse he had sat on only once before, he had to achieve a similar feat to secure Germany's team gold medal.

Classic Touch, an eight-year-old Holstein mare by Caletto is not without a sense of occasion. After jumping faultlessly through the massive red and yellow combination. Beerbaum scented victory. Ap proaching fence 10 he said: "I knew I had just one fence left between me and the gold -fortunately Classic Touch

# **Hwang puts Korea** on marathon roll

FOR the first time since 1936, a Korean won the Olympic men's marathon title yesterday when Hwang Young-Cho used the long hill to the Montjuic Stadium to his advantage to kick away from his closest challenger and win in 2hr 13min 23sec (David Pow-

Hwang, 22, had always been among the leaders but it was not until the 20 miles mark that he began to stamp his authority on the race.

It was ironic that the man who kept with Hwang the longest was a Japanese, Koichi Morishita. When Kee-Chung Sohn won the Berlin Olympic marathon 56 years ago, he was compelled to run under the Japanese flag because Japan had invaded their country. He also appeared under his Japanese

name of Kitei Son, the name that went into the record book. Hwang came to the race as one of the fastest men in the field, having run 2hr 8min 47sec in Oita six months ago. On a course which demanded respect because of a sharp rise over the last three miles, Hwang bided his time. At 20 miles, Hwang.

Morishita and another Korean, Kim Wan-Ki, broke away from the group and, though Salvatore Bettiol, of Italy, and Stephan Freigang, of Ger-many, threatened briefly, the front men never seemed in danger. With little more than a mile to go, Hwang kicked away from Morishita and, by the finish, had 22 seconds in hand. Freigang moved up for third place in 2hr 14min. Steve Brace was the highest Britain in 2hr 17min 49sec.

# Dick content but attacks IAAF

FROM DAVID POWELL, ATHLETICS CORRESPONDENT, IN BARCELONA

FRANK Dick, Britain's director of coaching, said here at the weekend that his team would return home satisfied with its performance in the Olympic Games. At the same time, he repeated his criticism of the decision by the Interna-tional Amateur Athletic Feder-

ation (IAAF) to stage world championships every two years instead of every four. The bulk of the British team returns home today with six athletics medals, two gold and four bronze, two fewer than in the last Games, although on that occasion none was gold. Maybe the number of medals is not quite what we might have expected, but there are more countries getting among the medals now," Dick said. "I would not mind betting that more countries have won medals than in any previous Olym-pic Games. We have 16 or 17

athletes who have made the top eight in the world and, if we were talking about the quarter-finals at Wimbledon, we would be doing back

somersaults."
Linford Christie, in the 100
metres, and Sally Gunnell, in
the 400 metres hurdles, won Britain's first gold medals since 1984: Kriss Akabusi (400 metres hurdles), Steve Backley (javelin) and the men's and women's 4 x 400 metres team took bronzes.

The greatest disappoint-ment was Liz McColgan's inability to add an Olympic gold medal at 10,000 metres to the one she took from the world championships in Tokyo last year, but she was among the overwhelming majority of those who failed to do the double. Only three of the 39 world champions in the individual events succeeded, a

statistic that Dick used to support his argument that biennial world championships are a mistake.

When the IAAF took the decision last year, Dick was strongly critical. "It is putting too much strain on the athletes to expect them to come out year after year and perform at their best at world level." Dick said then. At the weekend he noted that none of the men's world champions and only three women - Marie-José Perec (400 metres). Hassiba Boulmerka (1.500 metres) and Heike Henkel (high jump) - had won in the same

event here. "It goes back to the old argument of continuous world championships," Dick said. "Athletes cannot rise to a peak year after year. It's almost worthwhile us trying to get two teams established as the prob-

lem is compounded by grands prix and European meetings where athletes are trying to earn a living. They have to say to themselves: Do I can to pay the mortgage or do I invest the time in trying to get a med-

Dick referred to "a golden thread of optimism in people such as Curtis Robb, David Grindley, Sandra Douglas, Steve Smith and Rob Denmark". These were young people, he said, who had come to their first Olympics and had coped with the moment admi-rably.

Grindley's contribution was

the most surprising. Aged 19. he broke the British 400 metres record to reach the final and he goes home with a bronze medal from the 4 x 400 metres relay. "I really did not expect to be going
